

## Corrigendum

<b>Standard</b>	DAPB0092-2062 Emergency Care Data Set
<b>Release</b>	Amd 17/2022 v4.0
<b>Date of ISCE publication</b>	10 January 2023
<b>Date of Corrigendum</b>	17 April 2023

### Background

Version 4.0 of the Emergency Care Data Set was published on 10 January 2023.

Since then, the need for corrections to the data set have been identified. A summary is provided below.

Note that there is no impact on the Requirements Specification or the Implementation Guidance.

However, an updated Change Specification and Technical Output Specification (TOS) have been issued and should be read in conjunction with this Corrigendum.

### Summary

A number of incorrect SNOMED CT concept IDs were included in the Change Specification and Technical Output Specification, leading to a discrepancy between these documents and the Enhanced Technical Output Specification (E TOS). The E TOS fully defines each data item in the data set, including SNOMED CT terminology, and is not part of the controlled DAPB approved documentation.

Full details of the corrections are outlined below.

The following corrections are required to the Change Specification.

In section **2.1.5 Introduction of new Assessment Scales**,

1. The **UEC Pain Scale** data item has been changed from  
 ‘...Concept ID: 425401001’ and ‘Preferred Term: Pain intensity rating scale (assessment scale)...’  
 to  
 ‘...Concept ID: 1144798005’ and ‘Preferred Term: Verbal rating scale pain intensity score (observable entity)...’
2. The **4AT Rapid Clinical Test For Delirium Scale** data item has been changed from

'...Concept ID: 1239191000000102' and 'Preferred Term: 4 A's Test for delirium and cognitive impairment (assessment scale)...

to

'...Concept ID: 1239211000000103' and 'Preferred Term: 4 A's Test for delirium and cognitive impairment score (observable entity)...

3. The **Rockwood Clinical Frailty Scale** data item has been changed from '...Concept ID: 445414007' and 'Preferred Term: Rockwood Clinical Frailty Scale (assessment scale)...' to '...Concept ID: 763264000 and 'Preferred Term: Canadian Study of Health and Aging Clinical Frailty Scale score (observable entity)...

The following correction is required to the Technical Output Specification.

4. The content in tab **4. ECDS Assessment Tools** has been removed, as SNOMED CT terminology is defined in the E TOS. However, the tab itself with an explanatory note will remain in the document to preserve references and numbering across the documentation.

### More information

The controlled version of this Corrigendum is published alongside the current publication documents on the NHS England website:

<http://digital.nhs.uk/isce/publication/dapb0092-2062>

Any questions about these changes should be sent to the developers of standard at [dataset.development@nhs.net](mailto:dataset.development@nhs.net) (quote 'ECDS' in subject line).
