

Assuring Transformation

Requirements Specification

Data Alliance Partnership Board

The Data Alliance Partnership Board (DAPB), which holds delegated authority from the Secretary of State for Health and Social Care, has approved a change to an existing information standard for publication under [section 250 of the Health and Social Care Act 2012](#).

Assurance that this information standard meets the requirements of the Act and is appropriate for the use specified in the specification document has been provided by the Data Standards Assurance Service (DSAS) and endorsed by the Data Alliance Partnership Sub Board (DAPSB).

This information standard comprises the following documents:

- Change Specification
- Implementation Guidance
- Requirements Specification (this document)
- Assuring Transformation Data Specification v4.0

An Information Standards Notice (DAPB2007 Amd 18/2022) has been issued as a notification of use and implementation timescales. Please read this alongside the documents for the standard.

The controlled copies of these documents can be found on the [NHS England website](#). Any copies held outside of that area, in whatever format (e.g. paper, email attachment), are considered to have passed out of control and should be checked for currency and validity.

Date of publication: 31 August 2023

Glossary of Terms

Please note that this Glossary applies to the following documents:

- Change Specification
- Requirements Specification (this document)
- Implementation Guidance
- Assuring Transformation Data Specification v4.0

Term	Acronym	What it stands for
Assuring Transformation	AT	Assuring Transformation data collection
Caldicott Guardian		Nominated senior person who oversees information governance.
Care and Treatment Review	C(E)TR	Care, (Education) and Treatment Review
CAP system	CAP	The Clinical Audit Platform. This is a secure data input platform designed specifically to collect data for national audits. It can be accessed here using a single sign-on account.
Commissioning Support Unit	CSU	Commissioning Support Units provide a range of commissioning support services to NHS commissioners, including Integrated Care Boards (ICBs), NHS England, acute trusts and local government.
Data Alliance Partnership Board	DAPB	Empowered by the Health and Social Care Act 2012, the DAPB has delegated responsibility for approving information standards for the health and social care system in England. The DAPB membership is drawn from a range of organisations operating within health and social care.
Data Dictionary	DD	The NHS Data Model and Dictionary provides a reference point for assured information standards to support health care activities within the NHS in England.
Data Template		This is a blank CSV template which can be populated with data for the Assuring Transformation Collection.

Term	Acronym	What it stands for
Integrated Care Boards	ICBs	Integrated Care Boards (ICBs) work within Integrated Care Systems and commission most of the hospital and community NHS services in the local areas for which they are responsible.
Information Standards Notice	ISN	Information Standards Notices (ISNs) are approved by the Data Alliance Partnership Board (DAPB) and published by NHS England to announce new or changes to information standards, with or without data collections.
Mental Health Services Data Set	MHSDS	The MHSDS is a patient level, output based, secondary uses data set which delivers robust, comprehensive, nationally consistent and comparable person-based information for children, young people and adults who are in contact with Mental Health Services.
NHS Digital		<p>NHS Digital was the national information and technology partner to the health and social care system. It used digital technology to transform the NHS and social care.</p> <p>As of 1 February 2023, NHS Digital merged with NHS England to create the new NHS England. NHS England has become the single executive non-departmental government body with responsibility for digital technology, data and health service delivery in the NHS, and has assumed responsibility for all activities previously undertaken by NHS Digital.</p>
NHS England Specialised Commissioning hubs		A Specialised Commissioning Hub is a part of NHS England. Specialised Commissioning Hubs are responsible for leading the commissioning of specialised services, such as Child and Adolescent Health and Care beds; low, medium and high secure beds; and prisons.
Operational Guidance		This provides collection specific guidance on how to use the Clinical Audit Platform.
Organisation Code (Org Code)		The Organisation Code for an organisation can be found via the Organisation Data Service (ODS) web page .
Personal Identifiable data	PID	Personal information about identified or identifiable individuals, including those who have died, such as name, address, postcode, date of birth, NHS number.

Term	Acronym	What it stands for
Provider Collaborative		An NHS-led Provider Collaborative is a group of providers of specialised mental health, learning disability and autism services who have agreed to work together to improve the care pathway for their local population.
Registration document		This is a document required by NHS England to be sent from the submitting organisation's Caldicott Guardian which provides contact details for data submitters who have been approved to handle PID. This information is used to allow users access to the CAP system. This document is available to download from the NHS England Assuring Transformation web page .
Single Sign On Account	SSO	Single Sign-On Account. This is an account which allows the user to access NHS England data submission platforms that they are registered for.
Specialised Commissioning Hubs	SCHub	Specialised Commissioning Hubs commission directly on behalf of NHS England services provided within high, medium and low secure hospitals.

1. Overview

The Assuring Transformation data collection is owned by NHS England who also operate the data collection system, analyse data and publish results.

The Assuring Transformation collection is mandated under the Health and Social Care Act 2012.

This document defines the mandatory patient level Assuring Transformation (AT) Information Standard and Data Collection (DAPB2007). The data is collected using the Clinical Audit Platform (CAP) system. This document summarises the collection and required changes; provides signposting to sources of supporting information and related documentation; and details overarching requirements and conformance criteria.

Standard	
Standard Number	DAPB2007
Standard Title	Assuring Transformation
Description	<p>Assuring Transformation is a data collection that has been developed in response to Transforming Care: A national response to Winterbourne View Hospital and Winterbourne View Review: Concordat: A Programme of Action.</p> <p>The Concordat, published by the Department of Health and Social Care in December 2012, aims to ensure that all people with a learning disability receive the health care and support they need in the most appropriate setting.</p> <p>This data collection monitors the progress of moving people with a learning disability, autism spectrum disorder (hereafter 'autism') or both to community settings.</p> <p>The purpose of the data collection is to ensure that the public reporting on progress to implement the NHS commitments in the Concordat is transparent and robust. Commissioners submit data using NHS England's Clinical Audit Platform (CAP).</p> <p><u>In Scope</u></p> <p>Data should be recorded for each individual person who meets these requirements:</p> <p>an NHS commissioner in England is responsible for commissioning their care,</p>

	<p>and</p> <p>the person is receiving treatment / care in a facility that provides treatment and / or assessment for mental disorders, and is registered by the Care Quality Commission as a hospital, operated by either an NHS or independent sector provider,</p> <p>and</p> <p>the person has an inpatient bed normally designated for the treatment or care of people with a learning disability or a bed designated for mental illness treatment or care,</p> <p>and</p> <p>the person has been diagnosed or is ‘clinically understood’ to have a learning disability and/or to be autistic.</p> <p>If commissioners have not commissioned inpatient care for people who meet the above definition in the relevant period, they will still be required to submit a ‘nil’ return.</p> <p>Note:</p> <p>A patient may also lack a formal diagnosis but be ‘clinically understood’ to have a learning disability or autism. This is where:</p> <ul style="list-style-type: none">• The patient has had a diagnosis of learning disability and/or autism but this has not yet been formally recorded on the patient record.• The patient is towards the end of a diagnostic pathway where there is good evidence to indicate that a clinical diagnosis of a learning disability or autism will be confirmed. <p><u>Out of Scope</u></p> <p>Data should not be recorded for each individual person who meets these requirements:</p> <ul style="list-style-type: none">• People in accommodation not registered with the Care Quality Commission as hospital beds• People in beds for physical healthcare• People who are not clinically understood to have either learning disabilities or autism.
--	---

Applies to	All commissioners of in scope services must comply with this information standard. This includes Integrated Care Boards (ICBs), commissioning support units, Provider Collaboratives and NHS England Specialised Commissioning Hubs.
Release	
Release Number	Amd 18/2022
Release Title	Assuring Transformation v4.0
Changes to the Data Collection for Assuring Transformation v4.0	<p>The amendment to this standard includes changes to the established question and changes set to improve the validity, accuracy and reliability of responses. These include:</p> <p>The addition of new questions relating to:</p> <ul style="list-style-type: none"> • Whether gender identity is the same as at birth • Looked After Children legal status for under 18 year olds • The sex of the ward • Pre-admission Local Area Emergency Protocol (LAEP) date • Annual Health Checks • Self-segregation • If Local Authority and ICS aware of planned discharge / transfer • Clinically ready for discharge and reasons for delayed discharge <p>A question about gender has been removed (and replaced by new questions) to capture more accurate data, two questions about post-admission Care (Education) Treatment Reviews (C(E)TRs) have been removed as the information can be found elsewhere, and a question about whether a patient is on a register has also been removed as the question is no longer relevant.</p> <p>There are also minor changes to validations within the Clinical Audit Platform (CAP) system to improve the robustness of the data when captured, amendments to existing questions to better align Assuring Transformation with the Mental Health Services Data Set (MHSDS) and NHS Data Model and Dictionary, and improvements to guidance provided to submitters.</p> <p>Further details, including the rationale for adding new questions can be found in the Change Specification.</p> <p>A full list of the included data items and changes from v3.0 can be found in the Assuring Transformation Data Specification v4.0 document on the NHS England DAPB2007 web page.</p>

	Assuring Transformation v4.0 replaces Assuring Transformation v3.0, which was published in December 2020 and updated in March 2021.
Implementation Completion Date	<p>Care Commissioners and System Suppliers</p> <p>The Assuring Transformation Data Specification v4.0 document is intended to provide a comprehensive technical view of the data submission. It is an essential document for developers from both data submitters (commissioners) and system suppliers.</p> <p>For each question in the data collection, the Assuring Transformation Data Specification indicates whether it is 'unchanged', 'amended', 'new', 'replaced' or 'removed'.</p> <p>Where data items have not changed in Assuring Transformation from v3.0 to v4.0, the system and care commissioners MUST already be fully conformant.</p> <p>For new and replacement questions (as specified in v4.0), the system and care commissioners MUST start to update patient records in Assuring Transformation from 1st March 2024.</p> <p>Patient records MUST be updated in line with the Assuring Transformation Data Specification v4.0 by 31st March 2024 at the latest to be fully conformant.</p>

1.1. Related documents

A comprehensive set of documents has been developed to assist submitters responsible for the Assuring Transformation Information Standard and Data Collection.

Summary of key documents

Ref #	Title	Definition
The following Information Standard Documentation (documents 1-5 below) is available in the 'Current Release' section on the NHS England DAPB2007 webpage .		
1	Information Standards Notice	Notification of publication of a new or amended standard.
2	Change Specification	Details the changes to the standard / collection required for this release.

Ref #	Title	Definition
3	Implementation Guidance	Guidance to the users on how to implement the collection.
4	Requirements Specification (<i>this document</i>)	Outlines the scope of the collection. Gives an overview of the requirements for both data submitters and system suppliers, and associated conformance criteria (the tests that can be measured to assess whether the standard is being used correctly).
5	Assuring Transformation Data Specification v4.0	Describes the full data collection requirement, showing amendments made in response to this update. Compares AT v3.0 with AT v4.0, detailing question changes.
<p>Technical documentation (documents 6 and 7 below) can be found in the ‘Guidance’ section on the NHS England (former NHS Digital) Assuring Transformation webpage. This will be updated prior to go live of v4.0.</p>		
6	NHS England Assuring Transformation and Assuring Transformation Support webpages	Detailed technical user guidance for submitting data on the Clinical Audit Platform (CAP) system.
7	Registration Form	To register for the AT collection, submitters will need to complete a registration form electronically. One form is required for each organisation.

1.2. Related standards and references

Ref # and title	Definition
DAPB0011: Mental Health Services Data Set (MHSDS)	The AT collection has been aligned with MHSDS where possible, for example through the use of the same data items and national code lists.
NHS Data Model and Dictionary	Assuring Transformation is not currently incorporated into the Data Dictionary, but the collection is aligned with the Data Dictionary as far as possible, i.e. through the use of Data Dictionary data items where equivalent items exist.

2. Introduction

Assuring Transformation is a data collection that was introduced in response to the review of events at Winterbourne View Hospital in 2012. The collection looks at patients with a diagnosed learning disability or autism in an inpatient hospital setting. This data is submitted by Integrated Care Boards (ICBs), Commissioning Support Units (CSUs), Provider Collaboratives and NHS England Specialised Commissioning Hubs. The collection also supports the identification of other areas for improvement.

This collection is mandatory and from February 2015 commissioners, CSUs and specialised commissioning teams have been required to upload their data to the NHS England Clinical Audit Platform (CAP) system.

Assuring Transformation is a live data collection and patient details should be updated in real time. As a minimum, commissioners are required to update data once per month for individuals who are in scope of Assuring Transformation. Data are published on a monthly basis by NHS England. Monthly data extracts and weekly management information is generated and used for performance monitoring, planning and operation management purposes. More information is available on [the NHS England reporting webpage](#).

Background

The Department of Health and Social Care published [Transforming Care: A national response to Winterbourne View Hospital](#) and the [Concordat: Programme of Action](#) in December 2012. The first document describes the facts about Winterbourne View, the changes needed in the system and looks at what the Government needs to do based on the lessons learnt. The review of services received indicated that failings were widespread within the operating organisation but importantly also evident across the wider care system. The Concordat and sixty-three actions detailed within the review seek to address poor and inappropriate care and achieve the best outcomes for people with a learning disability and autistic people who have a mental health disorder.

Since then, NHS England has published [Building the Right Support](#), which gives commissioners a clear framework to develop more community services for people with learning disabilities and/ or autistic people who have a mental health disorder, and reduce reliance on inpatient care.

The purpose of this data collection is to ensure that the public reporting on progress to implement the NHS commitments in the Winterbourne View Concordat is transparent and robust. This data collection also enables NHS England to measure its progress against

commitments in [the NHS Long Term Plan](#) around quality of care and reducing reliance on inpatient care.

It is an accepted principle that services should be local, care and treatment should be appropriate and there should be a substantial and sustained reduction in hospital placements. Data from this collection will be used to monitor progress towards and inform compliance with these goals.

Structure of the data/collection

The collection comprises inpatients with ‘a bed’ normally designated for the treatment or care of people with a learning disability or those with ‘a bed’ designated for mental illness treatment or care who have been diagnosed or are clinically understood to have a learning disability and/or are autistic.

Data is provided by English commissioners and healthcare is typically provided in England (although care commissioned in England and provided elsewhere in the UK will not be excluded).

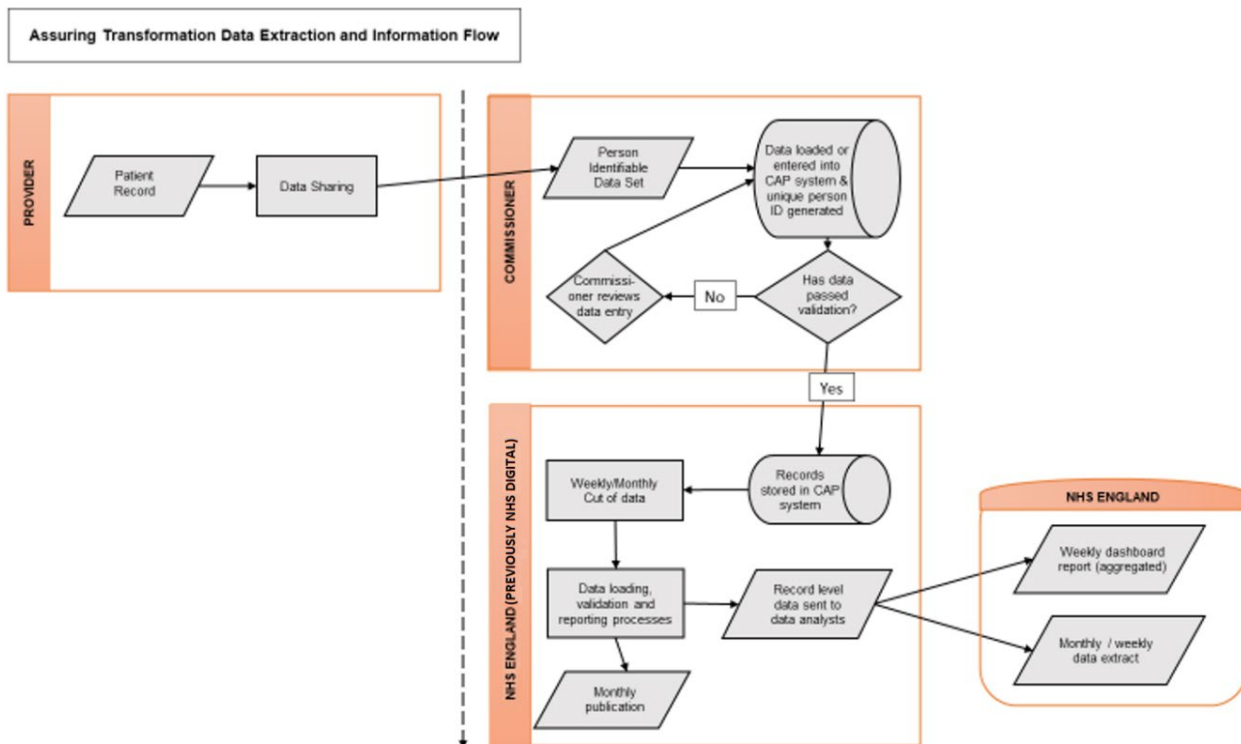

Data is collected from Integrated Care Boards (ICBs), Provider Collaboratives and NHS England Specialised Commissioning Hubs. In some cases Clinical Support Units (CSUs) submit data on behalf of one of more ICBs.

NHS England publishes aggregate results on a monthly basis. More information is available on [the NHS England reporting webpage](#).

Further detail and instruction are included in the Implementation Guidance, Change Specification and Assuring Transformation Data Specification v4.0 documents on [the NHS England DAPB2007 webpage](#) (see also above section: ‘Summary of Key Documents’).

Data flow diagram

The following diagram demonstrates the high-level data extraction and information flow process for the collection of Assuring Transformation data. This shows the flow from Provider organisations to Commissioners of Learning Disability Services, the flow from Commissioners to NHS England, the validation and reporting processes and the flow of management information and data to NHS England.

Submission of records

ICBs, NHS England Specialised Commissioning Hubs (SC Hubs) and Provider Collaboratives are expected to keep records up to date on an ongoing basis. If no records have been altered (due to no change in patient circumstances) then the ICB / Specialised Commissioning Hub / Provider Collaborative should select the ‘submission confirmation’ option to confirm that their data is correct for this period.

Changes to the collection/questions

There have been a number of changes to the Assuring Transformation collection, including new and amended questions and the removal of questions previously included. Full details of the changes are detailed in the Change Specification and the Assuring Transformation Data Specification v4.0 document on the [Information Standards and Collection webpage](#).

User guidance is available on the [NHS England Assuring Transformation webpage](#).

3. Health and care organisations

The following NHS commissioners are responsible for ensuring the completion of the data collection:

- NHS Integrated Care Boards
- Provider collaboratives
- NHS England Specialised Commissioning Hubs for some secure mental health and child and adolescent mental health inpatient services.

The data return must be completed by the commissioning organisation **ONLY**.

The collection may be completed on behalf of an NHS commissioner by a Commissioning Support Unit (CSU) or other commissioners in a pooled budget.

If the collection is being completed by a Commissioning Support Unit (CSU) on behalf of an Integrated Care Board (ICB), the CSU should complete a separate return for each ICB that is contributing to the pooled budget.

NHS England specialised mental health commissioning teams should submit one return for each team.

Each Provider Collaborative should complete a separate return.

Please note: A separate return has to be completed for each commissioning organisation that has the statutory responsibility for commissioning the care for all relevant patients.

For pooled budget arrangements, one commissioner only must take responsibility for returning the patient's data.

If you are a commissioner and someone for whom you have a statutory duty to commission care meets the definition, then a return is needed for your organisation.

The in-scope definition is:

The collection will consider inpatients receiving treatment / care in a facility registered by the Care Quality Commission as a hospital operated by either an NHS or independent sector provider. The facility will provide treatment and / or assessment for mental disorders. Record level returns will reflect only inpatients or individuals on leave with a bed held vacant for them.

The individual will have 'a bed' normally designated for the treatment / care of people with a learning disability or will have 'a bed' designated for mental illness treatment / care and will be diagnosed or clinically understood to have a learning disability and / or autism.

This should include patients of:

- Any age
- Any level of security (general/low/medium/high)
- Any status under the Mental Health Act (information of detained)

People not included:

- People in accommodation not registered with the CQC as hospital beds.
- People in beds for physical health care.
- People who do not have either a learning disability or autism.

The NHS England data collection team has received a number of queries about this definition, which have asked whether people should only be included if they have a 'primary diagnosis of Learning Disability'. The guidance from NHS England's National Clinical Director for Learning Disability is as follows:

Whether or not a person is recorded as having a primary diagnosis of learning disability or autism is not relevant and should not be used as a criterion for inclusion in this data collection. If a person is in a specialist hospital bed (either mental health or learning disability) and that person has a Learning Disability or autism, then that person is included in the Assuring Transformation data return.

Download of data

A cut of the data in the Clinical Audit Platform (CAP) will be taken at midnight on the last day of every week and month. This is not dependent on working days.

3.1. Requirements

Requirements	
1	<p>In Scope Commissioners MUST be fully conformant with the Assuring Transformation requirements and guidance, including the capture and flow of the data items to the Clinical Audit Platform (CAP). Further information is available on the NHS England Assuring Transformation webpage.</p> <p>From 1 March 2024, in scope commissioners as defined in this Information Standard MUST start to update patient records in Assuring Transformation in line with the Assuring Transformation Data Specification v4.0.</p> <p>Patient records must be fully updated in line with the Assuring Transformation Data Specification v4.0 by 31 March 2024.</p>
Scoping	
2	<p>The review of the ‘in scope’ and ‘out of scope’ sections of this collection specification MUST be carried out by the organisational Commissioning lead for Learning Disability and Autism.</p>
Feasibility Assessment	
3	<p>Commissioners MUST review the Implementation Guidance and Assuring Transformation Data Specification v4.0 which defines the patient-level data items that require submission onto the Clinical Audit Platform.</p> <p>The Implementation Guidance and Assuring Transformation Data Specification v4.0 provides additional information on data items in the collection. Commissioners MUST review these documents to better understand the scope, national guideline recommendations, definitions and rules underpinning the data items.</p>
4	<p>Commissioners are responsible for gathering the data for entry onto the CAP. The data submission process MUST meet the specifications defined in the Implementation Guidance, Assuring Transformation Data Specification v4.0 and associated user guidance.</p>
5	<p>The Commissioners SHOULD be familiar with the collection as this has already been collected by NHS England (and previously NHS Digital) since 2015. The data submission process MUST meet the specifications defined in the Implementation Guidance, Assuring Transformation Data Specification v4.0 and associated user guidance.</p>
Constructing a data submission file	
6	<p>It is not stipulated how data should be collected locally; therefore, data MAY come from several sources or from a local data warehouse, which collates information from various systems. For this reason we have provided a CSV data template</p>

	which can be populated with data, to be submitted and accepted by the CAP system.
7	<p>Commissioners MUST review the Implementation Guidance, Assuring Transformation Data Specification v4.0 and user guidance to understand how a data submission is to be constructed and transferred. There is also a data template available on the NHS England Assuring Transformation webpage. This data template can be used to upload data into the CAP system once it has been populated with their information.</p> <p>All records MUST be submitted as per instructions laid out in the Implementation Guidance, Assuring Transformation Data Specification v4.0 and user guidance.</p>
8	<p>Commissioners MUST ensure that the CAP is updated <u>as soon as patient details change</u>. CAP is a live system.</p> <p>If there have been no amendments within the month, then the Commissioners MUST use the system and press the Submission Confirmation button to confirm that there are no amendments for the month - enabling data from that commissioning organisation to be included in analysis.</p> <p>NB: questions on use of restrictive intervention, seclusion and segregation in the previous month (see Data Specification v4.0) require data entry for all open patient records.</p> <p>Commissioners MUST observe the collection schedule that will be published in advance on the NHS England Assuring Transformation webpage.</p>
Access to the Clinical Audit Platform	
9	<p>The Commissioners MUST register for access to the Clinical Audit Platform. For further information please see the AT registration form on the NHS England Assuring Transformation webpage.</p> <p>Registration MUST be based on current organisation details.</p> <p>All Commissioners MUST submit data through the Clinical Audit Platform. The CAP system does not require a Health and Social Care Network (HSCN) connection but does require internet access.</p>
10	<p>The Commissioners MUST resolve inherent errors and address data quality issues. The CAP system will identify any data which does not pass the validation criteria. As such it is impossible for Commissioners to submit data which does not pass the validation criteria.</p>
Issues and maintenance	
11	<p>To support the implementation of this Information Collection, Commissioners SHOULD highlight any persistent issues to the NHS England Assuring Transformation data team (please include 'FAO Assuring Transformation' in the subject line).</p>

	This feedback mechanism provides appropriate information to developers to improve the implementation and data collection processes for future consideration towards a data set change or, indeed, further implementation phases.
--	--

3.2. Conformance criteria

The submission process includes data validation tests to ensure the data is of sufficient quality – submitters **MUST** ensure that data is conformant with the type specified according to the Assuring Transformation Data Specification v4.0 document. The presence of any records that do not conform to the collection specification and corresponding data validation rules will lead to the record being rejected and subject to revised data processing until such point that uploads will be achievable via the system. Submitters **MUST** continue to revise and resubmit data until such point that it is accepted by the CAP system.

Validations are described in the Assuring Transformation Data Specification v4.0 document. Data Submitters **MUST** reference this in order to correct errors.
