Type:	Change Request
Reference:	1612
Version No:	1.0
Subject:	Introduction of Devices Patient Level Contract Monitoring Data Set
Effective Date:	1 April 2019
Reason for Change:	Change to Information Standards
Publication Date:	29 April 2019

Background:

The Devices Patient Level Contract Monitoring Data Set enables the interchange, in a uniform format of monthly patient level device contract monitoring data between all purchasers and health care providers. This will ensure that device contract monitoring and reporting is consistent, comparable and fit for purpose across all commissioning organisations.

The Devices Patient Level Contract Monitoring Data Set is a patient level report containing patient identifiers relating to high cost tariff excluded medical devices. Its purpose is to substantiate and provide detail to the information contained within the Aggregate Contract Monitoring Data Set (ACM).

The scope of the Devices Patient Level Contract Monitoring Data Set is all NHS-funded medical devices not reimbursed through the National Tariff Payment System, as defined in the NHS Improvement National Tariff Payment System High Cost Devices list and any high cost devices not associated with a National Tariff, provided to patients for all NHS commissioners.

This covers:

- All acute and community NHS and Independent Sector Healthcare Provider secondary care providers, but not primary care, from whom the NHS commissions healthcare
- All NHS commissioners (Clinical Commissioning Groups or their equivalents and NHS England).

The Devices Patient Level Contract Monitoring Data Set is submitted on a monthly basis to the respective Data Services for Commissioners Regional Office (DSCRO) as nominated by each commissioning function in line within schedule 6 of the NHS Standard Contract.

This Change Request adds the Devices Patient Level Contract Monitoring Data Set and supporting definitions to the NHS Data Model and Dictionary to support the Information Standard.

Introduction

The purpose of the Devices Patient Level Contract Monitoring Data Set (DePLCM) is to enable the interchange, in a uniform format, of monthly PATIENT level device Contract Monitoring data between all purchasers and Health Care Providers. This will ensure that device Contract Monitoring and reporting is consistent, comparable and fit for purpose across all commissioning Organisations.

The Devices Patient Level Contract Monitoring Data Set is a PATIENT level report containing PATIENT identifiers relating to High Cost Tariff Excluded Devices. Its purpose is to substantiate and provide detail to the information contained within the Aggregate Contract Monitoring Data Set (ACM).

NHS NUMBER

Change to Attribute: Changed Dataset

The [NHS NUMBER](#), the primary identifier of a [PERSON](#), is a unique identifier for a [PATIENT](#) within the NHS in England and Wales.

This will not vary by any [Organisation](#) of which a [PERSON](#) is a [PATIENT](#).

It is mandatory to record the [NHS NUMBER](#). There are exceptions, such as Accident and Emergency care, sexual health and major incidents, as defined in existing national policies.

The [NHS NUMBER](#) is 10 numeric digits in length. The tenth digit is a check digit used to confirm its validity. The check digit is validated using the Modulus 11 algorithm and the use of this algorithm is mandatory. There are 5 steps in the validation of the check digit:

Step 1 Multiply each of the first nine digits by a weighting factor as follows:

Digit Position

(starting from the left) Factor:

1	10
2	9
3	8
4	7
5	6
6	5
7	4
8	3
9	2

Step 2 Add the results of each multiplication together.

Step 3 Divide the total by 11 and establish the remainder.

Step 4 Subtract the remainder from 11 to give the check digit.

If the result is 11 then a check digit of 0 is used. If the result is 10 then the [NHS NUMBER](#) is invalid and not used.

Step 5 Check the remainder matches the check digit. If it does not, the [NHS NUMBER](#) is invalid.

Further guidance is available from the [NHS Digital](#) website at: [NHS Number](#).

Note:

This was [e-GIF](#) approved for use in NHS England.

[e-GIF](#) and the [Government Data Standards Catalogue](#) **have been archived** and are available for reference only.

Notes:

- Codes for Executive Agency, Executive Agency Programme, Executive Agency Site and Executive Agency Programme Department do not easily fit into the coding frames as shown above and are therefore not included. This is due to their unusual structure in that there are more hierarchical 'tiers' than with other organisations.

Executive Agency and Executive Agency Programme are both considered Organisation level entities, although each Programme does have a relationship to an Executive Agency. Executive Agency codes are three characters long. Executive Agency Programme codes are six, and their first three characters are the same as the Executive Agency they are associated to.

Department codes of eight characters long can then be allocated underneath a Programme code (sharing the first six characters). Executive Agency Site codes of five characters long can be allocated under an Executive Agency code (and share the first three characters).

- A-9 indicates that characters A-Z and 0-9 are valid: except B, I, O, S, U and Z (to avoid ambiguity). This applies to all [ORGANISATION CODES](#) in the Coding Format Table above except [Independent Sector Healthcare Providers \(ISHP\)](#).

Table 2: CODING FORMATS FOR ORGANISATIONS IN SCOTLAND
