### NHS Data Model and Dictionary Service

<b>Type:</b>	Change Request
<b>Reference:</b>	1555
<b>Version No:</b>	1.0
<b>Subject:</b>	Sexual and Reproductive Health Activity Data Set Changes
<b>Effective Date:</b>	Immediate
<b>Reason for Change:</b>	Change to Information Standards
<b>Publication Date:</b>	12 April 2017

#### Background:

A review of the Sexual and Reproductive Health Activity Data Set has highlighted discrepancies between the approved Information Standard [ISB1518 Amd 30/2013](#) and the uplifted NHS Digital Technical and Clinical User Guidance. Further changes are also required to the frequency of submissions from quarterly to yearly.

This Change Request amends the Sexual and Reproductive Health Activity Data Set and supporting definitions in the NHS Data Model and Dictionary to align with the uplifted Technical and Clinical User Guidance by:

- Removing the National Code descriptions from the attribute Contraception Method Status. These can now be found in the NHS Digital Technical and Clinical User Guidance
- Adding code N01 to Activity Location Type Code (Sexual and Reproductive Health Service) Data Element
- Amending the submission frequency from quarterly to yearly on the overview
- Adding the new Data Elements for Lower Layer Super Output Area (Person Residence) and ONS Local Government Geographic Area Code (Local Authority District) in line with [NHS Data Model and Dictionary Change Notice \(DDCN\)1559](#)
- Replacing Data Elements Organisation Code (Code of Provider) and Site Code (Of Treatment) with Organisation Identifier (Code of Provider) and Organisation Site Identifier (Of Treatment) to reflect changes to the coding structure of organisation reference data in line with the Information Standard [SCCI0090](#)

### SEXUAL AND REPRODUCTIVE HEALTH ACTIVITY DATA SET OVERVIEW

Change to Supporting Information: Changed Description, Dataset

[Public Health England](#) requires the mandatory collection of information on the [SERVICES](#) provided by [Sexual and Reproductive Health Services](#).

The [Sexual and Reproductive Health Activity Data Set](#) provides essential data to:

- ~~Ensure more relevant and timely collection of electronic data to support local service development~~
- ~~Allow monitoring of key policy initiatives and indicators such as Public Health Outcome Framework Indicator on under 18 conceptions, promotion of Long Acting Reversible Contraceptions (LARC), reducing teenage conceptions, reducing the rate of unintended pregnancies and modernisation of [Sexual and Reproductive Health Services](#)~~
- Ensure a relevant collection of electronic data to support local service development
- Allow monitoring of key policy initiatives and indicators such as: The Public Health Outcome Framework Indicator on under 18 conceptions; increasing access to all methods of contraception, including Long Acting Reversible Contraceptions (LARC) methods and emergency contraception for women of all ages and their partners; reducing teenage conceptions; reducing the rate of unintended pregnancies and modernisation of [Sexual and Reproductive Health Services](#)
- Provide appropriate definitions and guidance material to enable a standardised data set from [Sexual and Reproductive Health Services](#)
- Support commissioners in understanding which population groups are accessing [Sexual and Reproductive Health Services](#) and which [SERVICES](#) they are receiving, including the LARC methods as recommended by [National Institute for Health and Care Excellence \(NICE\)](#), and therefore allowing for long-term commissioning of [SERVICES](#)
- Develop, over time, indicators of quality and outcome in [SERVICE](#) delivery (especially in comparative reports). For example the removal and length of use for LARC devices, provision of emergency [CONTRACEPTION](#), the provision of [CONTRACEPTION](#) post abortion and referrals to secondary care, the comparison of attendance rates for selected care and the diversity of young [PERSON](#) provision by [Sexual and Reproductive Health Services](#) including social referrals
- Aid the development of a benchmark measure to indicate how [SERVICES](#) compare in delivering the most appropriate and effective care to [PATIENTS](#)
- Reflect current data collection practices and requirements at [Sexual and Reproductive Health Services](#).

The [Sexual and Reproductive Health Activity Data Set](#) covers [PATIENT](#) contact with the [Sexual and Reproductive Health Services](#) whether in a clinic setting, in the [PATIENT](#)'s home or at an alternative location.

### DATA EXTRACT SPECIFICATION

**Description:** The [Sexual and Reproductive Health Activity Data Set](#) return includes [PATIENT ACTIVITY](#) provided by [Sexual and Reproductive Health Services](#) in clinics and non-clinic venues (e.g. outreach facilities or domiciliary visits). **Notes:**

- Codes for Executive Agency, Executive Agency Programme, Executive Agency Site and Executive Agency Programme Department do not easily fit into the coding frames as shown above and are therefore not included. This is due to their unusual structure in that there are more hierarchical 'tiers' than with other organisations.

*Executive Agency and Executive Agency Programme are both considered Organisation level entities, although each Programme does have a relationship to an Executive Agency. Executive Agency codes are three characters long. Executive Agency Programme codes are six, and their first three characters are the same as the Executive Agency they are associated to.*

Department codes of eight characters long can then be allocated underneath a Programme code (sharing the first six characters). Executive Agency Site codes of five characters long can be allocated under an Executive Agency code (and share the first three characters).

- A-9 indicates that characters A-Z and 0-9 are valid: except B, I, O, S, U and Z (to avoid ambiguity). This applies to all [ORGANISATION CODES](#) in the Coding Format Table above except [Independent Sector Healthcare Providers \(ISHP\)](#).

**Table 2: CODING FORMATS FOR ORGANISATIONS IN SCOTLAND**

Scottish [ORGANISATION CODES](#) are supplied by the Information Standards Directorate (ISD) from NHS Scotland and published by the [Organisation Data Service](#).

#### **ORGANISATION IDENTIFIER**

---

Change to Attribute: Changed Dataset

A unique identifier for an [ORGANISATION](#).

Note:

- [ORGANISATION IDENTIFIERS](#) are governed by the fundamental standard for "Health and Social Care Organisation Reference Data" (HSC Org Ref Data).
- The standard only relates to [ORGANISATION IDENTIFIERS](#) which are maintained and published by the [Organisation Data Service \(ODS\)](#). See [Health and Social Care Organisation Reference Data](#).

The Format/Length of a published code for an:

- [Organisation](#) is min an3 max an8
- [Organisation Site](#) is min an5 max an9.

**[ORGANISATION CODE](#) will be replaced with [ORGANISATION IDENTIFIER](#), which is the most recent approved national information standard to describe the required definition.**

---

## ORGANISATION SITE CODE

---

Change to Attribute: Changed Dataset

**ORGANISATION SITE CODE will be replaced with ORGANISATION IDENTIFIER, which is the most recent approved national information standard to describe the required definition.**

An ORGANISATION SITE CODE is a code which identifies an Organisation Site uniquely.

Note: Only ORGANISATION SITE CODES which have been notified to and issued by the Organisation Data Service may be used.

### Notes:

- Organisation Data Service codes can be downloaded from Technology Reference Data Update Distribution (TRUD)
- Organisation Data Service contact details can be found at Contact Details.

- **V81998** should be used where a [PATIENT](#) should not have a registered [GP Practice](#), due for instance to them having only recently entered the country.
- **V81999** should be used where it is not possible to determine a [PATIENT](#)'s registered [GP Practice](#) code, but it is known that they should have one, or where it is impossible to determine whether they should or shouldn't have a registered practice (for instance the [PATIENT](#) cannot communicate and is unidentified).

For [Commissioning Data Sets](#), the [ORGANISATION CODE \(CODE OF PROVIDER\)](#) should always be the [ORGANISATION CODE](#) of the [Health Care Provider](#) receiving the [National Tariff Payment System](#) income.

[ORGANISATION CODE \(CODE OF PROVIDER\)](#) is used by the [Secondary Uses Service](#) to derive the [Healthcare Resource Group 4](#). Failure to correctly populate this data element is likely to result in an incorrect [Healthcare Resource Group](#), usually associated with lower levels of healthcare resource.

## ORGANISATION SITE IDENTIFIER (OF TREATMENT)

---

Change to Data Element: Changed Dataset

Format/Length:	min an5 max an9
National Codes:	
<a href="#">ODS Default Codes:</a>	R9998 - Not a hospital site (for use on Out-Patient CDS) 89999 - Non-NHS UK Provider where no <a href="#">ORGANISATION IDENTIFIER</a> has been issued 89997 - Non-UK Provider where no <a href="#">ORGANISATION IDENTIFIER</a> has been issued

### Notes:

[ORGANISATION SITE IDENTIFIER \(OF TREATMENT\)](#) is the same as attribute [ORGANISATION IDENTIFIER](#).

[ORGANISATION SITE IDENTIFIER \(OF TREATMENT\)](#) is the [ORGANISATION IDENTIFIER](#) of the [Organisation Site](#) where the [PATIENT](#) was treated, i.e. it should enable the treating [Organisation](#) to be identified.

[ORGANISATION SITE IDENTIFIER \(OF TREATMENT\)](#) identifies the [Organisation Site](#) within the [Organisation](#) on which the [PATIENT](#) was treated, since facilities may vary on different hospital sites.

The code recorded should always be the national code; if the treatment is sub-commissioned to another NHS [Health Care Provider](#) or an independent UK provider, the [ORGANISATION SITE IDENTIFIER \(OF TREATMENT\)](#) used should be the [ORGANISATION IDENTIFIER](#) of the [Health Care Provider](#) actually carrying out the work.

Where treatment is sub-commissioned to an overseas provider the [Organisation Data Service Default Code](#) 89997 'Non-UK Provider where no [ORGANISATION IDENTIFIER](#) has been issued' is applicable.

Each [Organisation](#) has a unique [ORGANISATION IDENTIFIER](#). However, where an [Organisation](#) has more than one site from which it provides [SERVICES](#), then each site is uniquely identified. These sites are [Organisation Sites](#) and are uniquely identified by an [ORGANISATION IDENTIFIER](#).

For out-patients, [ACTIVITY](#) may take place outside the hospital, such as in the [PATIENT'S](#) home; in such cases, raising a site code is impractical. Therefore, code R9998 'Not a hospital site (for use on Out-Patient CDS)' would be used in these circumstances.

*Note: [LOCATION CLASS](#) is used in the Commissioning Data Set (CDS) message to indicate the classification of the physical [LOCATION](#) within which the [ACTIVITY](#) occurred.*

### Use in the Future Outpatient CDS:

If the [INTENDED SITE CODE \(OF TREATMENT\)](#) is not known, this data element should be omitted.

**[SITE CODE \(OF TREATMENT\)](#) will be replaced with [ORGANISATION SITE IDENTIFIER \(OF TREATMENT\)](#), when it has been approved for use in national information standards.**

**[PERSON GENDER CURRENT](#) and [PERSON GENDER CODE CURRENT](#) will be replaced with [PERSON STATED GENDER CODE](#) or [PERSON PHENOTYPIC SEX](#), which is the most recent approved national information standard to describe the required definition.**

Change to Data Element: Changed Dataset

The date should not be before the [REPORTING PERIOD START DATE](#) although it can be the same if the period being reported only covers 1 day.

Change to Data Element: Changed Dataset

[REPORTING PERIOD START DATE](#) is the same as attribute [REPORTING PERIOD START DATE](#).

[REPORTING PERIOD START DATE](#) is the start date of the [REPORTING PERIOD](#) and is used in conjunction with [REPORTING PERIOD END DATE](#) to specify the actual period the reported information relates to.

The date should not be after the [REPORTING PERIOD END DATE](#) although it can be the same if the period being reported only covers 1 day.

**Notes:**

[SITE CODE \(OF TREATMENT\)](#) is the same as attribute [ORGANISATION SITE CODE](#).

[SITE CODE \(OF TREATMENT\)](#) is the [ORGANISATION SITE CODE](#) of the [Organisation](#) where the [PATIENT](#) was treated, i.e. it should enable the treating [Organisation](#) to be identified.

This identifies the [Organisation Site](#) within the [Organisation](#) on which the [PATIENT](#) was treated, since facilities may vary on different hospital sites.

The code recorded should always be the national code; if the treatment is sub-commissioned to another NHS [Health Care Provider](#) or an independent UK provider, the [SITE CODE \(OF TREATMENT\)](#) used should be the [ORGANISATION SITE CODE](#) of the [Health Care Provider](#) actually carrying out the work.

Each [Organisation](#) has a unique [ORGANISATION CODE](#). However, where an [Organisation](#) has more than one site from which it provides [SERVICES](#), then each site is uniquely identified. These sites are [Organisation Sites](#) and are uniquely identified by [ORGANISATION SITE CODE](#). The [ORGANISATION SITE CODE](#) contains the first 3 digits of the [ORGANISATION CODE](#) with the last two digits being the site identifier.

Example:

- RA700 [ORGANISATION CODE](#) of the [Organisation](#)
- RA701 [ORGANISATION SITE CODE](#) of the first identified [Organisation Site](#) within the [Organisation](#)
- RA702 [ORGANISATION SITE CODE](#) of the second identified [Organisation Site](#) within the [Organisation](#)

For out-patients, [ACTIVITY](#) may take place outside the hospital, such as in the [PATIENT](#)'S home; in such cases, raising a site code is impractical. Therefore, code R9998 'Not a hospital site (for use on Out-Patient CDS)' would be used in these circumstances.
