# Data Alliance Partnership Board

The Data Alliance Partnership Board (DAPB), which holds delegated authority from the Secretary of State for Health and Social Care, has approved a change to an existing information standard for publication under [section 250 of the Health and Social Care Act 2012](#).

Assurance that this information standard meets the requirements of the Act and is appropriate for the use specified in the specification document has been provided by the Data Standards Assurance Service (DSAS) and endorsed by the Data Alliance Partnership Sub Board (DAPSB).

This information standard comprises the following documents:

- Change Specification
- Implementation Guidance
- Requirements Specification
- Technical Output Specifications.

An Information Standards Notice (DAPB0107 Amd 43/2023) has been issued as a notification of use and implementation timescales. Please read this alongside the documents for the standard.

The controlled copies of these documents can be found on the [NHS England website](#). Any copies held outside of that area, in whatever format (e.g. paper, email attachment), are considered to have passed out of control and should be checked for currency and validity.

Date of publication: 11 January 2024

# Glossary of terms

Term	Definition
Adult	Clients are deemed to be adults if they are aged 18 or over at presentation (triage).
Attributor	In NDTMS, the clients' two initials, date of birth, sex and local authority of residence are collectively used to identify an individual. Records relating to individual clients are isolated and linked on the basis of these attributors. This minimises the extent of multiple counting within the datasets.
Client	An adult or young person drug or alcohol user presenting for treatment.
Core dataset R (CDS-R)	NDTMS datasets that are collected from 1st April 2024. The NDTMS datasets are reviewed every two years and distinguished by letter.
DET	The Data Entry Tool (DET) is a system provided by NDTMS for treatment providers that do not have a clinical management system that is capable of producing NDTMS data.
DHSC	Department of Health and Social Care (DHSC). DHSC is a ministerial department, supported by a number of agencies and partner organisations.
Episode	A period of contact with a treatment provider, from referral date to discharge incorporating a set of interventions with a specific care plan. A client may attend one or more interventions/modalities of treatment during the same episode of treatment. A client may also have more than one episode in a year. A client is considered to have been in contact during the year (and hence included in statistics) if any part of an episode occurs within the year. An episode occurs at a single NDTMS agency. A client may perceive his/her treatment as a single pathway of care made up of continuous treatment, however for statistical and performance reasons, NDTMS requires that the pathway of care be broken up into individual episodes of care by provider.
NDTMS	The National Drug and Alcohol Treatment Monitoring System (NDTMS) captures data about structured drug and alcohol treatment in the community and in secure settings (including secure children's homes and IRCs). NDTMS also collect the Criminal Justice Interventions Team (CJIT) dataset which relates to pathways into treatment for criminal justice clients.
NDTMS V2	NDTMS V2 is an online portal provided and maintained for providers to use to submit their NDTMS data. Some providers who do not have an NDTMS compliant third-party software system may also use the NDTMS V2 inbuilt data entry tool (DET) for their NDTMS data entry.
OHID	The Office for Health Improvement and Disparities (OHID) sits within the

Term	Definition
	Department of Health and Social Care (DHSC) and leads work across government to improve and level up the health of the nation by tackling obesity, improving mental health and promoting physical activity.
Setting	The setting in which an intervention takes place, for example community, home or residential unit. The same client could be receiving the same intervention in more than one setting within the same episode.
Software supplier	Any third-party case file management system provider with the functionality to output a csv file compliant with NDTMS data submission requirement. For full details see <a href="http://gov.uk">gov.uk</a> .
Structured treatment	<p>Structured treatment follows assessment and is delivered according to a care plan, with clear goals, which are regularly reviewed with the client. It may comprise a number of concurrent or sequential specialist drug and alcohol focused interventions. It addresses multiple or more severe needs that would not be expected to respond, or have already not responded, to less intensive or non-specialist interventions alone. Structured treatment requires a comprehensive assessment of need, and is delivered according to a recovery care plan, which is regularly reviewed with the client. The plan sets out clear goals which include change to substance use, and how other client needs will be addressed in one or more of the following domains: physical and psychological health; criminal involvement and offending; and social functioning.</p> <p>All interventions must be delivered by appropriately trained and competent staff, within supervision and clinical governance structures. Structured drug and alcohol treatment provides integrated access to specialist medical assessment and intervention, and works jointly with mental and physical health services, and safeguarding and family support services according to need.</p> <p>In addition to pharmacological and psychosocial interventions provided as part of the key working or case management function of structured treatment, service users should be provided with the following as appropriate: harm reduction advice and information; BBV screening and immunisation; advocacy; appropriate access and referral to healthcare and health monitoring; and crisis and risk management.</p> <p>For a full definition of structured treatment see the <a href="#">NDTMS adult drug and alcohol treatment business definitions</a>, appendix A.</p>
Treatment journey	A new treatment journey occurs when an individual's latest presentation fulfils all of the following criteria: an earlier episode is not still open, the discharge date in an earlier episode is not after the discharge date in a later episode and the difference between modality start date in the later episode and the discharge date in the earlier episode is greater than 3 weeks (21 days).
Treatment provider	A provider of services for the treatment of drug or alcohol misuse. The agency may be statutory (for example NHS) or non-statutory (for example

Term	Definition
	third sector) and be providing structured or non-structured treatment. Each agency has an NDTMS agency code and there may be several NDTMS agencies at one location as per the requirements of local performance/contract management.
Young people	Clients are deemed to be young people if they are aged under 18 at triage. There is no distinction between those with a primary problem substance of drugs (such as cannabis) or alcohol; they are all classified as in substance misuse treatment.

# Executive summary

This is a change to the National Drug and Alcohol Treatment Monitoring System dataset and introduces some amendments to the current dataset (CDS-Q).

The Office for Health Improvement and Disparities (OHID) carried out a stakeholder survey on new data items for possible inclusion in the NDTMS core dataset R between April and May 2023. Some changes were in relation to a specific setting, such as prison or the community and some were in relation to a specific group of clients, such as those receiving treatment for alcohol or young people. Following consultation, all proposed changes which received at least 66% support were submitted to the NDTMS programme board for approval and are subsequently being implemented in April 2024. The new dataset is termed core dataset R (CDS-R).

Changes include:

- Data items being removed
- Data items being added
- Existing data items being amended
- Existing data items being added to additional datasets
- Reference data being added
- Reference data being removed
- Reference data being amended

Changes will affect the following datasets:

- Community adult (AD)
- Community young people (YP)
- Secure setting adult (SA)
- Secure setting young people (SY)

# 1. Overview

## 1.1 Summary

### Standard

Standard number	DAPB0107 Amd 43/2023
Standard title	National Drug and Alcohol Treatment Monitoring System (NDTMS)
Description	<p>The NDTMS dataset collates information on drug and alcohol treatment in England.</p> <p>NDTMS data helps drug and alcohol treatment providers and commissioners demonstrate the outcomes treatment achieves and in doing so aids accountability for the money invested in it. NDTMS is a national standard and is applicable to young people and adults within community and secure setting based treatment providers.</p> <p>NDTMS data are used to:</p> <ul style="list-style-type: none"><li>• Provide measurements that support the outcome and recovery focus of the government's drug strategy</li><li>• Provide information which can be used to monitor how effective drug and alcohol treatment services are and help to plan and develop services that better meet local needs</li><li>• Produce statistics and support research about drug and alcohol use and treatment</li><li>• Provide measures to support the <a href="#">Public Health Outcomes Framework</a></li></ul>
About this change	In order to align current business needs and clinical practice, and to support data quality, the following various changes have been made to the NDTMS datasets.

## Standard

	Dataset (See Appendix A for key)			
	AD	YP	SA	SY
New data items	20	16	7	2
Existing data items added to additional dataset	0	0	0	0
Deleted data items	16	17	24	54
Difference	4	-1	-17	-52
Data item name changes	1	3	1	1
Fields with reference data changes	14	5	4	3
Applies to	<p>All drug and alcohol treatment providers who are delivering structured treatment, including adult and young people's services as follows:</p> <ul style="list-style-type: none"> <li>• Community services - including NHS, third sector and private providers</li> <li>• Residential rehab and detox centres</li> <li>• Primary care</li> <li>• Inpatient units</li> <li>• Secure setting services - including prisons, Young Offender Institutions (YOIs), Secure Training Centres (STCs), Immigration Removal Centres (IRCs), secure children's homes and welfare only homes</li> </ul> <p>The data outputs will be used by:</p> <ul style="list-style-type: none"> <li>• Treatment providers - including third sector, NHS and private providers</li> <li>• Treatment commissioners - including local authority commissioners and NHS England commissioners</li> <li>• Department of Health and Social Care (DHSC)</li> </ul>			

## Standard

Implementation start and completion date	All the included changes were agreed by the NDTMS board following a stakeholder survey. Stakeholders are informed of the consultation outcome prior to a 6-month implementation period which will include NDTMS training provided by regional teams and updated core documentation.  Data collection will start on 1 April 2024.

## 2. Change Specification

The National Drug and Alcohol Treatment Monitoring System is a complex dataset which requires amendments to meet current clinical practice and reporting requirements.

New data items have been added following a stakeholder survey. The survey ran for 4 weeks between 24th April and 19th May 2023. The survey contained 27 questions. Some were in relation to a specific setting, such as prison or the community and some were in relation to a specific group of clients, such as young people or those receiving treatment for alcohol. Respondents were asked to consider the burden of collecting each of the new data items, alongside the potential benefits of their inclusion in the various reports, Joint Strategic Needs Assessments (JSNAs) and other toolkits produced to support the improvement of drug and alcohol treatment outcomes. Details of the consultation process were provided to the NDTMS Board for approval.

Several data items have been added to support reporting of current government initiatives and as such enhancements are required by government policy and the substance misuse treatment sector:

- Update to substances recorded on the community Young People's Outcomes Record (YPOR)
- Change Sub Intervention Review (SIR) prescribing intention to be current prescribing intention
- Add illicit opiate/opioid and cocaine drug test results
- Improve reporting of recovery support
- Add granularity to the community TOP unsuitable housing question

There are several new data items to enhance the reporting in secure estates, including:

- New interventions of DRW (Drug Recovery Wing) and ISFL (Incentivised Substance Free Living)
- Initial 13-week clinical review undertaken
- Intervention of Facilitated access to mutual aid

Some data items have been removed, including:

- Removing secure setting outcomes records (TOP and YPOR)
- Removing the patterns of use section from the community Young People's Outcomes Record (YPOR)
- Removing Reconnect support from the secure setting young person's dataset

The only change to the structure of the dataset will be to move IPSNINUM 'National Insurance Number (IPS)' from the client level to the episode level in both the adult community and YP community datasets.

## 2.1 New data items

The following table lists all the new data items that are being added in CDS-R and the dataset/s to which each item applies. Full details can be found on the NDTMS pages on [ndtms.net](http://ndtms.net).

The datasets are split into different sections, 'Level' refers to the section of the dataset in which the change occurs.

See Appendix A for the key to the terms and abbreviations used in the table.

Data Item	Level	AD	YP	SA	SY
Employment status	CIR	√			
Illicit opiate/opioid drug test result <ul style="list-style-type: none"> <li>Positive</li> <li>Negative</li> </ul>	SIR	√			
Cocaine drug test result <ul style="list-style-type: none"> <li>Positive</li> <li>Negative</li> </ul>	SIR	√			
Facilitated access to mutual aid	Intervention			√	
DRW (Drug Recovery Wing)	Intervention			√	
ISFL (Incentivised Substance Free Living)	Intervention			√	
Initial 13-week clinical review undertaken	Episode			√	
Number of days in the 28 days prior to initial reception that the client consumed alcohol.	Episode			√	√
Typical number of units consumed on a drinking day in the 28 days prior to initial reception.	Episode			√	√
Unsuitable housing - Poor condition of the accommodation	TOP/YPOR	√	√		
Unsuitable housing - Location (unsafe)	TOP/YPOR	√	√		
Unsuitable housing - Location (unsuitable)	TOP/YPOR	√	√		
Unsuitable housing - Affordability	TOP/YPOR	√	√		

<b>Data Item</b>	<b>Level</b>	<b>AD</b>	<b>YP</b>	<b>SA</b>	<b>SY</b>
Unsuitable housing - Overcrowding	TOP/YPOR	√	√		
Unsuitable housing – Doesn't meet the needs of the individual	TOP/YPOR	√	√		
Nicotine vape/e-cigarettes use (days)	YPOR		√		
Cannabis vape use (days)	YPOR		√		
Age substance first used: Nicotine vape/e-cigarettes	YPOR		√		
Age substance first used: Cannabis vape	YPOR		√		
Nitrous Oxide use (days)	YPOR		√		
Age substance first used: Nitrous Oxide	YPOR		√		
Benzodiazepines use (days)	YPOR		√		
Age substance first used: Benzodiazepines	YPOR		√

Total number of fields with reference data changes in each dataset			14	5	4	3

# Appendix A: key to NDTMS datasets

AD = adult drug community dataset

YP = young people community dataset

SA = secure setting adult dataset

SY = secure setting young people dataset

Episode = A period of contact with a treatment provider, from referral date to discharge incorporating a set of interventions with a specific care plan.

Intervention = high-level treatment received by client

SIR (Sub-intervention) = specific treatment received by client

CIR (Client Information Review) = contains updateable information for some of the episode level questions, including parental status and children information, BBV information and mental health. CIR questions should be reviewed with the client every 6 months and a full CIR should be returned to NDTMS. One should also be completed on discharge.

TOP (Treatment Outcome Profile) = A set of questions completed with clients at treatment start, every 6 months during treatment and at discharge to review their substance use behaviour and activity in the last 28 days.

YPOR (Young People's Outcome Record) = A set of questions completed with clients at treatment start and at discharge to review their substance use behaviour and activity in the last 28 days.
