

National Health Service

Occupation Code Manual

Version: 21.0

Document Purpose

This document defines the specification for version 21.0 of the NHS Occupation Code Manual. Occupation Codes are a set of codes used to define and identify the NHS workforce.

This version incorporates the changes to NWD v3.5 approved by the Data Alliance Partnership Board (DAPB) and published in the Information Standards Notice (ISN) DAPB1067 Amd 71/2023 available here:

<https://digital.nhs.uk/data-and-information/information-standards/information-standards-and-data-collections-including-extractions/publications-and-notifications/standards-and-collections/dapb1067-national-workforce-data-set>

IMPORTANT:

Changes defined within this document have been formally approved by the Data Alliance Partnership Board (DAPB).

This document should be read in conjunction with ISN DAPB1067 Amd 71/2023 and NWD v3.5 Specification document available here:

<https://digital.nhs.uk/data-and-information/information-standards/information-standards-and-data-collections-including-extractions/publications-and-notifications/standards-and-collections/dapb1067-national-workforce-data-set>

For more information on the status of this document, please contact:	NHS England Tel: 0300 303 5678 Email: enquiries@nhsdigital.nhs.uk Website: https://digital.nhs.uk/
Date of Issue	June 2024
Reference	NHS Occupation Code Manual v21.0.xlsx
Copyright ©2024 NHS England.	

A summary of changes from the previous version are included below.

Summary of Changes from version 20.0

For full details of the changes please refer to the relevant Matrix guidance notes, [some of which have been updated](#)

All changes and additions from version 20 are coloured light blue and [underlined](#) within each matrix and Lookup Guide s

A; N and P Matrices

[The matrix split note has been updated to clarify how each matrix should be used](#)

S Matrix

The following codes have been opened:

[Tutor in Radiography \(therapeutic\)](#)
[Consultant Therapist / Scientist in Optometry](#)
[Manager in Optometry](#)
[Scientist in Optometry](#)
[Technician in Optometry](#)
[Assistant Practitioner in Optometry](#)
[Student / Trainee in Optometry](#)
[Assistant in Optometry](#)

Code:

[S7G](#)
[SAW](#)
[S0W](#)
[S2W](#)
[S4W](#)
[S5W](#)
[S8W](#)
[S9W](#)

Revision to the S matrix:

[The heading for column D 'Orthoptics/Optics' has changed to 'Orthoptics'](#)

[A new column W has been created with the heading 'Optometry'](#)

[New notes added: 60 - 62](#)

U Matrix

The following codes have been opened:

[Consultant Healthcare Science Practitioner](#)
[Consultant Biomedical Scientist](#)
[Specialist Biomedical Scientist](#)
[Biomedical Scientist](#)
[Trainee Biomedical Scientist](#)

Code:

[UBE - M \(There is no UBI\)](#)
[UCA - D](#)
[UDA - D](#)
[UEA - D](#)
[UFA - D](#)

The following codes have been changed:

[Consultant Healthcare Clinical Scientist](#)
[Specialist Healthcare Clinical Scientist](#)
[Healthcare Clinical Scientist](#)
[Trainee Healthcare Clinical Scientist](#)

Code:

[JAA - M \(There is no UAI\)](#)
[U1A - M \(There is no U1I\)](#)
[U2A - M \(There is no U2I\)](#)
[U6A - M \(There is no U6I\)](#)

[New notes added: 40 - 46](#)

Update to the Lookup Guides

[A number of Job Roles / roles and their corresponding Occupation Codes updated](#)

Occupation Code Lookup

[A new column, 'Valid or Retired', has been added to the Occupation Code Lookup guide to denote which Occupation Codes are 'Valid' or 'Retired'.](#)

National Health Service

Occupation Code Manual

Version: 21.0

How to use the NHS Occupation Code Manual

Occupation Codes are a set of codes used to define and identify the NHS workforce. They are set out in this manual in matrix form by different general Staff Groups. The User Guidance pages provide information on the structure and format of the codes and how to apply them.

Staff Group Matrices

There is a separate tab for each Staff Group code matrix which includes detailed guidance notes. Each Staff Group matrix page is labelled with its alphabetic reference character - e.g. A for Ambulance Staff. A list of each Staff Group and corresponding alphabetic reference is on page 2 of the User Guidance.

Lookup Guides

Lookup Guides have been included in the manual to help users to find the correct Occupation Code. The Lookup Guide lists different job roles and titles and provides a suggested code to use. They are intended to be used with the guidance contained in each matrix to identify the correct code. The guides are intended to be used by those who code NHS staff, but also for users who are involved in workforce analysis and planning.

Amendments and changes

Amendments will be issued periodically when approved by the Data Alliance Partnership Board (DAPB) and notified to the service via the publication of an Information Standards Notice (ISN). Requests for changes and updates to the NHS Occupation Code Manual first need to be agreed by the Workforce Information Review Group (WIRG) and any requests should be put to WIRG via the secretariat at NHS England.

For more detail on the Data Alliance Partnership Board (DAPB) please visit the NHS England website here:

<https://digital.nhs.uk/data-and-information/information-standards/information-standards-and-data-collections-including-extractions>

Glossary

The following acronyms and abbreviations have been used within the NWD and this document:

AAP	Associate Ambulance Practitioner
CCST	Certificate of Completion of Specialist Training
CCG	Clinical Commissioning Group
CPD/E	Continuing Professional Development / Education
DAPB	Data Alliance Partnership Board
DCB	Data Coordination Board
DHSC	Department of Health and Social Care
ESR	Electronic Staff Record
ESRDW	Electronic Staff Record Data Warehouse
FTE	Full Time Equivalent
FTN	Fixed Term Training Appointment Number
GDC	General Dental Council
GMC	General Medical Council
GP	General Practitioner
HCPC	Health and Care Professions Council
HR	Human Resources
ISN	Information Standards Notice
MDC	Medical and Dental Census
MSC	Modernising Scientific Careers
NHS	National Health Service
NMC	Nurses and Midwives Council
NTN	National Training Number
NVQ	National Vocational Qualification
NWD	National Workforce Data Definitions
PCT	Primary Care Trust
PT	Part-Time
SpR	Specialist Registrar
STP	Scientist Training Programme
WTE	Whole Time Equivalent

National Health Service

Occupation Code Manual

Version: 21.0

How to use the NHS Occupation Code Manual

Occupation codes are the traditional way of identifying numbers of staff in particular work sectors of the NHS in a consistent way. Occupation codes cover all staff in the Hospital and Community Health Service (HCHS), both clinical and support / administrative and ancillary staff.

Occupation codes are based on what staff do, and make no direct reference to payscale information

The manual covers NHS staff by their main functional groupings and is arranged in the following sections:

- A Ambulance staff**
- G Administration and estates staff**
- H Health care assistants and other support staff**
- M Medical and dental staff**
- N Nursing, midwifery and health visiting staff**
- P Nursing, midwifery and health visiting learners**
- S Scientific, therapeutic and technical staff**
- U Healthcare science**
- Z General payments**

Format of codes

Character	Type	Status	Meaning
First	Alphabetic / Numeric (1)	Mandatory	Defines the major staff group
Second	Numeric / Alphabetic	Mandatory	Identifies the type of employee
Third	Alphabetic / Numeric (1)	Mandatory	Identifies the area of work care setting
Fourth et seq.	Alpha/numeric	Optional	For local use only in non ESR organisations

Notes:

(1) For Medical and Dental staff, the first, second and third character are all numeric

"*" is used in this document to indicate any valid character.

Please consult the Lookup Guides at the end of this manual to check which code to use

Coding / Re-coding of staff

When staff are subject to a change in circumstances (e.g. promotion, transfer, attaining specific qualifications) the Occupation Code should be checked for updating. When the change in circumstances is temporary, local discretion should be used to decide whether the period of time involved justifies the change.

When re-coding existing staff to take account of new Occupation Codes, it is helpful to use a 'stop and start' approach with a relevant effective date for the change, which is applied to all active employees affected.

The coding of directly employed NHS staff by these Occupation Codes is a Department of Health and Social Care central requirement. All NHS employers are expected to code their own staff according to the Occupation Codes. Invalid and inaccurate codes will be rejected in mandatory workforce collections such as the workforce Minimum Data Set (wMDS).

Dual posts / positions

Where a member of staff has two distinct posts they should be recorded separately for each post, with an FTE reflecting the proportion of time they spend in each post. When they have one post covering different areas (for example, an Adult and General nurse who works on two or more different wards) they should be recorded once with their Occupation Code reflecting their main area of work.

Multidisciplinary Team Roles

The general rule is that we code the post and not the person; however, there are some exceptions to the coding rule, for example, when a post can be filled by individuals from multiple professional backgrounds. In which case the Occupation Code, Staff Group and Job Role will be determined by the professional registration of the recruited individual.

When a code is not available

Shaded boxes in the matrices, containing three dashes, indicate that the code must not be used. If it does not appear possible to allocate a code to a post without using an un-shaded box, then NHS England should be consulted for advice. There is also a comprehensive look up guide at the end of this document.

Qualified / Unqualified split

The divisions within certain matrices between qualified and unqualified staff are intended to provide a consistent means by which the workforce is split for workforce planning and publication purposes, and are not based on the specific registrations or qualifications that an individual may hold for their role. The matrix splits are there as a guide and are not intended to be rigid in their application. Please see the Analysis Guide for further information. The case is slightly different for the N matrix which is split into 'NMC Registered Nurses, Midwives and Health Visitors' and 'Nursing Associates and support to NMC Registered Nurses, Midwives and Health Visitors' and also for the A matrix which is split into 'Registered Ambulance Staff' and 'Support to Registered Ambulance Staff'.

Electronic Staff Record (ESR) and Occupation Code Manual updates

Published updates to the Occupation Code Manual will be implemented in line with the DAPB guidance to suppliers and within the constraints of the ESR development process. Users will be advised of the target release date in the Development Schedule. Organisations using ESR should ensure that their coding is in line with guidance in the Occupation Code Manual and associated documents/tools.

Note that there is not always a direct mapping between Occupation Code values and the Staff Group/Job Role and Area of Work values. Users are advised to seek the most appropriate match in each case. Where possible, ESR Job Roles have been included in the alphabetical lookup guide in the Occupation Code manual. Further guidance on how to use Job Role and Area of Work values can be found here:

<https://digital.nhs.uk/data-and-information/areas-of-interest/workforce/national-workforce-data-set-nwd-guidance-documents>

Lookup Guides

Lookup Guides have been included in the manual to help users to find the correct Occupation Code. They are intended to be used with the guidance contained in each matrix to identify the correct code to be applied. They are intended to be used for those who code NHS staff, but also for users who are involved in workforce analysis and planning.

For more information on how to use Occupation Codes, please contact:	<p>NHS England</p> <p>Tel: 0300 303 5678 Email: enquiries@nhsdigital.nhs.uk Website: https://digital.nhs.uk/</p>
--	--

AMBULANCE STAFF

A	Emergency Care	Hazardous Area Response Team	Patient Transport Service	Education (see note 19)	Call Handling
	A	B	C	D	E

Registered Ambulance Staff

Consultant Paramedic (see note 8)	A4				Closed
Manager (see notes 1 to 3)	A0		Closed		
Advanced Paramedic (see note 9)	A5				
Specialist Practitioner (see notes 10 & 14)	A6				
Paramedic (see note 4)	AB				

PLEASE NOTE: The new matrix splits are intended to provide a consistent means by which the workforce is split for workforce planning and publication purposes, and not necessarily based on the specific registrations or qualifications that an individual may hold for their role. The matrix splits are there as a guide and are not intended to be rigid in their application. Please see the existing Analysis Guide towards the end of the manual for further information on these splits.

PLEASE NOTE: The matrix split is intended to provide a consistent means by which the workforce is split for workforce planning and publication purposes. The top part of the matrix is only for recording individuals whose role requires they are registered with the HCPC as a Paramedic. The lower part of the matrix is for recording individuals who provide support to registered Paramedics.

Support to Registered Ambulance Staff

Ambulance Technician / Associate Practitioner (see note 5)	AE				
Assistant Practitioner (see note 11)	A7			Closed	Closed
Emergency / Urgent Care Support Worker (see notes 6, 12 & 16)	A8			Closed	See note 12
Ambulance Care Assistant (see notes 13 & 16)	A9	Closed	Closed	Closed	Closed

Notes for the ambulance staff matrix

- Managers are those who have overall responsibility for budgets, manpower or assets or who are held accountable for a significant area of work and who have little or no patient contact.
- All managers who **need** to be trained ambulance personnel should be included in the ambulance staff matrix (A0+).
- All managers who **do not need** to be trained ambulance personnel should be included in the administration and estates staff matrix (G).
- Only staff who have successfully completed an approved qualification in paramedic science and are registered with the Health and Care Professions Council (HCPC) should be coded as AB*. The word 'Ambulance' has been removed from the row title as not all paramedics are ambulance paramedics.
- This Occupation Code has been changed to 'Ambulance Technician / Associate Practitioner' as Ambulance Trusts are working toward the Associate Ambulance Practitioner (AAP) qualification. The change in code title aims to cover all of the current technicians but also those staff that hold the new AAP qualification. Therefore, only staff who have completed the Institute of Healthcare and Development (IHCD) Ambulance Technician award (or equivalent) training (and no higher clinical ambulance qualification), or the AAP, should be coded as AEA - E. These staff are at level 4 on the NHS career framework.
- Non-Emergency Call Handlers and Non-Emergency Medical Dispatchers should be coded to G*E in the Administration and Estates staff matrix (G) with the corresponding Job Role and appropriate Area of Work value. Emergency Call Handlers and Emergency Medical Dispatchers should be coded as A8E with the corresponding Job Role and appropriate Area of Work value.
- Please note that a number of staff in support of Ambulance workers should be coded within the administration and estates staff matrix (G), those working in central functions (such as administrative & clerical staff or administrative managers) should be coded as G*A according to their level of work. Those working within hotel, property & estates (maintenance of the buildings and the vehicles) should be coded as G*B. Only those staff in direct support of patient care staff (such as Non-Emergency control staff) should be coded G*E.
- A Consultant paramedic is a paramedic who is working towards or has completed a PhD clinical/professional doctorate and applies a highly developed theoretical and practical knowledge over a wide range of clinical, scientific, technical and/or management functions, which include; clinical/professional leadership; expert practice; policy and service development, research and evaluation; and education and professional development (College of Paramedics definition). These staff are registered with the Health and Care Professions Council (HCPC) and are at level 8 on the NHS career framework.
- An Advanced Paramedic is an experienced paramedic who has undertaken, or is working towards a master's degree in a subject relevant to their practice. They will have acquired and continue to demonstrate an expert knowledge base, complex decision making skills, competence and judgement in their area of advanced practice (College of Paramedics definition). These staff are registered with the Health and Care Professions Council (HCPC) and are at level 7 on the NHS career framework.
- 'Specialist Practitioner' - is a paramedic who has undertaken, or is working towards a post-graduate diploma (PGDip) in a subject relevant to their practice. They will have acquired and continue to demonstrate an enhanced knowledge base, complex decision making skills, competence and judgement in their area of specialist practice (College of Paramedics definition). These Specialist Practitioners are responsible for mentoring current paramedics and taking on the supervisory and responsibility for paramedics and technicians. This Occupation Code includes Specialist Paramedics who work in the community who also have more advanced skills to that of a qualified paramedic. These staff are registered with the Health and Care Professions Council (HCPC) and are at level 6 on the NHS career framework.

AMBULANCE STAFF

Notes for the ambulance staff matrix

11. Staff who are technicians in training / apprentices undertaking the Associate Ambulance Practitioner (AAP) qualification or similar training should be coded as A7*. This includes Student Paramedics (usually in Emergency Care) and Urgent Care Practitioners. These staff are at level 3 on the NHS career framework.
12. This Occupation Code is for staff working at level 3 in the NHS career framework who are supporting qualified staff e.g. Emergency Care Assistants and Urgent Care Assistants. They will be on AfC Band 3 or unqualified Band 4 staff who are not covered by A7* - Assistant Practitioner. Using the corresponding Job Roles of 'Urgent Care Assistant' and 'Emergency Care Assistant' will enable differentiation between the staff groups. Also, Emergency Call Handlers and Emergency Medical Dispatchers should be coded as A8E with the corresponding Job Role and Area of Work value of 'Emergency Control'.
13. This Occupation Code is for Ambulance care assistants / Patient Transport Service drivers who were previously coded as 'A2 - Ambulance Personnel'. The corresponding Job Role of 'Ambulance Care Assistant / Patient Transport Service Driver' should be used for these staff. These staff are at level 2 on the NHS career framework.
14. Closure of Occupation Code AAA 'Emergency Care Practitioner' - This is a specialist role which requires additional qualifications, but does not have any line management responsibilities and is decreasingly used by Ambulance Trusts. The code A6* 'Specialist Practitioner' and Job Role 'Emergency Care Practitioner' will enable identification of those staff who hold the additional qualifications.
15. Closure of Occupation Code AGA 'Trainee Ambulance Technician' - The current definition for this Occupation Code is for staff that are undergoing the Institute of Healthcare and Development (IHCD) accredited training to become an Ambulance Technician. The IHCD no longer exists and as such this code is no longer appropriate.
16. Closure of Occupation Code A2A 'Ambulance Personnel' - This Occupation Code is a generic all-encompassing code that has been used to identify a multitude of different roles with different training requirements covering Patient Transport Services (Band 2; 3 and 4 roles); Emergency Care Assistants (Band 3) and Emergency Care Technicians (Band 4 - not IHCD qualified). Therefore new Occupation Codes have been opened so that the various different roles can be more easily identifiable.
17. Staff working in GP Practices e.g. Paramedics, should be coded to the appropriate level and area of work as staff working in secondary care, but should be identified by selecting 'GENGP' in the 'Position Workplace Organisation Code' field on ESR.
18. Multidisciplinary Team Roles - The general rule is that we code the post and not the person; however, there are some exceptions to the coding rule, for example, when a post can be filled by individuals from multiple professional backgrounds. In which case the Occupation Code, Staff Group and Job Role will be determined by the professional registration of the recruited individual.

[19. The A*D Occupation Codes are only to be used for staff who work in education / training and not to be used for learners.](#)

ADMINISTRATION AND ESTATES STAFF

G		Central Functions	Hotel, Property and Estates	Scientific, Therapeutic and Technical Support	Clinical Support	Ambulance Service Support
		A	B	C	D	E
Senior Manager (see notes 1-6)	G0			<i>see note 9</i>	<i>see note 8</i>	<i>see note 7</i>
Manager (see notes 1-6)	G1			<i>see note 9</i>	<i>see note 8</i>	<i>see note 7</i>
Clerical and Administrative	G2	<i>see note 6</i>	<i>see note 6</i>	<i>see notes 6 & 9</i>	<i>see notes 6 & 8</i>	<i>see notes 6 & 7</i>
Maintenance and Works (see note 10)	G3	---		<i>see note 9</i>	<i>see note 8</i>	

Please see the next tab 'G matrix guidance' for a graphical representation of the guidance notes for NHS Management, Administrative and Clerical Staff

Notes for the administration and estates matrix

- This matrix is based on reporting structures and level of responsibility, not the payscale or number of staff reporting to the post. **Managers / Senior Managers** are those who have **overall responsibility** for budgets, staff or assets or who are held accountable for a **significant** area of work.
 - All managers / Senior Managers **who need** to be a qualified Doctor, qualified Nurse, qualified Therapist, qualified Scientist or trained Ambulance personnel should be included in their relevant area of work, only those **who do not need** to be a qualified Doctor, qualified Nurse, qualified Therapist, qualified Scientist or trained Ambulance personnel should be included in the administration and estates staff matrix (G). For example, a Medical Director should be coded to their specialty, with the relevant Job Role value within the Medical and Dental Staff Group.
 - Include as **Senior Managers** those staff at executive level (Chief Executive, Board members and CCG-Clinical Commissioning Committee Board (CCC Board) [Integrated Care Board \(ICB\)](#) members), **who do not need** to be clinically qualified (be it as a Nurse, Doctor, Scientist, Therapist or Ambulance Personnel etc.). For example, a Nursing Director who is a qualified Nurse should be coded as a Nurse, a Scientist should be recorded in the U-matrix (or the S-matrix if it is more relevant).
- Also include as **Senior Managers** those (non-clinical) managers who **report directly to the members of the executive team**, such as Assistant Directors.
- Include as **Senior Managers** only those senior staff who are directly employed on a contract with regular hours, **NOT** on an allowance / non-exec basis. Non-executive Directors and chairman should be coded Z2E.
 - Include as **Managers** those service and functional managers who report directly to senior managers as detailed in the definition above. For example an Assistant Director who reports to an Executive Director on the board should be included as a Senior Manager, but staff reporting to the Assistant Director should be included as Managers. This might include Service Managers for example, or a senior HR Manager. Consideration still needs to be given to the **level of responsibility** of the job.
 - More junior managers and supervisors should be included in the **clerical and administrative** category (G2*). For example, a Team Leader or Reception Supervisor would be included here. As with note 2 only those staff **who do not need** to be clinically qualified should be included here, those staff **who need** to be clinically qualified to undertake their role should be coded in their relevant clinical area.
 - Ambulance staff in central functions and hotel and property functions should be coded G*A or G*B. Only ambulance staff in **direct support of patient care staff** e.g. Non-Emergency Call Handlers, Non-Emergency Medical Dispatchers should be coded to G²E with the corresponding Job Role and appropriate Area of Work value. Emergency Call Handlers and Emergency Medical Dispatchers should be coded in the A matrix as A8E with the corresponding Job Role and Area of Work value of 'Emergency Control'.
 - Clinical Support** would include staff directly supporting patient care staff in a clinical area. For example a Medical Records Clerk or Medical Secretary would be included here, but a Ward Receptionist or Clerk who deal directly with patients would be included in the H2* matrix.
 - Staff directly supporting patient care staff (but with no direct patient contact themselves), working in both the **Scientific, Therapeutic & Technical (S**)** and **Healthcare Science (U**)** areas of work should be coded as G*C, depending upon their level of work.
 - Maintenance and Works (G3*)** would include both qualified craftspersons and maintenance support such as gardeners, upholsterers and caretakers. It would not include domestic and catering staff, who are included in the H2* matrix.
 - GP Practice staff should be coded to the appropriate level and area of work as staff working in secondary care, but should be identified by selecting 'GENGP' in the 'Position Workplace Organisation Code' field on ESR.
 - Please see Occupation Code Look-Up Guide at the end of this manual for an expanded list of Non-Medical Public Health Roles.

General definition

Patient care staff are those staff whose role within their job requires them to have a **significant** amount of patient contact, either directly or over the phone.

Definitions

Guidance

**Non-executives: Chair and non-executive directors. Paid on a non-executive / allowance basis not on a regular hours contract
Code as Z2E**

Chief executive, Finance Director and other executive directors who are voting members of the organisation.

Generally above Agenda for Change pay scale. Includes those on VSM payscales at ~~CCGs~~ ICBs, Special Health Authorities and Ambulance Trusts, and those on ESM pay scales in ALBs

Senior managers who directly report to the executive team - for example Assistant Director of Finance - who may deputise for more senior colleagues. **Do not** include other direct reports - such as Personal Assistants who do not have responsibility for a significant area of work / budget. Only include those who have overall responsibility for budgets, staff, assets or significant areas of work and directly report to the executive team.

Senior Managers
Code as G0*

Generally on AfC band 8 or above - most commonly 8d and above in larger organisations (such as acute trusts) and potentially from 8a in smaller organisations such as ~~CCGs~~ ICBs.

Those service and functional managers reporting directly to those non-board member senior managers who are responsible for a significant area of work / budget.

Managers
Code as G1*

Generally within the AfC band 8 range - typically 8c / 8d in larger organisations, 8a / 8b in smaller organisations. Band 7s should only be coded as G1* if they meet the exact criteria opposite otherwise code as G2*

Non-clinical administrative and clerical staff, more junior managers, supervisors and team leaders who do not have responsibility for a significant area of work / budget. This would include, for example line managers for whom management is only a portion of their role who may also act as analysts or in some other administrative / clerical capacity.

Clerical and Administrative Staff, Line Managers, Team Leaders, Supervisors and Analysts
Code as G2*

No true lower or upper limit on AfC bands, but typically band 7 and below. However, may also include people up to and including 8b and 8c, dependent on the size and function of the organisation and the role of the person.

Only those managers who **do not NEED** to be clinically qualified to hold their post should be included as managers within the administrative and clerical matrix. All managers who **NEED** to be clinically qualified should be coded in their clinical area - for example Nursing Directors within the Nursing matrix who need to be clinically qualified and registered.

HEALTH CARE ASSISTANTS AND OTHER SUPPORT STAFF

H		Adult and General	Children and Young People	Maternity	Mental Health	Learning disabilities	Community Services	Chiropody	Occupational therapy
		A	B	C	D	E	F	G	H
HCA	H1								
Support Worker	H2								

H		Physiotherapy	Radiography	Speech & language therapy	Pathology	Other Scientific, Therapeutic & Technical	Central functions	Hotel, property and estates
		J	K	L	M	N	P	R
HCA	H1		<i>see note 4</i>		<i>see note 4</i>	<i>see note 5</i>		
Support Worker	H2							

Notes for health care assistants and other support staff matrix

- Code as HCA those staff who are trained, or under training in the various competencies related to their job. This training might be through NVQ or other local HCA training. Support staff without formal NVQ or local HCA training should be coded as H2*.
- Support staff acting as unqualified nurses should be coded N9*. This would include those nursing support staff not undertaking vocational training as a HCA as indicated above. Staff acting as helpers or assistants to therapists, scientists and technical staff should be coded S9* or U9* depending upon the area of work within which they work or the specific staff who they support (see note 4).
- HCAs and support workers should be included in columns A to N if they are part of specific clinical teams, or working in a specific patient care area. HCAs and support workers who carry out duties crossing patient care areas should be coded to their prime area of work. Support workers who work entirely outside of patient care areas should be included in columns P or R for example Porters working as part of a central Porterage Service would be in column P and Cleaners working in a central Cleaning Team would be in column R.
- Those support staff who are actually working as the equivalent of Medical Laboratory Assistants (MLAs) / Assistant Technical Officers (ATOs) / Assistants to healthcare scientists should be coded in the relevant part of the U - Matrix (U9*), according to their specific area of work. Those supporting healthcare scientists in Life Sciences / Pathology should be coded in the relevant part of U9A-D. Those supporting healthcare scientists in the Radiographical areas of work should be coded as U9H. Those support staff directly assisting the patient care activities of other therapists, scientists and technical staff should be coded in the relevant area of S9* .
- As well as including HCAs and support staff who work in support of Other scientific, therapeutic & technical staff (but shouldn't be coded in any part of S9*) H*N should now include those in support of healthcare scientists who shouldn't be coded in any part of U9*, and have not been defined in notes 2 and 4.
- Include non clinical support staff who work in a patient care area and have contact with patients or their relatives, such as Ward Receptionist or Ward Clerk as H2*. Support staff who do not deal directly with patients, such as Medical Secretary or Medical Records Clerk, should be included in the G Matrix under 'Clinical Support'
- Closure of Occupation Codes 'H1S - HCA Ambulance Service' and 'H2S - Support Worker Ambulance Service'. There is no longer the need for the Ambulance Service column in the H matrix; staff previously coded here can be coded in either the A or G matrices.

See "**General definitions**" overleaf

HEALTH CARE ASSISTANTS AND OTHER SUPPORT STAFF

General definitions

Central functions include finance, personnel, information etc.

Patient care staff are those staff whose role within their job requires them to have a significant amount of patient contact.

Patient care area is an area normally available to patients or their relatives within a hospital, e.g. reception, wards etc.

The Following definitions are provided for Historical context as the names may still be used locally, particularly in the context of recruitment.

ATOs are Assistant Technical Officers and relates to pre-Agenda for Change Pay Scales. They would generally be scientific staff with less formal training, working mainly in a 'support' capacity, ranging between AfC 1 and 3, with more on the job training than formal training. This is more of an historic grade, but is still used in parts of the NHS.

MLAs are Medical Lab Assistants and relates to pre-Agenda for Change Pay Scales. Such roles are similar in scope and level to ATOs as described above, typically they are responsible for supporting biomedical scientists in the delivery of patient care. They may carry out a wide range of functions in pathology laboratories, including preparation of test media, making up and sterilising chemical solutions and separating blood serum and plasma.

Staff currently coded within systems such as ESR with the Job Role of Medical Laboratory Assistant should be recoded to the most relevant current Job Role - please refer to the latest NWD Specification Document for more detail.

MEDICAL AND DENTAL STAFF - HOSPITAL

M		Third character of occupation code

See general clarification regarding the coding of medical and dental staff included on pages 2 and 3 of the M matrix
For locums see notes 6 & 7

MEDICAL AND DENTAL STAFF - PUBLIC HEALTH AND COMMUNITY HEALTH SERVICE

M		Third character of occupation code									
		0	1	2	3	4	5	6	7	8	9
First two characters of occupation code	80	General Practice - See notes 10 & 8	---	---	---	---	---	---	---	---	---
	92	See note 30	General Medical Practitioner - See note 8	---	---	---	---	---	---	---	---
	93	Public Health Medicine see note 20 & 33	---	---	---	---	---	---	---	---	---
	97	See note 31	General Dental Practitioner - See note 8	---	---	---	---	See note 14	See note 14	See note 14	See note 14
	98	Public Health Dental see note 34	---	---	---	---	---	---	---	---	---
	99	---	---	---	---	---	---	See note 14	---	---	---

General Clarification:

If someone **needs** to be medically qualified to carry out their role and therefore **requires** GMC or GDC registration then they should be coded to their relevant Medical or Dental Specialty code as per their qualification and registration and **not** to an administrative or managerial occupation code.

For example, if a Medical Director has a Specialty of General Surgery they should be coded as 021 with an ESR Job Role of Medical Director

If the post holder changes, the Occupation Code attached to the position / post should be changed to reflect the Specialty of the post holder

If an individual is GMC Registered but is **not** licenced to practice they cannot have a Medical & Dental Occupation Code and should instead be given the most relevant alternative code to suite the post they are in.

Notes for the Medical and Dental staff matrix

- For Medical and Dental Staff "Occupation Codes" are commonly referred to as "Specialty Codes".
- For doctors working in hospital specialties other than those listed, or mentioned in the notes below, the category "other specialties" (code 099) should be used. This code should only be used as a last resort.
- For doctors working in Drug Dependency, the General (Internal) Medicine (001) code should be used.
- For a general physician "with a special interest" in another speciality, the code for the other speciality should normally be used, rather than General (Internal) Medicine (001).
- The codes for Public Health & The Community Health Service were simplified in 1995.
- Data on hospital, community and public health locums is extracted from the ESR by NHS Digital as part of the monthly workforce numbers process.
- Locums should be identified by replacing the first digit of the Occupation Code with a 1 for a Hospital Locum and a 2 for a Community and Public Health Locum. For example a Locum in General (Internal) Medicine would be coded as 101 and a Locum in Community Public Health Medicine would be coded as 230. Those organisations using ESR should also use the Assignment Category field to signify that the employee is a Locum.
- 8a. The codes 921 and 971 should be used to record details of staff employed as General Medical Practitioners (GPs) or General Dental Practitioners (high-street Dentists), who are not engaged via the usual contractual arrangements (where they would be self-employed). Instead they are directly employed by an NHS organisation and may, for example, be working in a hospital in a GP-led acute care unit or within a general practice (921) or general dental practice (971) setting. For those GPs working within a General Practice, if the trust uses ESR, such staff should be given a Position Workplace Organisation Code of 'GenGP' which denotes they are working in a GP practice and not at the trust itself, even if they are paid by the trust. For those Dentists working within a Dental Practice, if the trust uses ESR, such staff should be given a Position Workplace Organisation Code of 'GENDP' which denotes they are working in a Dental Practice and not at the trust itself, even if they are paid by the trust.
- 8b. Additionally, the Occupation Code 921 should be used for trainee GPs who are paid by a lead trust during their GP training within General Practice. For organisations using ESR such staff should be given a Position Workplace Organisation Code of 'GenGP' which denotes they are working in a GP practice and not at the trust itself. Trainee and qualified GPs can then be differentiated by their pay scale code.
- 8c. Trainee Hospital doctors undertaking a placement within a General Practice should be coded 800 for this placement whilst still being paid by the trust.
- 8d. Trainee GPs doing a rotation where their placement is at a hospital should be coded by the trust to the relevant Medical Specialty for the area within which they are working e.g. a GP trainee based in a Paediatrics ward is coded 002 for the period of their rotation into that team.
- 8e. The Occupation Code 971 should be used for trainee Dentists who are paid by a lead trust during their Dental training within a Dental Practice. For organisations using ESR such staff should be given a Position Workplace Organisation Code of 'GENDP' which denotes they are working in a Dental Practice and not at the trust itself. Trainee and qualified Dentists can then be differentiated by their pay scale code.
- All doctors previously coded 095 (Intensive Therapy) should now be coded 034 (Intensive Care Medicine).
- The code 800 should be used for doctors in training undertaking a placement in General Practice. GP trainees appointed to specific training programmes such as run-through training, and undertaking the secondary care portion of their training programme, should be coded to the relevant part of the Medical and Dental Hospital matrix in which they are working (e.g. Paediatrics, Accident & Emergency). Only Doctors in training should be coded as 800. General Medical Practitioners working General Practice should be coded as 921. (see more detail in note 8 above)
- To ensure Medical Specialty Codes within the NHS Occupation Code Manual match GDC approved main specialties the main speciality - 'Surgical Dentistry' [060] was retired, staff should have been coded under 'Oral Surgery' [066], since at least 2008.
- 041 opened for the new speciality of Community Sexual and Reproductive Health.
- 075 has been renamed from 'Medical Microbiology and Virology' to 'Medical Microbiology' and 078 has been reopened for the new separate speciality of 'Medical Virology', please recode staff accordingly.
- The Medical and General Staff codes, 976 - M&D Retainer Scheme; 977 - Medical Fees LA Services; 978 - GP Bed / Casualty fund; 979 - Payment to Clinical Member of Management Team; 996 - Medical Research Council, were inherited values which pre-dated the development of the current Occupation Code structure in the mid 1990s. The codes were not of national interest, were excluded from published data and have therefore been retired. Medical Research Council was retired as part of the NWD 3.4 uplift, the other four were retired in the NWD 3.3 uplift.

MEDICAL AND DENTAL STAFF - PUBLIC HEALTH AND COMMUNITY HEALTH SERVICE

Notes for the Medical and Dental staff matrix

15. Following further investigation the new code 035 has been opened for Doctors working in the new Acute Internal Medicine specialty and contrary to previous guidance they should **NOT** be included in with General (Internal) Medicine (001).
16. 085 renamed the specialty from 'Sports & Exercise Medicine' to 'Sport & Exercise Medicine' in line with the title of the approved specialty.
17. To ensure Medical Specialty Codes within the NHS Occupation Code Manual match GDC approved main specialties this main specialty has been retired. Staff should be recoded in the relevant new or updated Medical Specialty Occupation Codes
18. A number of codes have been amended to include 'and' instead of '&' in order to increase database compatibility with ESR and other systems
19. If an employee needs to be medically qualified to carry out their role and therefore requires GMC or GDC registration then they should be coded to their relevant Medical or Dental Specialty code as per their qualification and registration, and not to an administrative or managerial Occupation Code. For example a Medical Director should be coded to their Specialty. Organisations using ESR can also identify Medical Directors and Clinical Directors by selecting the relevant Job Role value within the Medical and Dental Staff Group. If the post holder changes, the Occupation Code attached to the position / post should be changed to reflect the Specialty of the post holder. If an individual is GMC Registered but is not licenced to practice they cannot have a Medical & Dental Occupation Code and should instead be given the most relevant alternative code to suite the post they are in.
20. To avoid confusion in coding, Doctors trained / training in Public Health Medicine should now be coded as 930 regardless of the setting in which they work. The historic requirement for two Public Health Medicine specialty codes no longer exists and therefore 090 has now been closed. Public Health Medicine Locums will now all be coded 230 and 190 has also been closed
21. Accident and Emergency (030) has been renamed Emergency Medicine (030) in line with the statutorily defined main specialty. The change will be reflected in the locum version, 130.
22. Doctors working in the area of Liver Care would come under the sub-speciality of Hepatology, which is a sub-speciality of Gastro-enterology.
23. Please refer to the 'Sub-speciality Parents' tab of the Sub Specialty annex of the Occupation Code Manual (<http://digital.rhs.uk/article/2268/NHS-Occupation-Codes>) to see the approved sub-specialities and their corresponding Main Specialty codes.
24. Audiovestibular Medicine has been renamed Audio Vestibular Medicine to match the legal name as defined in the Statutory Instrument which defines medical specialties: <http://www.legislation.gov.uk/ukksi/2012/344/made>
25. The code 092 - Blood Transfusion has been closed. Existing staff should be recoded using the existing code 073 - Haematology.
26. The code 013 - Clinical Physiology has been closed. Existing staff should be recoded using the most appropriate valid speciality code.
27. The code 079 - Clinical Cytogenetics and Molecular Genetics has been closed. Existing staff should be recoded using the most appropriate valid speciality code.
28. The code 049 - Paediatric Neurology has been closed. Existing staff should be recoded using the existing code 002 - Paediatrics speciality code of which Paediatric Neurology is a sub-speciality.
29. 037 opened for the new speciality of Aviation and Space Medicine.
30. The code 920 - Community Health Services Medical has been closed as this is not a genuine medical speciality. Existing records will need to be recoded to the most appropriate valid speciality code. Corresponding locum code (220) has also been closed.
31. The code 970 - Community Health Services Dental has been closed as this is not a genuine medical speciality. Existing records will need to be recoded to the most appropriate valid speciality code. Corresponding locum code (270) has also been closed.
32. The code 071 - General Pathology has been closed. Existing staff should be recoded using the most appropriate valid speciality code.
33. Occupation Code 930 is for Doctors trained / training in Public Health Medicine, and includes Public Health Consultants / Specialists who are registered with the GMC and have a Medical and Dental Pay Grade code. Those Public Health Consultants / Specialists who are registered as a Specialist on the UKPHR (UK Public Health Register) register, should be coded in the S matrix with Occupation Code SAX. Ensure the UKPHR registration is added to their record in ESR - select the 'Other' category and then input 'UKPHR' only, to avoid spelling inaccuracies.
34. Occupation Code 980 is for Public Health Dentists and Public Health Dental Consultants who are registered with the GDC and have a Medical and Dental Pay Grade code.

See notes and definitions on following pages

Details on the Nursing Register can be found on the Nursing and Midwifery Council (NMC) website: <https://www.nmc.org.uk/registration/staying-on-the-register/adding-qualifications/>

PLEASE NOTE: The matrix splits are intended to provide a consistent means by which the workforce is split for workforce planning and publication purposes, and not necessarily based on the specific registrations or qualifications that an individual may hold for their role. The matrix splits are there as a guide and are not intended to be rigid in their application. Please see the Occupation Code Lookup guide at the end of the manual for further information on these splits.

PLEASE NOTE: The matrix split is intended to provide a consistent means by which the workforce is split for workforce planning and publication purposes. The top part of the matrix is only for recording individuals whose role requires they are an NMC registered Nurse; Midwife or Health Visitor. The lower part of the matrix is for recording Nursing Associates and individuals who provide support to registered Nurses; Midwives or Health Visitors.

NURSING MIDWIFERY AND HEALTH VISITING STAFF

Notes for the main nursing and midwifery and health visiting staff matrix

1. Managers are those who have overall responsibility for budgets, manpower or assets or who are held accountable for a significant area of work and who have little or no clinical contact.
2. All managers who **need** to be a qualified nurse, midwife or health visitor should be included in the nursing, midwifery and health visiting staff matrix.
3. All managers who **do not** need to be a qualified nurse, midwife or health visitor should be included in the administration and estates staff matrix (G).
4. The term Children's Nurse applies to nurses on parts RN8, RNC or SPC of the NMC register. Please note that the title has been updated to reflect changes to the registered titles for Nurses as per the NMC Register.
5. All codes for education are only to be used for staff and not for learners.
6. Only CMHNS, as defined in the general definitions on the following pages, should be coded N4D and N5D.
7. Only CLDNs, as defined in the general definitions on the following pages should be coded N4F and N5F.
8. Only District nurses, as defined in the general definitions on the following pages, should be coded N4H and N5H.
9. Code N2J is only to be used for midwives teaching midwifery.
10. Special Care Baby Unit (SCBU) staff should no longer be coded to maternity services, but should be included in with the new Neonatal Nursing area (N*L) irrespective of lines of management accountability (See note 24).
11. Family planning should be included in community services.
12. Stoma care, control of infection, blood transfusion, occupational health, staff nursery and non- clinical management should be coded to acute, elderly and general.
13. Health care assistants should be coded in the HCAs and other support staff matrix (H).
14. GP Practice Nurses should be coded to N*H (Community Services), at the level appropriate to their grade, but should be identified by selecting 'GENGP' in the 'Position Workplace Organisation Code' field on ESR.
15. Nurses working on NHS 111 'phone lines should be coded at the level relevant to their grade within N*H (Community Services). ~~and highlighted as working for NHS 111 by selecting the relevant value in the 'Assignment Organisation Type' field on ESR. Please note that this is a change to previous guidance, but which seems sensible as it is a more relevant area of work for such staff.~~ [The Area of Work 'NHS 111' should be used for these staff.](#)
16. Qualified School Nurse: Only Registered nurses with a specific School Nursing qualification should be coded as NBK, other nurses working in School Nursing but who do not hold a specific qualification should be coded at the level relevant to their grade within N*K (School Nursing).
17. NC* opened for Modern Matrons, NCH should be used to code Modern Matrons Working in the Community setting. Include only those nurses who are working specifically as Modern Matrons in their specific area of work - it should not be used to record 'Community Matrons' - please see note 20 and 'General Definitions' overleaf.

Continued overleaf

Notes for the main nursing and midwifery and health visiting staff matrix

18. Emergency Care Practitioners whose background is as a qualified nurse should be coded as N*A depending upon their level of experience (for most intents and purposes, this would put them in N6A).
19. Please see the Lookup Guide for coding suggestions for the new roles within mental health, some of which may be fulfilled by registered nurses.
20. NEH opened for Community Matrons. 'Community Matrons' should be returned as this code. Modern Matrons in the Community should be returned as NCH - see note 17 and 'General Definitions' overleaf.
21. N1B is primarily used for Children's Nurses working in Acute settings. However, in addition please code Community Children's Nurses (CCNs), also known as Paediatric Community Nurses / Specialist Practitioner Community Paediatric Nurses, as N1B. Such Nurses should also be identified within ESR by using the Job Role / Area of Work combination of: Job Role: Community Practitioner / Area of Work: Paediatric Community Child Health.
22. NF* has been opened to accommodate staff who are employed as Assistant Practitioners in Nursing. They are / have undertaken training to an agreed level against a Competence Frame Work (as well as NVQ3 level training according to Agenda for Change), it is not necessarily a nationally recognised qualification (a degree, BTEC or the like), but it will be sufficient to allow them a degree of autonomy. As such Assistant Practitioners should have intermediate qualifications and level of autonomy, putting them between Nursing Assistants (N9*) to one extreme and Nursing Associates (NG*) / Registered Nurses (N6*) to the other. Though this particular role may not be directly relevant in all areas of work at present, it will continue to expand, and this position within the matrix may better suit other similar staff who have previously been coded elsewhere.
23. An Assistant Practitioner in nursing delivers health and social care to patients with a level of knowledge and skill beyond that of the traditional Nursing Assistant, Auxiliary or Healthcare Assistant. Assistant Practitioners cannot be counted as Registered Nurses. They are not legally defined as a staff group. They have formal education which is required for them to be able to do their job - this can be work based or college based or both. The qualifications may or may not be transferable for use at other organisations. As Assistant Practitioners do not have nationally defined training and scope of practice, with linked regulation status from the NMC, they are distinct from the new Nursing Associates, to which those things do apply.
24. Please note - those staff formerly coded as N*C working in Specialist Neonatal Roles (NICU) or in Special Care Baby Units (SCBUs) should now be coded at the relevant level in the newly created Neonatal Nursing (including SCBUs) column - N*L.
25. Some staff who hold midwife registration may be working for some of their time in a neonatal unit in a non-midwifery role, if they are also working as a midwife they should be coded to N2C as their primary role.
26. For reference, details on the Nursing Register can be found on the Nursing and Midwifery Council (NMC) website here: <http://www.nmc-uk.org/Registration/Useful-information/Registration-qualifications/>
27. N8L has been opened to identify Nursery Nurses working within Neonatal Nursing, and the movement of Nursery Nurses working in Special Care Baby Units from their former position in N8C (Maternity Services) to N8L Nursery Nurse in Neonatal Nursing (including SCBUs).
28. Please ensure to code the following as Health Visitors:
- qualified nurses/midwives who also hold a qualification as a Registered Health Visitor under the Specialist Community Public Health Nursing part of the NMC Register working directly with children and families;
 - qualified and registered Health Visitors who perform specific activities such as providing breastfeeding advice to parents;
 - family nurses working within the Family Nurse Partnership Programme who are qualified and registered as Health Visitors;
 - Sure Start Children's Centre qualified and registered named Health Visitors;
 - managers within a Health visiting team who hold a health visiting qualification and registration and are involved in clinical work or safeguarding.
- See also 'General Definitions' overleaf.
29. Please ensure that the following employees are **not** coded as Health Visitors:
- any person working in a health visiting team who does not hold a qualification and registration as a Health Visitor;
 - any person who holds a qualification and registration as a Health Visitor but is not employed in a role where this is a requirement;
 - managers within a health visiting team who hold health visiting qualification and registration but are not involved in clinical work or safeguarding.
30. Newly qualified staff and overseas nurses waiting for their NMC PIN numbers should be coded as N9* Nursing Assistants and moved onto the correct qualified nursing Occupation Code when the number is received.
31. Closure of codes N7J and N9J - Following improvements to the guidance notes with regards to the Nursing workforce an issue with the earlier inclusion of Nurse Education staff at two inappropriate levels has been brought to light. Following further investigation these codes should never have been available within the Education Staff area of work, and have now been removed. There are very limited numbers of staff who have been coded to N7J and N9J and staff should be recoded to a suitable occupation code within the matrix
32. Updated Occupation Code name to reflect changes to the registered titles for Nurses as per the NMC Register. This work will be built upon with more changes in a future version of the Occupation Code Manual to bring all of the values up to date

Notes for the main nursing and midwifery and health visiting staff matrix

33. **Nursery Nurse** - undertakes tasks delegated by a registered practitioner supporting the care of young children and babies. Nursery nurses have qualifications in childcare or early years including:

- CACHE Level 3 Diploma in Child Care and Education
- BTEC National Diploma in Children's Care, Learning and Development
- NVQ Level 3 in Children's Care, Learning and Development
- NNEB
- Children's Care Play, Learning and Development (CCPLD), level 3 wef September 2019

As Mental Health and Learning Disabilities are increasingly delivered in the Community, it is important to have Nursery Nurses in these settings to support the care of young children and babies.

34. **Nursing Assistant Practitioner** - assistant practitioner is expected to independently manage their own work and case load, undertake tasks delegated by a registered practitioner with appropriate supervision, within agreed protocols. Assistant Practitioners will have health related qualifications at Level 4 or above. **Nursing Assistant Practitioner in Education** will support the Nursing education for Trainee Nursing Associates and Healthcare Assistants within agreed protocols. Assistant Practitioners will have health related qualifications at Level 4 or above.

35. **Nursing Associate** - Nursing Associate is a new role being introduced into the health and care workforce in England from January 2019. It is a generic role (not defined by a field of nursing) but within the discipline of nursing. Nursing Associates are intended to bridge a gap between health and care assistants, and registered nurses.

They are not nurses; nursing is a graduate entry profession and those joining the nursing part of the NMC register require a degree. Nurses also develop additional skills and knowledge within a specific field of nursing.

Nursing Associates are a new profession, accountable for their practice. These proficiencies set out what pre-registration training will equip Nursing Associates to know, and do. Once they are practising, Nursing Associates can undertake further education and training and demonstrate additional knowledge and skills, enhancing their competence as other registered professionals routinely do. The roles played by Nursing Associates will vary from setting to setting, depending on local clinical frameworks, and it may also be shaped by national guidance.

Nursing Associates are regulated by the NMC, having the Sub-Part entry of **Nursing Associate (NAR)** - 'NAR Registered Nursing Associate' on the NMC Register. Only those staff who hold the relevant qualification and registration to the correct sub-part of the NMC register should be coded as Nursing Associates. Please note, they have a registration of Registered Nursing Associate, they are not Registered Nurses. Only those staff who hold the relevant qualification and registration to the correct sub-part of the NMC register should be coded as Nursing Associates.

The Care Setting for Nursing Associates should be determined by the primary area in which they are working.

36. These occupation Codes should be used in association with their linked Job Roles:

- For Nursing Associates use the Staff Group | Job Role value of: Additional Clinical Services | Nursing Associate
- For Trainee Nursing Associates use the Staff Group | Job Role value of: Additional Clinical Services | Trainee Nursing Associate

37. **Trainee Nursing Associate** - Trainee Nursing Associates are those staff who are undertaking the two year training programme to qualify as a Nursing Associate, this includes those Nursing Associates undertaking their training through the apprentice route. Only those staff undertaking an approved and accredited Nursing Associate training course should be coded using these codes. The Care Setting for Trainee Nursing Associates should be determined by their main placement and not updated in response to short-term rotations in other settings.

38. Trainee Nursing Associates and Nursing Associates are only applicable in England - this new role has not been introduced in Wales.

39. Nursing Associates are a new role, with nationally defined training and scope of practice linked to regulated status with the NMC. This new role is distinct from existing Assistant Practitioners within the area of nursing. In addition, Assistant Practitioners are not regulated roles, and should not be substituted or mistaken for Nursing Associates or vice versa.

40. This Occupation Code includes Registered Nurses working in NHS 111 contact centres who are providing NHS 111 clinical services over the telephone. The Area of Work 'NHS 111' should be used for these staff.

41. Closure of Occupation Code N1A - This Occupation Code has been closed as a Children's Nurse would not be working in the 'Adult and General' care setting. The appropriate Occupation Code should be used along with the Area of Work value which will identify the area in which a Children's Nurse is working, e.g. Accident and Emergency.

42. N9C includes **Maternity Support Workers** who should be coded using the Maternity Support Worker Job Role within the Additional Clinical Services Staff Group. Maternity Support Workers are individuals who meet the HEE MSW competency education and career development framework at education and competency level 3 or 4.

43. **Multidisciplinary Team Roles** - The general rule is that we code the post and not the person; however, there are some exceptions to the coding rule, for example, when a post can be filled by individuals from multiple professional backgrounds. In which case the Occupation Code, Staff Group and Job Role will be determined by the professional registration of the recruited individual.

NURSING, MIDWIFERY AND HEALTH VISITING STAFF

Nursing, Midwifery and Health Visiting Staff - General definitions

Nurse Consultants: Those staff who are specifically appointed as such. They are experts within their area of clinical practice; provide professional leadership; work towards research and provide a function for education and professional development within their specialist clinical area. They work (unlike managers) directly with patients, clients or communities for at least 50% of their time. Typically Agenda for Change Band 8a and above.

Modern Matron: A senior nurse with high level competencies and extensive clinical, leadership and management experience who has clinical and professional authority and responsibility for standards of professional practice and patient services in one or more service delivery areas. Typically Agenda for Change Band 8a.

Community Matron: An experienced clinical nurse with high level competencies and specialist knowledge and skills in the care and management of long term conditions who works as a case manager across health and social care boundaries co-ordinating the treatment, care and management for individuals, groups or communities with complex conditions and high intensity needs. They are distinct from district or practice nurses who may well be involved in the management of patients with long term conditions but don't act as case managers or fulfil the full role of community matrons as defined.

The difference between a modern matron in the community and a community matron. Despite very similar names these have two very different roles which can be broadly defined as - Modern Matrons manage staff who work within the community while Community Matrons deal with patients within a community setting.

Manager: A nurse, midwife, or health visitor who has overall responsibility for budgets, manpower or assets or who is held accountable for a significant area of work and who has little or no direct clinical involvement; the post occupied would require the person to hold a statutory nursing, midwifery or health visiting qualification. Typically Agenda for Change Band 8 and above.

Children's Nurse: An employee who holds the **Registered Children's Nursing Certificate under Level 1 Nurses Sub-part 1 of the Nursing and Midwifery Council Register (NMC)** and who occupies a post where such a qualification is a requirement. Not below Agenda for Change Band 5.

Registered Midwife: An employee who holds a qualification as a Registered Midwife and who occupies a post where such a qualification is a requirement. Not below Agenda for Change Band 5 and usually Band 6 or above.

Health Visitor: An employee who holds a qualification as a **Registered Health Visitor under the Specialist Community Public Health Nursing part of the NMC Register** and who occupies a post where such a qualification is a requirement. Not below Agenda for Change Band 6.

District Nurse 1st Level: An employee who has attained the necessary NMC Specialist Practice Standard or who holds a first level nursing registration and also the **District Nurse Specialist Practitioner qualification**; and who occupies a post for which the Specialist Practice Standard or **District Nurse Specialist Practitioner qualification** is a requirement. Not below Agenda for Change Band 6.

District Nurse 2nd Level: An employee who has attained the necessary NMC Specialist Practice Standard or who holds a second level nursing registration and also the District Enrolled Nurse Certificate; and who occupies a post for which the Specialist Practice Standard or District Enrolled Nurse Certificate is a requirement. **There are likely to be very few 2nd Level nurses within an organisation, as most nurses now hold a 1st level qualification.**

Qualified School Nurse: Qualified school nurses hold the **School Nurse qualification under the Specialist Community Public Health Nursing part of the NMC register**

Community Mental Health nurse (CMHN)/Community learning disabilities nurse (CLDN): An employee who has a specific recordable community qualification in community psychiatry or community learning disabilities (i.e. specialist practitioner: Community Mental health nursing (SCMH) or specialist practitioner: Community learning disabilities nursing (SCLD) aspects of the NMC register) and who occupies a post for which this qualification is a requirement.

Other 1st Level (Level 1 - Sub Part 1): First level nurses are registered nurses who hold a current and valid registration with the NMC **under Level 1 Nurses Sub-part 1 of the register**, but do not fulfil the criteria outlined in notes 1 to 10. Code according to their general area of work. Not below Agenda for Change Band 5.

Other 2nd Level (Level 2 - Sub Part 2): Also referred to as 'enrolled' nurses, 2nd level nurse training is no longer provided. **They are registered with the NMC under Level 2 Nurses Sub-part 2 of the register.** There are likely to be few 2nd Level nurses within an organisation, as most nurses now hold a 1st level qualification. Second Level nurses can undertake a conversion course to become 1st Level nurses. More information about nurse registration and conversion courses is available on the NHS Careers website.

Nursing Assistant Practitioner: An assistant practitioner in nursing is a worker who competently delivers health and/or social care to and for people. They have a required level of knowledge and skill beyond that of the traditional healthcare assistant or nursing assistant / auxiliary. The assistant practitioner would be able to deliver elements of health and social care and undertake clinical work in domains that have previously only been within the remit of registered professionals.

Nursery Nurse: An employee who is employed as a nursery nurse and hold, or working towards, a relevant child care qualification including CACHE Level 3 Diploma in Child Care and Education, BTEC National Diploma in Children's Care, Learning and Development, NVQ Level 3 in Children's Care, Learning and Development. Information on relevant qualifications can be found on the Department of Education website: <https://www.education.gov.uk/eypqd/qualification-search.aspx>

Nursing Assistant/Auxiliary: Employees who are not required to hold any of the qualifications specified above who form part of the nursing workforce. This group also includes Cadet Nurses, who would not be accurately recorded as Pre-Registration Learners.

NURSING, MIDWIFERY AND HEALTH VISITING STAFF

Nursing, Midwifery and Health Visiting Staff - General definitions

Nursing Associate: A Nursing Associate is a new member of the nursing team who will provide care and support for patients and service users. This role is being used and regulated in England and it's intended to address a skills gap between Health and Care Assistants and Registered Nurses.

Nursing Associate is a stand-alone role in its own right and will also provide a progression route into graduate level nursing.

Nursing Associates will be trained to work with people of all ages and in a variety of settings in health and social care. It's intended that the role will enable Registered Nurses to focus on more complex clinical duties.

Nursing Associates are regulated by the NMC, having the Sub-Part entry of **Nursing Associate (NAR)** - 'NAR Registered Nursing Associate' on the NMC Register. Only those staff who hold the relevant qualification and registration to the correct sub-part of the NMC register should be coded as Nursing Associates. Please note, they have a registration of Registered Nursing Associate, they are not Registered Nurses. Only those staff who hold the relevant qualification and registration to the correct sub-part of the NMC register should be coded as Nursing Associates. Typically Agenda for Change Band 4.

Nursing Associates are a new role, with nationally defined training and scope of practice linked to regulated status with the NMC. This new role is distinct from existing Assistant Practitioners within the area of nursing. In addition, Assistant Practitioners are not regulated roles, and should not be substituted or mistaken for Nursing Associates or vice versa.

Trainee Nursing Associate: Trainee Nursing Associates are those staff who are undertaking the two year training programme to qualify as a Nursing Associate, this includes those Nursing Associates undertaking their training through the apprentice route. Only those staff undertaking an approved and accredited Nursing Associate training course should be coded using these codes. The Care Setting for Trainee Nursing Associates should be determined by their main placement and not updated in response to short-term rotations in other settings. Typically Agenda for Change Band 2/3.

Trainee Nursing Associates and **Nursing Associates** are only applicable in England - this new role has not been introduced in Wales.

NURSING, MIDWIFERY AND HEALTH VISITING LEARNERS

P	Midwifery	Health Visiting	District Nursing	Diploma Nurse Training	Other Learners
	A	B	C	D	E

PLEASE NOTE: The matrix splits are intended to provide a consistent means by which the workforce is split for workforce planning and publication purposes, and not necessarily based on the specific registrations or qualifications that an individual may hold for their role. The matrix splits are there as a guide and are not intended to be rigid in their application. Please see the Analysis Guide towards the end of the manual for further information on these splits.

Registered Nursing Learners

Post 1 st Level Registration Learner	P2					
Post 2 nd Level Registration Learner	P3		---			

PLEASE NOTE: To better coordinate the split of registered and support codes as in the other matrices the P Code matrix has been re-ordered, so that the registered codes are now at the top of the matrix. This is a display change only and has no material change on the codes or their meaning.

Un- Registered Nursing Learners

Pre-Registration Learner	P1		---	---		
--------------------------	----	--	-----	-----	--	--

The matrix split is intended to provide a consistent means by which the workforce is split for workforce planning and publication purposes. The top part of the matrix is only for recording Nurse Learners whose role requires they are an NMC registered Nurse; Midwife or Health Visitor. The lower part of the matrix is for recording Pre-Registration Nurse Learners

Notes for the nursing, midwifery and health visiting learners matrix

- For reference details on the Nursing Register can be found on the Nursing and Midwifery Council (NMC) website here: <http://www.nmc-uk.org/Registration/Useful-information/Registration-qualifications/>
- Learners' third character A is only to be used for learners undertaking a course leading to registration on the midwives part of the NMC Register (RM).
- Learners' third character B is only to be used for learners undertaking a course leading to registration on the relevant part of the specialist community public health nursing part of NMC Register (RHV / HV).
- Learners' third character C is only to be used for learners undertaking a course leading to a qualification as a 1st level district nurse.
- Learners' third character D is only to be used for learners undertaking Diploma Nurse Training or a branch leading to registration on the nurses part of the NMC register sub part 1 (RN1, RNA, RN3, RNMH, RN5, RMLD, RN8, RNC).
- Learners' third character E is only to be used for learners undertaking courses leading to registration on all other aspects of the NMC Register.
- Following the changes resulting from the NHS Digital consultation on its workforce publications the post-registration learners have been moved into the qualified element of the publication groupings and are no longer included in the support staff grouping along with the pre-registration learners. This change has been reflected in the Analysis Guide included at the end of this manual. To better coordinate the split of registered and support codes as in the other matrices the P Code matrix has been re-ordered, so that the registered codes are now at the top of the matrix. This is a display change only and has no material change on the codes or their meaning. More detail on the outcome of the consultation is available here: <http://digital.nhs.uk/hchs>

Any other learners (e.g. those undertaking post registration continuing registration courses) should not be coded as learners but to their prime area of work in the main nursing matrix.

General Definitions

Pre-registration learners: Student nurses or midwives who hold no registerable nursing qualification.

Post 1st level registration learners: Student nurses, midwives or health visitors who already hold a first level nursing registration

Post 2nd level registration learners: Student nurses or midwives who already hold a second level nursing registration but do not hold a first level registration.

The matrix splits are there as a guide and are not intended to be rigid in their application. Please see the Occupation Code Lookup guide at the end of the manual for further information on these splits.

SCIENTIFIC, THERAPEUTIC AND TECHNICAL STAFF

Notes for the scientific, therapeutic and technical staff matrix

1. Managers are those who have overall responsibility for budgets, manpower or assets or who are held accountable for a significant area of work and who have little or no clinical contact.
2. All managers who **need** to be a qualified therapist should be included in the scientific, therapeutic and technical staff matrix.
3. All managers who **do not need** to be a qualified therapist should be included in the administration and estates staff matrix (G).
4. Code S7F includes ~~all radiography tutors~~ [should be used for Radiography \(diagnostic\) tutors; Occupation Code S7G has been opened for Radiography \(therapeutic\) tutors - see note 60.](#)
5. Health Care Assistants should be coded in the HCAs and other support staff matrix (H).
6. Code assistant psychologists as S5L - Staff previously coded as S3L should now be coded as S5L.
7. Code pre-registration trainee pharmacists as S3P Pharmacists - [MPharm Graduates who are working towards GPhC registration].
8. S4C has now been opened for Occupational Therapy Technicians - please note this should only include those staff who provide technician support for existing equipment. Those who develop new equipment or modify existing equipment should be coded as U4J - Practitioner in Clinical Engineering with the Area of Work of Rehabilitation Engineering.
9. S6J has now been opened for Instructor / Teachers working within Speech and Language Therapy.
10. S6E has now been opened for physiotherapy instructors/teachers.
11. GP Practice staff should be coded to the appropriate level and area of work as staff working in secondary care, but should be identified by selecting 'GENGP' in the 'Position Workplace Organisation Code' field on ESR.
12. Allied Health Professional (AHP) Consultants (Consultant Therapists / Scientists) are those staff who are specifically appointed as such. They are expert within their area of advanced clinical practice and leadership; and they research and provide a focus for education and professional development within a given clinical area. Public Health Dental Consultants who are GDC registered with a Medical and Dental Pay Grade code should be coded within the M Matrix with the Occupation Code 980.
13. Former Local Authority social care staff who may be employed by NHS Organisations, Care Trusts, Community Trusts etc. These are staff who need to be (or work directly with) qualified social services staff to do their jobs within the organisation. For example social or youth workers, day-care advisers, child protection officers, family placement officers, rehabilitation staff, or disability service workers. (Note that this list is not exhaustive). Includes non registered, patient facing Public Health support staff.
14. S5* has now been opened to accommodate staff who are employed as Assistant Practitioners. They are / have undertaken training to an agreed level against a Competence Frame Work (as well as NVQ3 level training according to Agenda for Change), it is not necessarily a nationally recognised qualification (a degree, BTEC or the like), but it will be sufficient to allow them a degree of autonomy. As such Assistant Practitioners should have intermediate qualifications and level of autonomy, putting them between Assistants (S9*) to one extreme and Therapists (S1*) to the other. Some of their remit will involve them in delivering protocol-based clinical care that had previously been in the remit of registered professionals, under the direction and supervision of a state registered practitioner. Though this particular role may not be directly relevant in all areas of work at present, it will be continuing to expand, and this position within the matrix may better suit other similar staff who have previously been coded elsewhere. Includes non GDC registered Public Health Assistant Practitioners working in dental roles.
15. An Assistant Practitioner delivers health and social care to patients with a level of knowledge and skill beyond that of the traditional healthcare assistant or support worker. Assistant Practitioners cannot be counted legally as qualified AHPs. They are not legally defined as a staff group. They have formal education which is required for them to be able to do their job - this can be work based or college based or both. The qualifications may or may not be transferable for use at other organisations. Includes non GDC registered Public Health Assistant Practitioners working in dental roles.
16. S4F has now been closed, staff formerly coded here should now be coded as U4H.
17. S*N, S*Q and S*S have been removed from the matrix as they have been closed for a number of years. Any staff formerly coded there are now coded within the relevant part of the 'U' Matrix.
18. Because of the introduction of the U Matrix, some staff formerly coded as S*X (Other S,T & T), and elsewhere within the 'S' matrix may now be more accurately coded to the relevant level and area of work within the U matrix.
19. Please note that the names down the left hand side of the matrix, associated with the codes, do not necessarily apply to all code combinations. It is important that the codes are used so that the level of work (second character) denotes the level of qualification or experience required to fulfil the role of the post.
20. Advanced Practitioners should continue to be coded in the relevant area of work as S1*, as this is the best fit available at present. Within [In](#) ESR they should have the Job Role 'Advanced Practitioner' within either the Allied Health Professional or the Additional Professional Scientific & Technical Staff Group, [or the specific 'Advanced Practitioner' Job Role within the Allied Health Professionals Staff Group.](#) depending upon which group they work in, with more detail provided via the Area of Work which they are associated with. However, S1L and S1M should only be used for Applied Psychologists and High Intensity Therapists working in NHS Talking Therapies for anxiety and depression (formerly known as IAPT) services.

SCIENTIFIC, THERAPEUTIC AND TECHNICAL STAFF

Notes for the scientific, therapeutic and technical staff matrix - Continued

21. Emergency Care Practitioners - If they neither have a background in Nursing or the Ambulance workforce and don't hold a relevant paramedic qualification, then they should be coded S*X, where the level is dependant upon their level of qualification (S1X may be a suitable level of qualification). It is worth bearing in mind that staff coded S** are not limited to AHPs, it is in fact a very diverse group.

22. Code S1M has been opened for High Intensity Therapists in Psychological Therapy in response to the NHS Talking Therapies for anxiety and depression (formerly known as IAPT) Programme. It is to be used for those staff working at this level and in that area only and should be combined with the correct Job Role and Area of Work values. Psychological Wellbeing Practitioners working with NHS Talking Therapies for anxiety and depression (formerly known as IAPT) services should be coded as S5M, and not as S1M as previously advised. The correct Area of Work and Job Role values should also be used. Both Trainee NHS Talking Therapies for anxiety and depression (formerly known as IAPT) High Intensity Therapists and Trainee Psychological Wellbeing Practitioners should be coded as S8M. The correct Area of Work and Job Role values should also be used.

As the first tranche of the re-development of the Occupation Code definitions and guidance (along with the updated note 7 on the previous page) the following are a series of definitions intended to help with the coding of Pharmacy staff:

23. SAP – Consultant Pharmacists – [Registered Pharmacists working in Consultant Pharmacist Posts] – ~~Note: these posts are normally approved by the Strategic Health Authorities.~~

24. S0P – Chief Pharmacists – [Registered Pharmacists who are Departmental/Service Heads for Acute, Mental Health or Primary Care Trusts and includes “Heads of Medicine Management” who are normally employed within PCTs].

25. S2P – Pharmacists (trained) – [Registered Pharmacists – Note: Consultant and Chief Pharmacists are separately coded].

26. S4P – Pharmacy Technicians (trained)- [Qualified to NVQ3; these post holders will be required to be registered with GPhC from mid 2011].

27. S5P – Assistant Practitioner Pharmacy Technicians - now closed - this is not a valid job role. Any existing staff coded as S5P should in fact be coded S4P (Pharmacy Technician) in accordance with the existing guidance notes.

28. S8P – Pharmacy Technicians (Trainee) – [Trainee Pharmacy Technicians who are working towards qualification at NVQ3, and GPhC registration].

29. S9P – Pharmacy Assistants – [Assistants should be qualified, or working towards it, at NVQ2 level].

Notes 30 and 31 are additional notes for the coding of the Pharmacy workforce:

30. Both S4P - Pharmacy Technicians (trained) and S2P – Pharmacists (trained) can have managerial responsibility, however that would not mean they would sit within the S0P codes, but remain within the codes relevant to their occupation.

31. Pharmacy Apprentices should be coded to either S8P or S9P dependant on their level, though the majority would fall within S8P.

32. Check for Health and Care Professions Council (HCPC) registration when using this Occupation Code as qualified staff should be registered with the HCPC. More information on protected titles and the HCPC are available from here: <https://www.hcpc-uk.org/about-us/who-we-regulate/the-professions/> and here: <https://www.hcpc-uk.org/check-the-register/>

33. The following groups of Dental Care Professionals (DCP) need to be registered with the General Dental Council (GDC) : Clinical Dental Technician, Dental Hygienist, Dental Nurse, Dental Technician, Dental Therapist, Orthodontic Therapist, Dental Tutor. See <https://olr.gdc-uk.org/SearchRegister> for further details. Includes Public Health Dental Care Professionals registered with the GDC.

34. Newly qualified staff waiting for their HCPC Registration numbers should be coded as S9* ~~Helper~~/Assistants and moved onto the correct qualified occupation code when registration is received

35. Code Dental Nurse as S4R - due to the up-skilling of this role, the previous advice to use S9R is no longer relevant. Includes Public Health Dental Nurses.

36. S8H is opened for coding of 'Art, Music & Drama Student'.

37. S9D allows the accurate coding of staff such as Retinal Screening Assistants (AfC Band 2) in Diabetic Eye Screening Services, amongst other things.

38. Optometrists and Dispensing Opticians must be registered with the General Optical Council - <https://www.optical.org/>

39. S*L 'Clinical Psychology' column has been renamed 'Applied Psychology' as this wider description better reflects the intended group of staff to be captured, this includes Clinical Psychology and other branches of Applied Psychology.

40. S*M 'Psychotherapy' column has been renamed 'Psychological Therapy' as this wider description better reflects the intended group of staff to be captured, this includes Psychotherapists and other Psychological Therapists.

SCIENTIFIC, THERAPEUTIC AND TECHNICAL STAFF

Notes for the scientific, therapeutic and technical staff matrix - Continued

41. S1L has been opened for Applied Psychologists working within NHS Talking Therapies for anxiety and depression (formerly known as IAPT) services only. The correct Area of Work and Job Role values should also be used and it should not be used for Applied Psychologists who do not form part of an NHS Talking Therapies for anxiety and depression (formerly known as IAPT) team.

42. Code S4L has been closed, Assistant Psychologists should be coded as S5L. The correct Area of Work and Job Role values should also be used.

43. Psychological Wellbeing Practitioners working with NHS Talking Therapies for anxiety and depression (formerly known as IAPT) services should be coded as S5M, and not as S1M as previously advised. The correct Area of Work and Job Role values should also be used.

44. Student / Trainee Applied Psychologists should be coded S8L. The correct Area of Work and Job Role values should also be used.

45. Both Trainee NHS Talking Therapies for anxiety and depression (formerly known as IAPT) High Intensity Therapists and Trainee Psychological Wellbeing Practitioners should be coded as S8M. The correct Area of Work and Job Role values should also be used.

46. The S2 'Scientist' row should be used for the relevant Applied Psychology and Psychological Therapy staff who would more accurately be described as Therapists, but are not part of an NHS Talking Therapies for anxiety and depression (formerly known as IAPT) service and therefore cannot be coded using either of the values reserved specifically for NHS Talking Therapies for anxiety and depression (formerly known as IAPT) staff (S1L and S1M respectively). The correct Area of Work and Job Role values should also be used. However, Occupation Code S2M should be used for Counsellors and Psychotherapists working in NHS Talking Therapies for anxiety and depression (formerly known as IAPT) services who have not completed NHS Talking Therapies for anxiety and depression (formerly known as IAPT) approved training and so do not fall into the four NHS Talking Therapies for anxiety and depression (formerly known as IAPT) specific Job-Roles (High Intensity Therapist, Trainee High Intensity Therapist, Psychological Wellbeing Practitioner or Trainee Psychological Wellbeing Practitioner). The Area of Work value of 'Mental Health Primary Care – NHS Talking Therapies' must be used for these staff to ensure they are included in the NHS Talking Therapies for anxiety and depression (formerly known as IAPT) workforce.

47. S*1 'Prosthetics and Orthotics' - new column has been added to capture information on staff working in Prosthetics and Orthotics.

48. Psychological Therapist Definition - required standards:

1. To have completed one year of recognised full-time (or equivalent part-time) psychological therapy or counselling training leading to a qualification, certification or accreditation recognised by a relevant professional or regulatory body (listed below).

Professional bodies:

Association for Cognitive Analytic Therapy
British Association for Behavioural and Cognitive Psychotherapies
British Association for Counselling and Psychotherapy
British Psychoanalytical Council
British Psychological Society
British Society of Couple Psychotherapists and Counsellors
Royal College of Psychiatrists
United Kingdom Council for Psychotherapy

Regulatory bodies:

Health and Care Professions Council – which is responsible for regulating art, music and drama therapists, and clinical and counselling psychologists
General Medical Council
Nursing and Midwifery Council

2. To have achieved a competency level that fulfils the requirements of the regulatory, accrediting or professional body.
3. To be a member of a relevant professional or regulatory body, and continue to fulfil any accreditation or membership criteria, including meeting requirements for: continuing professional and personal development regular supervision codes of practice.
4. To have gained the supervised therapy experience required by the regulatory or professional body encompassing assessment, formulation, engagement, developing the therapeutic relationship, using relevant therapeutic interventions, working collaboratively with clients, and working to end therapy.

The functions and services previously provided by the Centre for Workforce Intelligence (CfWI) transferred into the Department of Health and Social Care (DHSC) and Health Education England (HEE) from the 1st of April 2016 onwards. Content from the CfWI website will be archived and remain available, but future request should be directed to the appropriate teams within the DHSC and/or HEE [NHS England](#). This definition was previously agreed by the CfWI in consultation with a wide range of stake holders. ~~The functions and services previously provided by the Centre for Workforce Intelligence (CfWI) transferred into the Department of Health and Social Care (DHSC) and Health Education England (HEE) from the 1st of April 2016 onwards. Content from the CfWI website will be archived and remain available, but future request should be directed to the appropriate teams within the DHSC and/or HEE.~~ [The archived content from the CfWI website can be found here: https://webarchive.nationalarchives.gov.uk/ukgwa/20230603170958/https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/507554/CfWI_Physcological_Therapies_Workforce_in-depth_review.pdf](https://webarchive.nationalarchives.gov.uk/ukgwa/20230603170958/https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/507554/CfWI_Physcological_Therapies_Workforce_in-depth_review.pdf)

Further information on roles in the psychological therapies can be found on the NHS Careers website here: <https://www.healthcareers.nhs.uk/explore-roles/psychological-therapies/roles-psychological-therapies>. Additional Psychologist and Psychological Therapies Workforce (PPTW) specific guidance documents e.a. Indicative Job title guide. will be available in due course.

SCIENTIFIC, THERAPEUTIC AND TECHNICAL STAFF

49. This Occupation Code is to be renamed to comply with the Statutory Instrument related to the Protected Title of Dramatherapist. The HCPC and NHS Careers websites both use Dramatherapy and Dramatherapist and The British Association of Dramatherapists (BADth) is the professional organisation for Dramatherapists in the United Kingdom. No burden on users of ESR, straight renaming of existing value and no action required to update individual records.

50. Operating Department Practitioners are now classed as Allied Health Professionals so their Occupation Codes are now grouped with the other AHP staff. Please review Job Role coding for existing and new ODP staff as this change has resulted in additional Job Roles being created for ODPs at different levels common to all AHP staff.

51. Occupation Code S1T has been opened for Specialist Practitioner / Advanced Roles within Operating Theatres such as Advanced ODPs and Surgical Care Practitioners registered with the HCPC. The correct Job Role values should also be used.

52. New Occupation Codes opened for Osteopaths and Osteopathy Support Staff which have been recognised as AHPs. Please use the appropriate Job Role values according to their level of practice.

53. Registration is required with the General Osteopathic Council which regulates Osteopaths in the UK.

54. The Occupation code S9L has been opened for Peer Support Workers, Senior Peer Support Workers and other Clinical Support staff working in the area of Applied Psychology. The correct Job Role and Area of Work values should be used. Assistant Psychologists should be coded as S5L.

55. The AHP Occupation Codes S1* are to be used to record AHP Advanced Practitioners along with the corresponding Job Role. All AHPs now have specific Advanced Practitioner Job Roles within each profession. Ensure that all staff recorded as Advanced Practitioners fulfil the following criteria:

Advanced Practitioner role - requiring an experienced registered healthcare practitioner to have acquired an expert knowledge base, complex decision-making skills and clinical capabilities. Their practise is characterised by a high degree of autonomy and is underpinned by a master's level award or equivalent that encompass clinical practice, leadership and management, education and research, with demonstration of core capabilities and area specific clinical competence.

The summary aligns to the Multi-professional framework for advanced clinical practice in England
(<https://www.hee.nhs.uk/sites/default/files/documents/Multi-professional%20framework%20for%20advanced%20clinical%20practice%20in%20England.pdf>)

56. Public Health Consultants / Specialists who are not registered with the GMC but are registered as a Specialist on the UKPHR (UK Public Health Register) register, should be coded with the Occupation Code SAX. Ensure the UKPHR registration is added to their record in ESR - select the 'Other' category and then input 'UKPHR' only, to avoid spelling inaccuracies. Also ensure the appropriate Job Role and Area of Work values are used.

57. Public Health Practitioners who do not require registration with a statutory body, e.g., NMC, as an essential criterion for their role, but are registered on the UKPHR (UK Public Health Register) register, should be coded with the Occupation Code S1X. Ensure the UKPHR registration is added to their record in ESR - select the 'Other' category and then input 'UKPHR' only, to avoid spelling inaccuracies. Also ensure the appropriate Job Role and Area of Work values are used.

58. Public Health Practitioners who do not require registration with a statutory body, e.g., NMC, as an essential criterion for their role, and are not registered on the UKPHR (UK Public Health Register) register, should be coded with the Occupation Code S5X. Ensure the appropriate Job Role and Area of Work values are used.

59. Multidisciplinary Team Roles - The general rule is that we code the post and not the person; however, there are some exceptions to the coding rule, for example, when a post can be filled by individuals from multiple professional backgrounds. In which case the Occupation Code, Staff Group and Job Role will be determined by the professional registration of the recruited individual.

[60. Code S7G has been opened for Tutor in Radiography \(therapeutic\). These staff provide education for Therapeutic Radiographers](#)

[61. The S*D column heading in the S matrix has been changed from Orthoptics/Optics to Orthoptics, as Optics is an outdated term. Optometrists and Dispensing Opticians who were previously coded within this Occupation Code and within the label of 'Optics', will now be recorded in the new 'Optometry' Occupation Codes S*W. Orthoptists are registered with the Health and Care Professions Council \(HCPC\) and are Allied Health Professionals, whereas Optometrists are registered with the General Optical Council \(GOC\) and are within the Additional Professional Scientific and Technical Staff Group. Therefore the change is a logical one to separate these two professions.](#)

[62. Optometrists and Dispensing Opticians who were previously coded within the S*D Occupation Code within the label of 'Optics', should be recorded in the new 'Optometry' Occupation Codes S*W.](#)

SCIENTIFIC, THERAPEUTIC AND TECHNICAL STAFF

General Definition Notes for the scientific, therapeutic and technical staff matrix

The Following definitions are provided for Historical context as the names may still be used locally, particularly in the context of recruitment.

ATOs are Assistant Technical Officers and relates to pre-Agenda for Change Pay Scales. They would generally be scientific staff with less formal training, working mainly in a 'support' capacity, ranging between AfC 1 and 3, with more on the job training than formal training. This is more of a historic grade, but is still used in parts of the NHS.

MLAs are Medical Lab Assistants and relates to pre-Agenda for Change Pay Scales. Such roles are similar in scope and level to ATOs as described above, typically they are responsible for supporting biomedical scientists in the delivery of patient care. They may carry out a wide range of functions in pathology laboratories, including preparation of test media, making up and sterilising chemical solutions and separating blood serum and plasma.

Staff currently coded within systems such as ESR with the Job Role of Medical Laboratory Assistant should be recoded to the most relevant current Job Role - please refer to the NWD2.8 Specification Document for more detail.

MTOs are Medical Technical Officers and relates to pre-Agenda for Change Pay Scales. Such roles would range between AfC Band 4 for newly qualified staff, to band 7 for senior MTOs. Though this term is still used in parts of the NHS it is predominantly a relic of the pre-Agenda for Change pay structure of the NHS, where there were specific MTO pay grades (from MTO 1 - broadly equivalent to AfC 4 - to MTO 5 - broadly equivalent to AfC 7). These are scientific staff who have undertaken training and are therefore able to hold varying degrees of responsibility in their work, especially for the operation and maintenance of equipment.

MLSOs are Medical Laboratory Scientific Officers and relates to pre-Agenda for Change Pay Scales. Such roles are similar in scope and level to MTOs as described above, though at a slightly higher level of qualification, with trained MLSOs tending to start on AfC Band 5. They analyse medical specimens such as blood and tissue to assist doctors with the diagnosis and treatment of disease. All their work is based on a detailed knowledge of biological, biochemical and chemical processes.

HEALTHCARE SCIENTISTS PREFACE

Important Notice:

New Workforce Classifications for Healthcare Science and Public Health Science Staff - U Matrix

To a large extent the transition of codes for Healthcare Science positions from the old 'T' matrix to the new 'U' matrix is near complete.

New Occupation Code and Area of Work values have been added to include emerging scientific specialisms in Healthcare Science and also those of the scientific workforce in Public Health and Bioinformatics.

Please note: the Public Health Sciences Occupation Codes (U*L and U*M) are only for use by Public Health England ~~UK Health Security Agency/Office for Health Improvement and Disparities~~ or organisations specifically employing Public Health Scientists.

NHS England ([former NHS Digital](#)) worked with a wide range of stakeholders, to create a new and more accurate way of recording Healthcare Science workforce data on an ESR and other HR systems. Using the Healthcare Science career framework as a foundation, a new set of Area of Work values, Job Role values and Occupation Codes was approved by the Data Alliance Partnership Board (DAPB) for use in the National Workforce Data Set (NWD). This means that all Healthcare Science and PH scientific positions need to be examined to ensure that they are coded accurately to reflect both the current workforce and new staff from training programmes.

Despite the former 'T' Healthcare Science codes having been closed for a number of years, a number of organisations still have positions coded using these out of date codes. Please can you check your workforce information and ensure that any remaining posts associated with the closed 'T' Healthcare Scientist codes are updated in consultation with the Healthcare Science leads within your organisation. For organisations using ESR these invalid codes now impact your WoVen Data Quality score.

Following an extensive consultation with the Modernising Scientific Careers (MSC) Team at the Department of Health and Social Care (DHSC) and Health Education England, the MSC early adopters network, NHS Employers, Healthcare Science Professional Leads and the Workforce Information Review Group the previous Occupation Codes for Healthcare Science staff (T Matrix) were closed and a new U Matrix was opened to replace them.

Additional changes have been made to other aspects of the National Workforce Data Set (NWD) to better accommodate this aspect of the NHS workforce, including updating the available Job Role and Area of Work values. The latest version of the NWD can be found here: <http://digital.nhs.uk/datasets/nwd>

The new values need to be applied to your current Healthcare Science and Public Health workforce. This involves auditing your current workforce data to ensure the correct records are included in the changes, reviewing the new values and assessing how these apply to your existing records, and then finalising the changes that you want to make to your records. **It is vital that any changes are made in collaboration with Healthcare Science and Public Health leads within your organisation.**

Detailed guidance notes have been provided with the U Matrix, indicating where possible any information on how to recode existing records.

If applied correctly, the new Healthcare Science and Public Health values will allow workforce planners, HR teams and directors to better understand and manage their Healthcare Science and Public Health teams, and improve data quality. It is vital for the success of this process that the local ESR system management team collaborates with the local Healthcare Science Lead, Public Health Lead and department managers to verify the chosen values to ensure that they are applied correctly.

NHS England ([former NHS Digital](#)) has developed a set of guidance tools and materials to help and assist organisations with this change process. They are available here: <https://digital.nhs.uk/data-and-information/areas-of-interest/workforce/national-workforce-data-set-nwd-guidance-documents>

Users of the Electronic Staff Record (ESR) can raise a Service Request (SR) with the Interface Team to make mass changes to pre-existing Positions on the system. Further information will be made available by the ESR Team via User Notices .

If you have any questions or require further information, please contact [NHS England \(former NHS Digital\)](#), with 'Healthcare Science Workforce' in the subject line: enquiries@nhsdigital.nhs.uk

It is strongly recommended that where an individual holds a protected title registered by the Health and Care Professions Council (HCPC) : <http://www.hcpc-uk.org/aboutregistration/protectedtitles/> this information should be held in the Position (Job) Title Field and Professional Registration fields of the ESR or other HR system to ensure that this information is available.

HEALTHCARE SCIENTISTS

Suggested Level of Qualification for Healthcare Science U Matrix Job Roles

Occupation Code Level	Job Level	Typical Entry Level Qualification	Example Job Titles
UA*	Consultant Healthcare Scientist Consultant Clinical Scientist	NHS Higher Specialist Scientific Training (HSST)	Consultant Clinical Scientist
UB*	Consultant Healthcare Science Practitioner		Consultant Healthcare Science Practitioner
UC*	Consultant Biomedical Scientist		Consultant Biomedical Scientist
U0*	Manager (See notes 1-3)	Scientific Qualification (+ management responsibility for a significant area of healthcare science)	Manager
U1*	Specialist Healthcare Scientist Specialist Clinical Scientist	Accredited Scientific Practice (AESP)	Advanced Practitioner Clinical Scientist
U2*	Healthcare Scientist Clinical Scientist	Masters degree + Certification of work based competence	Clinical Scientist
UD*	Specialist Biomedical Scientist		Advanced Practitioner Biomedical Scientist
UE*	Biomedical Scientist		Biomedical Scientist
U3*	Specialist Healthcare Science Practitioner	Accredited Scientific Practice (ASSP), Masters modules or Masters Degree or equivalent	Advanced Practitioner Biomedical Scientist, Perfusionist
U4*	Healthcare Science Practitioner	Undergraduate degree + Certification of work based competence	Biomedical Scientist, Technician, Clinical Physiologist, Clinical Technologist
U5*	Healthcare Science Associate	Foundation Degree or equivalent	Assistant Practitioner, Cytoscreener, Technician / Technologist in Anatomical Pathology, Clinical Biochemistry, Haematology
U6*	Trainee Healthcare Scientist Trainee Clinical Scientist	Relevant undergraduate degree or equivalent	N/A
UF*	Trainee Biomedical Scientist		N/A
U7*	Trainee Healthcare Science Practitioner	A-levels or equivalent (entry to undergraduate)	N/A
U8*	Trainee Healthcare Science Associate	Sufficient to enter Foundation Degree	N/A
U9*	Healthcare Science Assistant	Various e.g. Apprenticeship	Assistant, Cardiographer, MLA, Phlebotomist

HEALTHCARE SCIENTISTS

Notes for the new Healthcare Science U matrix

This guidance should be used in combination with the 'Guide to Healthcare Science Workforce Classifications within ESR' and other guidance available with relation to the National Workforce Dataset and the ESR Job Role and Area of Work Guidance documents which can be found here: <https://digital.nhs.uk/data-and-information/areas-of-interest/workforce/national-workforce-data-set-nwd-guidance-documents>

1. Managers (U0*) are those who are operationally responsible for a healthcare science department. They may have overall responsibility for budgets, manpower or assets or who are held accountable for a significant area of work. They may undertake little or no direct healthcare science function (lab or patient investigations).
2. All managers who need to be a qualified Healthcare Scientist to undertake the role and fulfil the requirement outlined in point 1 should be included in the Healthcare Science staff matrix (U) as Managers (U0*) within their relevant area of work.
3. All managers who do not need to be a qualified Healthcare Scientist should be included in the administration and estates staff matrix (G).
4. Consultant Healthcare [Clinical](#) Scientists (UA*) are Clinical Scientists who are typically employed on Agenda for Change pay bands 8c or above and are appointed to the position by a local Consultant appointment panel or other peer assessed appointment system. Under the previous system, they were defined as Clinical Scientist Grade C with or without enhancement points.
5. In order to be considered a Specialist Practitioner (U3*) the role must require that the post holder has undertaken some additional specialist learning over and above their base-level qualification, it is therefore the Accredited Scientific Practice criteria that shifts a Practitioner to a Specialist Practitioner.
6. Clinical Physiologists and Technologists (sometimes known as Physiological Measurement Technicians (PMTs)) working within Physiological Sciences should be coded as Healthcare Science Practitioner within Physiological Sciences (U4*E-G) or Specialist Healthcare Science Practitioner (U3*E-G) within Physiological Sciences.
7. Healthcare Science Associate (U5*) should accommodate staff who are employed as Associates (also known as Assistant Practitioners). They are / have undertaken training to an agreed level against a Competence Framework (as well as Higher Apprenticeship or NVQ3 level training according to Agenda for Change), it is not necessarily a nationally recognised qualification (a degree, BTEC or equivalent), but it will be sufficient to allow them a degree of autonomy. As such an Associate should have intermediate qualifications and level of autonomy, putting them between Assistants (U9*) to one extreme and Healthcare Science Practitioners (U4*) to the other. Though this particular role may not be directly relevant in all areas of work at present, it will continue to expand as this sort of role develops to cover more aspects of the workforce.
8. A Healthcare Science Associate will undertake more advanced and complex investigative tasks and treatment protocol based procedures than assistants, with appropriate supervision, either by a Healthcare Science Practitioner, or a Healthcare Scientist. Associates cannot be counted as qualified staff. They are not legally defined as a staff group. They have formal education that is required for them to be able to do their job, and integrates academic and work based learning. The qualifications may or may not be transferable for use at other organisations.
9. Blood Sciences includes Clinical Biochemistry, Haematology, Blood Transfusion, Histocompatibility and Immunogenetics, Immunology, Phlebotomy, toxicology and Point of Care Testing.
10. Infection Sciences includes Medical Microbiology and Medical Virology.
11. Cellular Sciences includes Anatomical Pathology, Cervical Cytology, Cytopathology, Electron Microscopy, Histopathology, Tissue Banking and Reproductive Science.
12. Cardiac, Vascular, Respiratory and Sleep Science (CVRS) includes Autonomic Science, Cardiac Physiology, Clinical Perfusion, Critical Care, Respiratory Physiology, Sleep Physiology and Vascular Science.
13. Neurosensory Sciences includes Audiological Science, Neurophysiology and Ophthalmic and Vision Science.
14. Gastrointestinal and Urodynamic Sciences includes Gastrointestinal Physiology and Urodynamic Science.
15. Medical Physics includes Non-Ionising Radiation, Medical Illustration, Nuclear Medicine, Diagnostic and Interventional Radiology, Radiation Safety, Radiotherapy Physics and other existing Imaging Area of Work values (Imaging, Clinical Radiology, Ultrasound, CT, MRI, Mammography, Angiography, Breast Screening, Radiopharmacy, Dental and Maxillofacial Radiology).
16. Clinical Engineering includes Medical Equipment Management, Medical Engineering, Rehabilitation Engineering, Radiation Engineering, Clinical Measurement & Development, Renal Technology, Maxillofacial Prosthetics.

Continued overleaf

HEALTHCARE SCIENTISTS

Notes for the new Healthcare Science U matrix - Continued

17. Code staff working in Pathology as Life Sciences (U*A-D) with the appropriate value for their area of work and pathway level. The Pathology Area of Work value has now been made available for selection alongside the Life Sciences occupation codes in response to feedback regarding Senior and Support roles which cover multiple areas of Pathology and cannot be otherwise categorised. It should not be used as an 'other', and where possible attempts should be made to use one of the more detailed AoW values available if they better reflect the Specialism of the role being coded.

18. Code staff working in External Quality Assurance as Life Sciences (U*A-D) with the appropriate value for their specific area of work, e.g. Cervical Cytology, Blood Sciences

19. Information regarding protected titles, which for Healthcare Scientist includes:

Clinical Scientist
Biomedical Scientist
Hearing Aid Dispenser

Please see the HCPC website for further information regarding the protected titles themselves: <http://www.hcpc-uk.org/aboutregistration/protectedtitles/>

Please note that when re-coding existing posts, Occupation Codes U2*, U1*, and UA* must only be used for those posts requiring the protected title of 'Clinical Scientist' and no other. [Occupation Codes UC*, UD*, and UE* must only be used for those posts requiring the protected title of 'Biomedical Scientist' and no other.](#)

Information regarding protected titles should be captured within the Professional Registration elements of HR Systems such as the ESR, and may also be captured within the position (job) title field for reference. More detail is provided within section 4 of the 'Guide to Healthcare Science Workforce Classifications within ESR' guidance document available on the NHS Digital website: <https://digital.nhs.uk/data-and-information/areas-of-interest/workforce/national-workforce-data-set-nwd-guidance-documents>

Transition from 'T' Occupation Codes to the 'U' Occupation Codes

Please note that the new U codes do not directly map to the previous T codes, so it is very important to check with the local Healthcare Science lead and apply the correct code for each position.

20. Code Technician (previously coded as T4*) as Healthcare Science Practitioner (U4*). However, some roles, such as Anatomical Pathology Technician and Mortuary Technician, should be coded to Healthcare Science Associate (U5*), depending on level of qualification.

21. Code Biomedical Scientist (previously coded as T3*) as ~~Healthcare Science Practitioner (U4*)~~ [Biomedical Scientist \(UE*\)](#) - see note 19 regarding the capture of information on protected titles.

22. Code Advanced Biomedical Scientist (previously coded as T2*) as ~~Specialist Healthcare Science Practitioner (U3*)~~ [Specialist Biomedical Scientist \(UD*\)](#) - see note 19 regarding the capture of information on protected titles.

23. Code Cytoscreener (previously coded as T5*) as Cytoscreener, in Cellular Sciences (U5C)

24. Code Perfusionist (previously coded as T6*) as Specialist Healthcare Science Practitioner in Cardiac, Vascular, Respiratory and Sleep Science (CVRS) (U3E)

25. Specialist ~~Healthcare~~ [Clinical](#) Scientist (U1*) should be used for Clinical Scientists who are typically Agenda for Change pay band 8b and below. The post holder has undertaken some additional specialist learning over and above their base-level qualification, it is therefore the Accredited Expert Scientific Practice criteria that shifts a Scientist to a Specialist Scientist. See note 19 regarding the capture of information on protected titles.

26. Staff previously coded to Renal Dialysis (T*J) should now be coded to Clinical Engineering (U*J) with an Area of Work value of Renal Technology.

27. Staff previously coded to 'Other' values in T matrix - such as 'Other Life Sciences' (T*F), 'Other Physiological Sciences' (T*M), 'Other Physical Sciences' (T*T) and 'Other Healthcare Science Professions' (T*U) the most appropriate detailed value - most relevant to their pathway level - should be used. Where this information is not clear, please consult the Healthcare Science lead within your organisation for assistance.

28. The Advanced Practitioner Job Role ~~should not be used against Healthcare Scientist (U3*). Only the Healthcare Scientist Roles should be used with the qualified Healthcare Scientist occupation codes and only the specific supporting roles used with the unqualified Healthcare occupation codes.~~ [with the correct Occupation Codes determined by the type of Healthcare Scientist and specific HCPC registration, e.g. Clinical Scientist Advanced Practitioner - U1*, Biomedical Scientist Advanced Practitioner - UD*, Healthcare Science Practitioner Advanced Practitioner - U3*](#)

29. The 'Pathology' Area of Work value has now been made available for selection alongside the Life Sciences occupation codes in response to feedback regarding Senior and Support roles which cover multiple areas of Pathology and cannot be otherwise categorised. It should not be used as an 'other', and where possible attempts should be made to use one of the more detailed AoW values available if they better reflect the Specialism of the role being coded.

30. Clinical Bioinformatics (U*K) includes the Areas of Work Clinical Engineering, Genomics, Health Informatics Science and Medical Physics. The codes U*K must only be used for posts requiring the post holder to be working in a clinical science context, qualifying through the Scientist Training Programme (STP) or equivalent. U*K should not be used for posts that encompass a purely IT/data orientated function.

31. The Area of Work 'Genetic Counselling' coded under U*D should only be used for posts requiring the post holder to have qualified in the new Scientist Training Programme (STP) in that subject. U*D linked with 'Genetic Counselling' as the AoW should not be used in any other circumstance (the first graduates from this STP will be in 2019).

HEALTHCARE SCIENTISTS

Notes for the new Healthcare Science U matrix - Continued

32. Social Sciences (U*L) includes Nutritional Sciences, Behavioural Sciences, and Field Epidemiology. The codes U*L must only be used in the coding of Public Health England [UK Health Security Agency/Office for Health Improvement and Disparities](#) scientific posts, they must not be used for NHS Healthcare Science posts. The coding of PHE scientific posts must follow the general criteria for the choice of Job Role as for Healthcare Science positions.

33. Environmental Sciences (U*M) includes Radiation Safety, Radiation Sciences, and Toxicology. The codes U*M must only be used for the coding of Public Health England [UK Health Security Agency/Office for Health Improvement and Disparities](#) scientific posts, they must not be used for NHS Healthcare Science posts. The coding of PHE scientific posts must follow the general criteria for the choice of Job Role as for Healthcare Science positions.

34. When coding Public Health England [UK Health Security Agency/Office for Health Improvement and Disparities](#) scientific posts, the entire range of the 'U' matrix (i.e. U*A-M) is available to use in ensuring the best match between the scientific Division/Theme and Area of Work value. PHE posts are identified by the 'Employer' field rather than the Occupational Code. The coding of PHE scientific posts must follow the general criteria for the choice of Job Role as for Healthcare Science positions.

35. When using the codes U*B (Infection Sciences) linked with the Area of Work value 'Decontamination Science', the only available Occupational Codes are U5B, U8B, and U9B – the codes for Support Staff or Trainees. The codes UAB-U4B must not be used when linked to this AoW. This is because there are no accredited Healthcare Science training curricula available at the current time to support the development of qualified posts, and therefore no post holders to meet the qualified Job Role criteria.

36. Occupation Codes U1* are to be used to record Advanced Practitioners who have the protected title of Clinical Scientist. The corresponding Job Role of 'Healthcare [Clinical](#) Scientist Advanced Practitioner' should also be used.

37. Occupation Codes U3* are to be used to record [Healthcare Science Practitioner](#) Advanced Practitioners, including those staff with the protected title of Biomedical Scientist. The corresponding Job Role of 'Healthcare Science Practitioner Advanced Practitioner' should also be used.

38. Ensure that all staff recorded as Advanced Practitioners fulfil the following criteria:

Advanced Practitioner role - requiring an experienced registered healthcare practitioner to have acquired an expert knowledge base, complex decision-making skills and clinical capabilities. Their practise is characterised by a high degree of autonomy and is underpinned by a master's level award or equivalent that encompass clinical practice, leadership and management, education and research, with demonstration of core capabilities and area specific clinical competence.

The summary aligns to the Multi-professional framework for advanced clinical practice in England (<https://www.hee.nhs.uk/sites/default/files/documents/Multi-professional%20framework%20for%20advanced%20clinical%20practice%20in%20England.pdf>)

39. Staff working in GP Practices e.g. Phlebotomists, should be coded to the appropriate level and area of work as staff working in secondary care, but should be identified by selecting 'GENGP' in the 'Position Workplace Organisation Code' field on ESR.

[40. Occupation Codes 'UB \(E-M\)', are for Healthcare Science Practitioners who are working at Consultant level and are not Clinical Scientists or Biomedical Scientists, both of which have their own specific Occupation Codes.](#)

[41. Occupation Codes 'UC \(A-D\)', are for Consultant Biomedical Scientists. 'Biomedical Scientist' is a protected title and requires HCPC registration. Previously this group of staff were included within the Healthcare Science Practitioner values but now align with the coding values of 'Clinical Scientist' which is also a protected title and HCPC registered. Therefore, records will need to be updated accordingly.](#)

[42. Occupation Codes 'UD \(A-D\)', are for Specialist Biomedical Scientists. 'Biomedical Scientist' is a protected title and requires HCPC registration. Previously this group of staff were included within the Healthcare Science Practitioner values but now align with the coding values of 'Clinical Scientist' which is also a protected title and HCPC registered. Therefore, records will need to be updated accordingly.](#)

[43. Occupation Codes 'UD \(A-D\)', are to be used to record Advanced Practitioners who have the protected title of 'Biomedical Scientist'. The corresponding Job Role of 'Biomedical Scientist Advanced Practitioner' should also be used.](#)

[44. Occupation Codes 'UE \(A-D\)' are for Biomedical Scientists. 'Biomedical Scientist' is a protected title and requires HCPC registration. Previously this group of staff were included within the Healthcare Science Practitioner values but now align with the coding values of 'Clinical Scientist' which is also a protected title and HCPC registered. Therefore, records will need to be updated accordingly.](#)

[45. Occupation Codes 'UF \(A-D\)', are for Trainee Biomedical Scientists. This group of staff were previously included within the Trainee Healthcare Science Practitioner values but now align with the coding values of 'Clinical Scientist' which is a protected title and HCPC registered, as is 'Biomedical Scientist'. Therefore, records will need to be updated accordingly.](#)

[46. As part of the NWD 3.5 uplift it was agreed that the Occupation Code levels for the various type of 'Healthcare Scientist' should be changed to 'Clinical Scientist' as these Occupation Codes were used for Clinical Scientists/Trainee Clinical Scientists only. This would provide clarity and help to ensure that the different levels of Clinical Scientist were correctly identified. 'Clinical Scientist' is a protected title and HCPC registered.](#)

See *Qualifications Table* before notes for more examples of Healthcare Science Roles and their associated qualification levels.

HEALTHCARE SCIENTISTS

General Definition Notes for the new Healthcare Science U Matrix

The Following definitions are provided for Historical context as the names may still be used locally, particularly in the context of recruitment.

ATOs are Assistant Technical Officers and relates to pre-Agenda for Change Pay Scales. They would generally be scientific staff with less formal training, working mainly in a 'support' capacity, ranging between AfC 1 and 3, with more on the job training than formal training. This is more of a historic grade, but is still used in parts of the NHS.

MLAs are Medical Lab Assistants and relates to pre-Agenda for Change Pay Scales. Such roles are similar in scope and level to ATOs as described above, typically they are responsible for supporting biomedical scientists in the delivery of patient care. They may carry out a wide range of functions in pathology laboratories, including preparation of test media, making up and sterilising chemical solutions and separating blood serum and plasma.

Staff currently coded within systems such as ESR with the Job Role of Medical Laboratory Assistant should be recoded to the most relevant current Job Role - please refer to the latest NWD Specification Document for more detail.

MTOs are Medical Technical Officers and relates to pre-Agenda for Change Pay Scales. Such roles would range between AfC Band 4 for newly qualified staff, to band 7 for senior MTOs. Though this term is still used in parts of the NHS it is predominantly a relic of the pre-Agenda for Change pay structure of the NHS, where there were specific MTO pay grades (from MTO 1 - broadly equivalent to AfC 4 - to MTO 5 - broadly equivalent to AfC 7). These are scientific staff who have undertaken training and are therefore able to hold varying degrees of responsibility in their work, especially for the operation and maintenance of equipment.

MLSOs are Medical Laboratory Scientific Officers and relates to pre-Agenda for Change Pay Scales. Such roles are similar in scope and level to MTOs as described above, though at a slightly higher level of qualification, with trained MLSOs tending to start on AfC Band 5. They analyse medical specimens such as blood and tissue to assist doctors with the diagnosis and treatment of disease. All their work is based on a detailed knowledge of biological, biochemical and chemical processes.

GENERAL PAYMENTS

Z		Macmillan nurses	Marie Curie nurses	Other nursing	Scientific, therapeutic & technical	Administration & non-patient care support	Other
		A	B	C	D	E	F
Non-funded staff	Z1	<i>see note 5</i>	<i>see note 5</i>	<i>see note 5</i>			---
General payments	Z2	---	---	---	---		

Notes for the general payments matrix

1. Non-funded staff includes staff employed on projects funded by the Department of Health or other outside sources, and staff whose salaries are recharged to another **non-NHS** employer or organisation.
2. Code Z2E includes Chairmen and other non-executive board members. Please do not code these staff to the G matrix.
3. Code Z2F includes bursary payments, pensions and other payments such as relocation expenses.
4. The Medical and General Staff codes, 976 - M&D Retainer Scheme; 977 - Medical Fees LA Services; 978 - GP Bed / Casualty fund; 979 - Payment to Clinical Member of Management Team; 996 - Medical Research Council, were inherited values which pre-dated the development of the current Occupation Code structure in the mid 1990s. The codes were not of national interest, were excluded from published data and have therefore been retired. Medical Research Council was retired as part of the NWD 3.4 uplift, the other four were retired in the NWD 3.3 uplift.
5. Macmillan nurses, Marie Curie Nurses and 'Sure Start' funded nurses should only be included as non-funded staff whilst they are not being paid directly by the NHS. Once their contracts are transferred to the NHS they should be coded in the relevant area of the N-matrix as would be the case for the rest of the nursing workforce.

National Health Service

Occupation Code Manual

Version: 21.0

Lookup Guides

The following pages contain lookup guides to help users to find the correct Occupation Code.

The Lookup Guides are intended to be used with the guidance contained in each matrix to identify the correct code is applied. They are intended to be used for those who code NHS staff, but also for users who are involved in workforce analysis and planning.

There are three Lookup Guides:

Alphabetic by Role Staff Type / Area of Work / Care Setting - a comprehensive list of job titles, roles and Area of Work / Care Setting.

Alphabetic by Occupation Code Group - a comprehensive list of job titles, roles and Area of Work / Care Setting listed by each Occupation Code group

Occupation Code Lookup - This lookup guide provides a cumulative list of all Occupation Codes that have existed, and not all of the codes are necessarily open valid ones at this present time. They may not be available for coding current staff, though they have been available in the past and are therefore required for timeseries analysis. This lookup guide contains a list of valid and retired Occupation Codes, which are denoted in the 'Valid or Retired' column. The valid Occupation Codes should be used for the current coding of staff and the retired Occupation Codes are included for the purposes of timeseries data analysis.

Also, for the purpose of consistent reporting all the locum codes starting 1 and 2 are converted to 0 or 9 respectively as part of the processing undertaken by NHS Digital England, so that they can be reported alongside their substantive counterparts.

Please note, the use of ampersands (&) are gradually being phased out of workforce data standards. Until this is complete, certain values may differ slightly between NHS England, the NWD and ESR.

Change to reporting for Post Registration Nursing, midwifery and health visitor learners:

Following the changes resulting from the former NHS Digital 2016 consultation on its workforce NHS workforce statistics publications the post-registration learners have been moved into the qualified element of the publication groupings and are no longer included in the support staff grouping along with the pre-registration learners. This change has been reflected in the Analysis Guides.

Additionally other Occupation Codes have moved between staff groups and staff groups in NHS Digital publications have been updated or created - these changes are also reflected in the Analysis Guides at the end of this manual. More detail on the outcome of the consultation is available here:

<https://assets.publishing.service.gov.uk/media/5a74b90c40f0b61df4777f4e/nhs-staf-2015-over-rep.pdf>

More details on workforce publications can be found here:

<https://digital.nhs.uk/data-and-information/areas-of-interest/workforce>

We have tried to make this guidance as comprehensive and relevant as possible but we welcome feedback and suggestions.

This guidance can also be used in conjunction with other NWD documents which are available here:

<https://digital.nhs.uk/data-and-information/areas-of-interest/workforce/national-workforce-data-set-nwd-guidance-documents>

For more information on how to use Occupation Codes, please contact:	NHS England

1. Introduction
The purpose of this document is to provide a comprehensive overview of the project's objectives, scope, and deliverables. It is intended for all stakeholders involved in the project, including the project manager, team members, and sponsors.

2. Project Objectives
The primary objectives of this project are to:

- Develop a robust software solution that meets the requirements of the client.
- Ensure the project is completed within the specified budget and timeline.
- Establish a strong working relationship with the client and team members.

3. Project Scope
The project scope includes the following components:

- Requirement gathering and analysis.
- System design and architecture.
- Development and testing of the software.
- Deployment and user training.
- Post-launch support and maintenance.

4. Project Organization
The project is organized into the following roles and responsibilities:

- Project Manager:** Overall project management, communication, and reporting.
- Team Lead:** Supervise and coordinate the project team.
- Team Members:** Execute tasks and provide regular updates.

5. Project Schedule
The project schedule is as follows:

- Phase 1: Requirement gathering (Weeks 1-2)
- Phase 2: System design (Weeks 3-4)
- Phase 3: Development (Weeks 5-8)
- Phase 4: Testing (Weeks 9-10)
- Phase 5: Deployment (Week 11)
- Phase 6: Post-launch support (Ongoing)

6. Risk Management
Key risks identified during the project include:

- Scope creep: Changes in requirements that could impact the project's timeline and budget.
- Resource availability: Limited resources could affect the project's progress.
- Communication: Poor communication could lead to misunderstandings and delays.

7. Conclusion
This document serves as a guide for the project's execution. It is essential for all team members to understand the project's goals and their roles. Regular communication and collaboration are key to the project's success.

8. Appendix A: Glossary
This section defines key terms and acronyms used throughout the document.

- PM:** Project Manager
- TL:** Team Lead
- SM:** System Manager
- QA:** Quality Assurance
- UAT:** User Acceptance Testing

9. Appendix B: Project Charter
This section provides a high-level overview of the project's purpose, goals, and stakeholders.

10. Appendix C: Project Plan
This section details the project's schedule, resources, and risks.

11. Appendix D: Project Budget
This section outlines the project's financial requirements and budget allocation.

12. Appendix E: Project Risks
This section identifies potential risks and mitigation strategies.

13. Appendix F: Project Communication Plan
This section describes the communication channels and frequency for the project.

14. Appendix G: Project Deliverables
This section lists the project's key deliverables and their expected completion dates.

15. Appendix H: Project Stakeholders
This section identifies the project's stakeholders and their roles.

16. Appendix I: Project History
This section provides a brief history of the project and its previous iterations.

17. Appendix J: Project Metrics
This section defines the key performance indicators (KPIs) used to measure the project's success.

18. Appendix K: Project Templates
This section provides templates for project documents, such as meeting minutes and status reports.

19. Appendix L: Project Tools
This section lists the tools and software used for project management and development.

20. Appendix M: Project Contacts
This section provides contact information for key project stakeholders.

21. Appendix N: Project References
This section lists the references and sources used in the project documentation.

22. Appendix O: Project Acknowledgments
This section expresses gratitude to the individuals and organizations that supported the project.

23. Appendix P: Project Index
This section provides a comprehensive index of the project documentation.

24. Appendix Q: Project Change Log
This section tracks changes to the project documentation and their impact on the project.

25. Appendix R: Project Version History
This section tracks the history of the project documentation, including version numbers and dates.

26. Appendix S: Project License
This section provides the license information for the project documentation.

27. Appendix T: Project Disclaimer
This section provides a disclaimer for the project documentation.

28. Appendix U: Project Privacy Policy
This section provides the privacy policy for the project documentation.

29. Appendix V: Project Terms and Conditions
This section provides the terms and conditions for the project documentation.

30. Appendix W: Project Privacy Notice
This section provides the privacy notice for the project documentation.

31. Appendix X: Project Privacy Policy
This section provides the privacy policy for the project documentation.

32. Appendix Y: Project Privacy Notice
This section provides the privacy notice for the project documentation.

33. Appendix Z: Project Privacy Policy
This section provides the privacy policy for the project documentation.

1. **Introduction**
The purpose of this document is to provide a comprehensive overview of the project's objectives, scope, and deliverables. It serves as a reference for all stakeholders involved in the project.

2. **Project Objectives**
The primary objectives of this project are to develop a robust software solution that meets the needs of our customers and to ensure that the project is completed on time and within budget.

3. **Scope**
The project scope includes the development, testing, and deployment of the software application. It also encompasses the necessary infrastructure and support services.

4. **Deliverables**
The key deliverables of this project are the software application, user manuals, and training materials. These will be provided to the client upon successful completion of the project.

5. **Timeline**
The project is scheduled to start on [start date] and is expected to be completed by [end date]. A detailed project schedule will be provided in a separate document.

6. **Resources**
The project team consists of [list team members and their roles]. We have also allocated the necessary resources to ensure the project's success.

7. **Risks**
Potential risks to the project include [list risks and mitigation strategies]. We will monitor these risks closely and take proactive measures to address them.

8. **Conclusion**
We are confident that this project will be completed successfully and will provide significant value to our organization and our customers.

9. **Appendix A**
Appendix A contains additional information related to the project, including [list items in appendix].

10. **Appendix B**
Appendix B provides further details on [list items in appendix].

11. **Appendix C**
Appendix C includes [list items in appendix].

12. **Appendix D**
Appendix D contains [list items in appendix].

13. **Appendix E**
Appendix E includes [list items in appendix].

14. **Appendix F**
Appendix F contains [list items in appendix].

15. **Appendix G**
Appendix G includes [list items in appendix].

16. **Appendix H**
Appendix H contains [list items in appendix].

17. **Appendix I**
Appendix I includes [list items in appendix].

18. **Appendix J**
Appendix J contains [list items in appendix].

19. **Appendix K**
Appendix K includes [list items in appendix].

20. **Appendix L**
Appendix L contains [list items in appendix].

21. **Appendix M**
Appendix M includes [list items in appendix].

22. **Appendix N**
Appendix N contains [list items in appendix].

23. **Appendix O**
Appendix O includes [list items in appendix].

24. **Appendix P**
Appendix P contains [list items in appendix].

25. **Appendix Q**
Appendix Q includes [list items in appendix].

26. **Appendix R**
Appendix R contains [list items in appendix].

27. **Appendix S**
Appendix S includes [list items in appendix].

28. **Appendix T**
Appendix T contains [list items in appendix].

29. **Appendix U**
Appendix U includes [list items in appendix].

30. **Appendix V**
Appendix V contains [list items in appendix].

31. **Appendix W**
Appendix W includes [list items in appendix].

32. **Appendix X**
Appendix X contains [list items in appendix].

33. **Appendix Y**
Appendix Y includes [list items in appendix].

34. **Appendix Z**
Appendix Z contains [list items in appendix].

Speech and Language Therapist Consultant	SAJ	S	
Speech and Language Therapist Manager	S0J	S	
Speech and Language Therapist Specialist Practitioner	S1J	S	
Speech and language therapy - Support staff	S9J	S	
Speech and language therapy - Therapeutic staff	S*J	S	
Steriliser Attendant (Pharmacy)	S9P	S	
Student / Trainee in Prosthetics and Orthotics	S8I	S	
Student Chiroprapist	S8I	S	
Student Dental Hygienist	S8R	S	
Student Dental Technician	S8R	S	
Student Dietitian	S8B	S	
			The specific area in which they work should be shown in their Area of Work value on ESR, also utilise the Job Role of Physician Associate within the Additional Professional Scientific & Technical Staff Group for further identification
Student Occupational Therapist	S8C	S	
Student Orthoptist	S8D	S	
Student Physiotherapist	S8E	S	
Student Psychotherapist / trainee	S8M	S	
Student Radiographer (Diagnostic)	S8F	S	
Student Radiographer (MRU)	S8F	S	
Student Radiographer (Therapeutic)	S8G	S	
Student Speech and Language Therapist	S8J	S	
Student Technician (Scientific, Therapeutic and Technical)	S8*	S	
Student Trainee Art, Music & Drama Therapy	S8H	S	
Substance Misuse Worker - qualified	S8U	S	
Substance Misuse Worker - unqualified	S8U	S	
Support Time and Recovery (STR) Workers	S5U	S	
Surgical Instrument Staff	S*X	S	
Teacher of Handicrafts	S6C	S	
Teacher of the Deaf	S6J	S	
Technician Other (Scientific, Therapeutic and Technical)	S4X	S	
Theatre Orderly	S9T	S	
Therapist (Scientific, Therapeutic and Technical)	S1*	S	
Therapist in Psychotherapy (NHS Talking Therapies for anxiety and depression (formerly known as IAPT))	S1M	S	
			S1L and S1M should only be used for Applied Psychologists and High Intensity Therapists working in NHS Talking Therapies for anxiety and depression (formerly known as IAPT) services.
Trainee Advanced Practitioner (Additional Professional Scientific and Technical)	S1*	S	
Trainee Advanced Practitioner (Allied Health Professionals)	S1* or AB*	S	S1A - S1J / S1T / S1V / ABA - ABE
Trainee Dental Surgery Assistant	S8R	S	
Trainee Practitioner (Scientific, Therapeutic and Technical)	S8*	S	
Tutor Speech and Language Therapy	S7J	S	
Tutorial Chiroprapist	S7A	S	
Tutorial Dental Hygiene	S7R	S	
Tutorial Dental Technician	S7R	S	
Tutorial Occupational Therapist	S7C	S	
Tutorial Orthoptists	S7D	S	
Tutorial Physiotherapist	S7E	S	
Tutorial Radiographer	S7F	S	
Youth Intensive Psychological Practitioner	S5M	S	
Youth Intensive Psychological Practitioner (Trainee)	S8M	S	
Youth Worker	S*U	S	
Gateway Worker	S1U or N6D S / N		
Graduate Primary Care Mental Health Worker	S1U or N6D S / N		
Personality Disorder Worker	S8U or N'D S / N		
Surgical Care Practitioner	S1T / N**	S / N	Code as S1T when registered with the HCPC Code in the N matrix when registered with the NMC Code as S1T when registered with the HCPC Code in the N matrix when registered with the NMC
Surgical Care Practitioner	S1T / N**	S / N	
Healthcare Science			
Abdominal Aortic Aneurysm Screening Technician	U4H	U	
Advanced Practitioner Biomedical Scientist in Cervical Cytology	U96	U	UDC
Allergy - Healthcare Scientific staff	U7*	U	
Allergy - Support staff (MLA / ATO / Assistant)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Allergy - Technician	U4A	U	
Anatomical Pathology (technologist)	U*C	U	
Anatomical Pathology Technician	U*C	U	
Assistant Practitioner in Healthcare Science	U5*	U	
Assistant Technical Officer (ATO)	U9*	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Associate Audiological Practitioner	U9F	U	
Associate Technologist	U4*	U	
Audiological Science - Support staff (MLA / ATO / Assistants)	U9F	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Audiological technician	U4F	U	
Audiologist	U4F	U	
Audiology (Clinical Scientist)	U2F	U	
Audiology (Consultant Clinical Scientist)	U4F	U	
Audiology Manager	U0F	U	
Autoclave Operator (MLA's)	U9B	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Biochemistry - Healthcare Scientific staff	U*A	U	
Biochemistry - Support staff (MLA / ATO / Assistants)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Biomechanical engineer (clinical scientist) in Equipment Management and Development	U2J	U	
Biomechanical engineer (clinical scientist) in Rehabilitation Engineering	U2J	U	
Biomechanical engineer (consultant clinical scientist) in Equipment Management and Development	U4J	U	
Biomechanical engineer (consultant clinical scientist) in Rehabilitation Engineering	U4J	U	
Biomechanical engineer (technical) in Equipment Management and Development	U4J	U	
Biomechanical engineer (technical) in Other Physical Sciences	U4J	U	
Biomechanical engineer (technical) in Rehabilitation Engineering	U4J	U	
Biomedical engineer (clinical scientist) in Equipment Management and Development	U2J	U	
Biomedical engineer (clinical scientist) in Rehabilitation Engineering	U2J	U	
Biomedical engineer (consultant clinical scientist) in Equipment Management and Development	U4J	U	
Biomedical engineer (consultant clinical scientist) in Rehabilitation Engineering	U4J	U	
Biomedical engineer (technical) in Equipment Management and Development	U4J	U	
Biomedical engineer (technical) in Rehabilitation Engineering	U4J	U	
Biomedical Scientist in Clinical Biochemistry (MLSOs)	UEC	U	UEC
Biomedical Scientist in Histopathology (MLSOs)	UEC	U	UEC
Biomedical Scientists in Genetics (MLSOs)	UEE	U	UEE
Biomedical Scientists in Haematology including transfusion science (MLSOs)	UEA	U	UEA
Biomedical Scientists in Microbiology (MLSOs)	UEB	U	UEB
Blood Bank Manager	U0A	U	
Blood Bank Support Worker	U9A	U	
Blood transfusion & transplantation science (Biomedical Scientist)	UEA	U	UEA
Blood transfusion and transplantation science (Clinical Scientist)	U2A	U	
Blood transfusion and transplantation science (MLA/ATO)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Blood transfusion and transplantation science (technologist)	U4A	U	
Bone Density Technician	U4H	U	Corrects error in previous guidance - the new code provides a more accurate fit for this role
Bone Scanning Technician	U4H	U	Corrects error in previous guidance - the new code provides a more accurate fit for this role
Business and Quality Manager (Healthcare Science)	U0*	U	

By Occupation Code Group

Cardiac Technician	U4E	U	
Cardiographer	U9E	U	
Cardiographer assistant	U9E	U	
Cardiology - Healthcare Scientific Staff	U'E	U	
Cardiology Perfusionist	U3E	U	
Cardiology Technician	U4E	U	
Chemical Pathology - Healthcare Scientific staff	U7A	U	
Chemical Pathology - Support staff (MLA / ATO / Assistants)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Chemical Pathology - Technician	U4A	U	
Clinical biochemistry (inc. paediatric) (Biomedical Scientist)	UEA UEA	U	
Clinical biochemistry (inc. paediatric) (Clinical Scientist)	U2A	U	
Clinical biochemistry (inc. paediatric) (MLA/ATO)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Clinical biochemistry (inc. paediatric) (technologist)	U4A	U	
Clinical Cytogenetics (Biomedical Scientist)	UEE UEE	U	
Clinical Cytogenetics (Clinical Scientist)	U2D	U	
Clinical Cytogenetics (MLA/ATO)	U9D	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Clinical Cytogenetics (technologist)	U4D	U	
Clinical Cytogenetics - Healthcare Scientific staff	U7D	U	
Clinical Cytogenetics - Support staff (MLA / ATO / Assistant)	U9D	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Clinical Cytogenetics - Technician	U4D	U	
Clinical embryology (Clinical Scientist)	U2C	U	
Clinical embryology (technologist)	U4C	U	
Clinical engineer (clinical scientist)	U2J	U	
Clinical engineer (consultant clinical scientist)	U4J	U	
Clinical engineer (technical)	U4J	U	
Clinical Immunology - Healthcare Scientific staff	U7A	U	
Clinical Immunology - Support staff (MLA / ATO / Assistant)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Clinical Immunology - Technician	U4A	U	
Clinical Immunology (Biomedical Scientist)	UEA UEA	U	
Clinical Immunology (Clinical Scientist)	U2A	U	
Clinical Immunology (MLA/ATO)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Clinical immunology (technologist)	U4A	U	
Clinical measurement engineer (Clinical Scientist)	U2J	U	
Clinical measurement engineer (consultant clinical scientist)	U4J	U	
Clinical measurement physicist (Clinical Scientist)	U2J	U	
Clinical measurement physicist (consultant clinical scientist)	U4J	U	
Clinical measurement Technician	U4J	U	
Clinical measurement Technologist	U4J	U	
Clinical Neurophysiology - Scientific/Technical	U4F	U	
Clinical Physiologist (Cardiology)	U4E	U	
Clinical Physiologist (Critical Care)	U4E	U	
Clinical Physiologist (Gastro-intestinal)	U4G	U	
Clinical Physiologist (Neurophysiology)	U4F	U	
Clinical Physiologist (Respiratory Physiology)	U4E	U	
Clinical Physiologist (Sleep Studies)	U4E	U	
Clinical Physiologist (Urodynamics)	U4G	U	
Clinical Physiologist (Vascular)	U4E	U	
Clinical Physiologist (Vision Science)	U4F	U	
Clinical Physiology - Support staff (MLA / ATO / Assistant)	U9*	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only. Not in HCS Coding guidance
Clinical Physiology - Technician	U4*	U	
Clinical Physiology (Cardiology) Assistant/Associate	U9E	U	
Clinical Physiology (Critical Care) Assistant/Associate	U9E	U	
Clinical Physiology (Gastro-intestinal) Assistant/Associate	U9G	U	
Clinical Physiology (Neurophysiology) Assistant/Associate	U9F	U	
Clinical Physiology (Respiratory Physiology) Assistant/Associate	U9E	U	
Clinical Physiology (Sleep Studies) Assistant/Associate	U9E	U	
Clinical Physiology (Urodynamics) Assistant/Associate	U9G	U	
Clinical Physiology (Vascular) Assistant/Associate	U9E	U	
Clinical Physiology (Vision Science) Assistant/Associate	U9F	U	
Clinical Radiology - Healthcare Scientific staff	U7H	U	
Clinical Radiology - Support staff (MLA / ATO / Assistant)	U9H	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Clinical Radiology - Technician	U4H	U	
Clinical Scientist (Grade A or B) Audiology	U2F	U	
Clinical Scientist (Grade A or B) Cardiology	U2E	U	
Clinical Scientist (Grade A or B) Critical Care	U2E	U	
Clinical Scientist (Grade A or B) Embryology	U2C	U	
Clinical Scientist (Grade A or B) Gastro-intestinal	U2G	U	
Clinical Scientist (Grade A or B) Neurophysiology	U2F	U	
Clinical Scientist (Grade A or B) Respiratory Physiology	U2E	U	
Clinical Scientist (Grade A or B) Sleep Sciences	U2E	U	
Clinical Scientist (Grade A or B) Urodynamics	U2G	U	
Clinical Scientist (Grade A or B) Vascular	U2E	U	
Clinical Scientist (Grade A or B) Vision Sciences	U2F	U	
Consultant Healthcare Clinical Scientist	U4*	U	
Critical Care Technologist	U4E	U	
Cytology - Healthcare Scientific staff	U7C	U	
Cytology - Support staff (MLA / ATO / Assistant)	U9C	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Cytology - Technician	U4C	U	
Cytopathology (inc. cervical cytology) (Biomedical Scientist)	UEG UEG	U	
Cytopathology (inc. cervical cytology) (MLA/ATO)	U9C	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Cytoscreener in Cyto / Histopathology	U5C	U	
Diagnostic radiology physicist (clinical scientist)	U2H	U	
Diagnostic radiology physicist (consultant clinical scientist)	U4H	U	
Diagnostic radiology technologist	U4H	U	
Dosimetrist	U4H	U	
ECG Technician	U4E	U	
Echocardiographer	U4E	U	
Echocardiography Assistant	U9E	U	
EEG Technician	U4F	U	
Electron microscopy (Biomedical Scientist)	UEG UEG	U	
Electron microscopy (Clinical Scientist)	U2C	U	
Electronics Engineer	U4J	U	
Electronics Technician (Medical physics technician)	U4J	U	
Equipment management ATO	U9J	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Equipment management engineer (clinical scientist)	U2J	U	
Equipment management engineer (consultant clinical scientist)	U4J	U	
Equipment management engineer (technical)	U4J	U	
Equipment management technologist	U4J	U	
External Quality Assurance (Biomedical Scientist)	U4* UE*	U	
External Quality Assurance (Clinical Scientist)	U2*	U	
Gastro-intestinal (Clinical Physiologist - Scientific Staff)	U4G	U	
Haematology - Healthcare Scientific staff	U7A	U	
Haematology - Support staff (MLA / ATO / Assistant)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Haematology - Technician	U4A	U	
Haematology (Biomedical Scientist)	UEA UEA	U	
Haematology (Clinical Scientist)	U2A	U	
Haematology (MLA/ATO)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Haematology (technologist)	U4A	U	
Haemostasis and thrombosis (Biomedical Scientist)	UEA UEA	U	
Haemostasis and thrombosis (Clinical Scientist)	U2A	U	
Haemostasis and thrombosis (MLA/ATO)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Healthcare Science Practitioner Advanced Practitioner (Healthcare Scientists)	U3*	U	includes Biomedical Scientists
Healthcare Clinical Scientist Advanced Practitioner (Healthcare Scientists)	U1*	U	Clinical Scientists only
Healthcare Clinical Scientist Trainee	U6*	U	
Hearing Screener	U9F	U	
Hearing Therapist	U4F	U	
Heart (Cardiology) Technician	U4E	U	
Histocompatibility and Immunogenetics (Biomedical Scientist)	UEA UEA	U	
Histocompatibility and Immunogenetics (Clinical Scientist)	U2A	U	
Histocompatibility and Immunogenetics (MLA/ATO)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Histopathology - Healthcare Scientific staff	U7C	U	
Histopathology - Support staff (MLA / ATO / Assistant)	U9C	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Histopathology - Technician	U4C	U	
Histopathology (Biomedical Scientist)	UEG UEG	U	
Histopathology (MLA/ATO)	U9C	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Infection Control Technician	U4B	U	
Laboratory aide / assistant (Healthcare Science)	U9*	U	
Lung (Respiratory) Technician	U4E	U	
Magnetic Resonance physicist (Clinical Scientist)	U2H	U	
Magnetic Resonance physicist (consultant clinical scientist)	U4H	U	
Maxillo-Facial Prosthetics Support staff (MLA / ATO / Assistant)	U9J	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Maxillo-Facial Prosthetics Technician (MTO)	U4J	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Maxillo-Facial prosthetics technologist	U4J	U	
Maxillo-Facial Prosthetist	U4J	U	
Medical / Surgical Equipment Support Worker	U9J	U	
Medical electronics & instrumentation engineer (clinical scientist)	U2J	U	
Medical electronics & instrumentation engineer (consultant clinical scientist)	U4J	U	
Medical electronics & instrumentation physicist (clinical scientist)	U2J	U	
Medical electronics & instrumentation physicist (consultant clinical scientist)	U4J	U	
Medical electronics & instrumentation technologist	U4J	U	
Medical engineering design engineer (clinical scientist)	U2J	U	
Medical engineering design engineer (consultant clinical scientist)	U4J	U	
Medical engineering design technologist	U4J	U	
Medical illustration & clinical photography ATO	U9H	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Medical Laboratory Assistant (MLA)	U9*	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only

By Occupation Code Group

Medical Laboratory Scientific Officer (MLSO)	U4*	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Medical Photographer	U4H	U	
Medical Physics - Healthcare Scientific staff	U1H	U	
Medical Physics - Support staff (MLA / ATO / Assistant)	U9H	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Medical Technical Officer (MTO)	U4*	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Microbiology - Healthcare Scientific staff	U1B	U	
Microbiology - Support workers (MLA / ATO / Assistant)	U9B	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Microbiology - Technician	U4B	U	
Microbiology (Biomedical Scientists)	UEB UEB	U	
Microbiology (Clinical Scientist)	U2B	U	
Microbiology (MLA/ATO)	U9B	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
MLSO	U4*	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
MLSO in GUM	U4B	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Molecular genetics (Biomedical Scientist)	UEB UEB	U	
Molecular genetics (Clinical Scientist)	U2D	U	
Molecular genetics (MLA/ATO)	U9D	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Molecular genetics (technologist)	U4D	U	
Mortuary Attendant	U9C	U	
Mortuary Manager	U0C	U	
Mortuary Technician	U5C	U	
Neuropathology scientific staff	U1C	U	
Neurophysiologist	U4F	U	
Neurophysiology Technician (Clinical Physiologist / Technologist)	U4F	U	
Newborn Hearing Screener	U9F	U	
Nuclear Medicine and Diagnostic Radiology (Healthcare Scientific staff)	U1H	U	
Nuclear Medicine and Diagnostic Radiology Support staff (MLA / ATO / Assistant)	U9H	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Nuclear Medicine and Diagnostic Radiology Technician	U4H	U	
Nuclear Medicine physicist (clinical scientist)	U2H	U	
Nuclear Medicine physicist (consultant clinical scientist)	U4H	U	
Nuclear medicine technologist	U4H	U	
Ophthalmic Science Practitioner	U4F	U	
Ophthalmic Scientific Manager	U0F	U	
Ophthalmic Technologist & Retinopathy Grader	U4F	U	
Pathology - Support staff (MLA / ATO / Assistant)	U9*	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Perfusionist	U3E	U	
Phlebotomist	U9A	U	
Phlebotomy (MLA/ATO)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Physiological Measurement Technician	U4*	U	
Poisons Unit Advisor	U1A	U	
Pulmonary Function Technician	U4E	U	
Radiation Control	U1H	U	
Radiation Protection	U1H	U	
Radiation protection physicist (clinical scientist)	U2H	U	
Radiation protection physicist (consultant clinical scientist)	U4H	U	
Radiation protection technologist	U4H	U	
Radiography (Diagnostic) - Healthcare Scientific Staff	U1H	U	
Radiography (Diagnostic) - Technician	U4H	U	
Radiochemist (clinical scientist)	U2H	U	
Radiochemist (consultant clinical scientist)	U4H	U	
Radiochemistry technologist	U4H	U	
Radiotherapy engineer	U4J	U	
Radiotherapy physicist (clinical scientist)	U2H	U	
Radiotherapy physicist (consultant clinical scientist)	U4H	U	
Radiotherapy physics Dosimetrist	U4H	U	
Radiotherapy Physics Technician	U4H	U	
Rehabilitation engineer (clinical scientist)	U2J	U	
Rehabilitation engineer (consultant clinical scientist)	U4J	U	
Rehabilitation Engineering - Healthcare Scientific staff	U1J	U	
Rehabilitation Engineering - Support Staff (MLA / ATO / Assistant)	U9J	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Rehabilitation Engineering - Technician (MTO)	U4J	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Rehabilitation engineering ATO	U9J	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Rehabilitation engineering technologist	U4J	U	
Renal dialysis ATO	U9J	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Renal dialysis engineer (clinical scientist)	U2J	U	
Renal dialysis engineer (Consultant Clinical Scientist)	U4J	U	
Renal dialysis engineer (technical)	U4J	U	
Renal dialysis technologist	U4J	U	
Renal Transplant Practitioner	U4J	U	
Respiratory Function Technician	U4E	U	
Sleep Physiologist (Clinical Scientist)	U2E	U	
Sleep Physiologist (Consultant Clinical Scientist)	U4E	U	
Sleep Physiologist Assistant	U9E	U	
Sleep Physiologist Manager	U0E	U	
Sleep Physiologist Technician	U4E	U	
Sonographer (Healthcare Scientists)	U1H	U	U4H / U1H / U2H - MUST be Clinical Scientists
Technician (Healthcare Science)	U1H	U	U9H / U3H / U4H - Including Biomedical Scientists U1H / U2H / U4H - MUST be Biomedical Scientists
Tissue banking (Biomedical Scientist)	UEC UEC	U	
Tissue banking (Clinical Scientist)	U2C	U	
Tissue banking (MLA/ATO)	U9C	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Tissue banking (technologist)	U4C	U	
Toxicology (Biomedical Scientist)	UEA UEA	U	
Toxicology (Clinical Scientist)	U2A	U	
Toxicology (MLA/ATO)	U9A	U	MLA / ATO / MTO / MLSO - are obsolete terms retained for guidance only
Trainee Advanced Practitioner (Healthcare Scientists)	U2* / U4* / UE*	U	U2* - Clinical Scientists only
Ultrasound and non-ionising radiation engineer (clinical scientist)	U2H	U	U4* - Includes Biomedical Scientists Healthcare Science Practitioners
Ultrasound and non-ionising radiation engineer (consultant clinical scientist)	U4H	U	
Ultrasound and non-ionising radiation technologist	U4H	U	
Venepuncturist	U9A	U	
Vision Sciences Technologist	U4F	U	
Vision Screener	U9F	U	
X-Ray Technician	U4H	U	
General Payments			
Agency payments	Z2F	Z	
Board Level Director (Non Executive Board)	Z2E	Z	
Chairperson	Z2E	Z	
Community Programme payments	Z2F	Z
