

# Primary Diagnosis Clinical Coding for CWT Standards

The following table sets out the amended PRIMARY DIAGNOSIS coding structure to be used for the monitoring of cancer waiting times following the consultation on the Cancer Waiting Times standards and approval from HM Government to implement changes to the standards from 1 October 2023.

This coding classification will identify the tumour group of the cancer, the distinction between primary and secondary cancers for reporting purposes is controlled by the CANCER TREATMENT EVENT IDENTIFIER.

See <https://www.england.nhs.uk/publication/cancer-waiting-times-review-models-of-care-and-measurement-consultation-response/> for further information.
