NHS Data Model and Dictionary Service

Type:	Change Request
Reference:	1555
Version No:	1.0
Subject:	Sexual and Reproductive Health Activity Data Set Changes
Effective Date:	Immediate
Reason for Change:	Change to Information Standards
Publication Date:	12 April 2017

Background:

A review of the Sexual and Reproductive Health Activity Data Set has highlighted discrepancies between the approved Information Standard [ISB1518 Amd 30/2013](#) and the uplifted NHS Digital Technical and Clinical User Guidance. Further changes are also required to the frequency of submissions from quarterly to yearly.

This Change Request amends the Sexual and Reproductive Health Activity Data Set and supporting definitions in the NHS Data Model and Dictionary to align with the uplifted Technical and Clinical User Guidance by:

- Removing the National Code descriptions from the attribute Contraception Method Status. These can now be found in the NHS Digital Technical and Clinical User Guidance
- Adding code N01 to Activity Location Type Code (Sexual and Reproductive Health Service) Data Element
- Amending the submission frequency from quarterly to yearly on the overview
- Adding the new Data Elements for Lower Layer Super Output Area (Person Residence) and ONS Local Government Geographic Area Code (Local Authority District) in line with [NHS Data Model and Dictionary Change Notice \(DDCN\)1559](#)
- Replacing Data Elements Organisation Code (Code of Provider) and Site Code (Of Treatment) with Organisation Identifier (Code of Provider) and Organisation Site Identifier (Of Treatment) to reflect changes to the coding structure of organisation reference data in line with the Information Standard [SCCI0090](#)
