

Corrigendum

Standard	DAPB0011 Mental Health Services Data Set
Release	Amd 37/2022, Version 6.0
Date of ISCE publication	6 July 2023
Date of Corrigendum	6 February 2024

Background

The current release of DAPB0011 Mental Health Services Data Set (MHSDS) was published on 6 July 2023. Since then the need for minor corrections to the data set have been identified. A summary is provided below.

Note that an updated Technical Output Specification (TOS) has been issued and should be read in conjunction with this Corrigendum.

The following documents have also been updated to reflect the changes:

- NHS Data Model and Dictionary Change Request
- MHSDS V6.0 Change Specification

Summary

Nine corrections are required across the **Technical Output Specification** and **Change Specification** as follows:

1. The format for a total of 14 SNOMED CT data items has changed, with 11 data items reverting back to the format which was used within MHSDS V5.0, and updates to 3 new data items which were introduced in V6.0.

Context: The format of a number of SNOMED CT data items were changed for V6.0 of the MHSDS to allow post-coordinated expressions to be submitted. However, during a review by the testing and development teams, they advised that there were a number of constraints which prevented the implementation of validations for post-coordinated expressions using the an4000 format. As such the testing and development teams have requested that we revert them back to the formats which were used in V5.0. The approach for submitting post-coordinated expressions will be revisited for V7.0.

The full list of SNOMED CT data items, name changes, format changes and the tables they relate to, are outlined in table 1.0 below. The three items introduced in V6.0 are shaded grey.

Note – The NHS Data Model and Dictionary team have suggested that some of the data item names need to change to align with Data Dictionary. The entries in the first column, show all the updated names.

2. Case changes to **Intermediate Database (IDB) Element Name**

Amendments to make 'ID' consistent across the IDB names in the MHSDS TOS and IDB. This involves a change of case from CamelCase 'Id' to UPPER CASE 'ID'. Changes are detailed in the change control in the TOS.

3. In **MHS101 Service or Team Referral (MHS101Referral)**

The data item 'Care Professional Local Identifier' data item (M101925) is no longer required in the MHS101 table. This data item had been mistakenly left in this table during the drafting process, and as such, now needs to be removed.

4. In **MHS101 Service or Team Referral (MHS101Referral)** and **MHS102 Other Service or Team Type (MHS102OtherServiceType)**

With the introduction of table MHS102 Other Service or Team Type, it has come to our attention that there is no longer the means to record rejected referrals or the reason why a referral is closed within the MHS101 table. This would mean that rejections to the primary service referral cannot be captured, for example a referral from Primary Care which is deemed inappropriate.

As such, we have introduced the following four required data items into the MHS101 table:

- Referral Rejection Date (M101210)
- Referral Rejection Time (M101220)
- Referral Rejection Reason (M101230)
- Referral Closure Reason (M101240)

5. In **MHS102 Other Service or Team Type (MHS102OtherServiceType)**

The data item 'CARE PROFESSIONAL TEAM LOCAL IDENTIFIER (OTHER SERVICE OR TEAM)' (M102910) has been amended from required (R) to mandatory (M).

6. In **MHS204 Indirect Activity** (MHS204IndirectActivity)

The data item 'INDIRECT ACTIVITY PERSON CONSULTED TYPE (M204012) has had a national code change from one to two digits, for example 01 instead of 1.

7. In **MHS502 Ward Stay** (MHS502WardStay)

The data item 'MENTAL HEALTH ADMITTED PATIENT CLASSIFICATION TYPE' (M502120) format has been amended from an2 to an3.

8. In **MHS609 Presenting Complaint** (MHS609PresComp) the national codes for data item FINDING SCHEME IN USE (MENTAL HEALTH) (M609020) were incorrectly entered as 02 and 06. They have been updated to be 01 and 04.

9. In **MHS903 Ward Details** (MHS903WardDetails) the IDB name for data item ORGANISATION SITE IDENTIFIER (OF WARD) (M903020) has been updated from SiteIDOfTreat to SiteIDOfWard.

Table 1.0 | *Note: The name and/or format has reverted to that used in v5.0

UID	Updated NHS Data Model and Dictionary Name (in v6.0.1)	Format used for v6.0.1	Initial NHS Data Model and Dictionary Name (in v6.0)	Format used for v6.0
M010010	*ASSISTIVE TECHNOLOGY FINDING (SNOMED CT)	*min n6 max n18	ASSISTIVE TECHNOLOGY FINDING (SNOMED CT EXPRESSION)	min an6 max an4000
M011020	*SOCIAL AND PERSONAL CIRCUMSTANCE (SNOMED CT)	*min n6 max n18	SOCIAL AND PERSONAL CIRCUMSTANCE (SNOMED CT EXPRESSION)	min an6 max an4000
M014020	eMED3 FIT NOTE CONDITION (SNOMED CT)	min n6 max n18	eMED3 FIT NOTE CONDITION (SNOMED CT EXPRESSION)	min an6 max an4000
M105100	REFERRAL PROCEDURE (SNOMED CT EXPRESSION)	*min an6 max an56	REFERRAL PROCEDURE (SNOMED CT EXPRESSION)	min an6 max an4000
M202060	*CODED FINDING (CODED CLINICAL ENTRY)	*min an4 max an18	FINDING (CODED CLINICAL ENTRY)	min an4 max an4000
M202080	*CODED OBSERVATION (SNOMED CT)	*min n6 max n18	OBSERVATION (SNOMED CT EXPRESSION)	min an6 max an4000
M202110	PROCEDURE (SNOMED CT EXPRESSION)	*min an6 max an56	PROCEDURE (SNOMED CT EXPRESSION)	min an6 max an4000
M204090	*CODED FINDING (CODED CLINICAL ENTRY)	*min an4 max an18	FINDING (CODED CLINICAL ENTRY)	min an4 max an4000
M204100	INDIRECT ACTIVITY PROCEDURE (SNOMED CT EXPRESSION)	*min an6 max an56	CODED INDIRECT ACTIVITY PROCEDURE AND PROCEDURE STATUS (SNOMED CT)	min an6 max an4000
M205060	PATIENT SELF-DIRECTED DIGITAL INTERVENTION PROCEDURE (SNOMED CT EXPRESSION)	min an6 max an56	PATIENT SELF-DIRECTED DIGITAL INTERVENTION PROCEDURE (SNOMED CT EXPRESSION)	min an6 max an4000
M601010	PREVIOUS DIAGNOSIS (CODED CLINICAL ENTRY)	*min an4 max an18	PREVIOUS DIAGNOSIS (CODED CLINICAL ENTRY)	min an4 max an4000
M604010	PRIMARY DIAGNOSIS (CODED CLINICAL ENTRY)	*min an4 max an18	PRIMARY DIAGNOSIS (CODED CLINICAL ENTRY)	min an4 max an4000
M605010	SECONDARY DIAGNOSIS (CODED CLINICAL ENTRY)	*min an4 max an18	SECONDARY DIAGNOSIS (CODED CLINICAL ENTRY)	min an4 max an4000
M609030	PRESENTING COMPLAINT (CODED CLINICAL ENTRY)	min an4 max an18	PRESENTING COMPLAINT (CODED CLINICAL ENTRY)	min an4 max an4000

Editorial changes

The following editorial changes have been made to the published documents in parallel with the corrections above but fall outside the scope of this Corrigendum. They are presented here for information.

1. A Document Guidance tab has been added to the Technical Output Specification.
2. A National Code Unique Identifier (UID) column (column G), has been added to each of the tables in the Technical Output Specification.
The National Code UIDs for a number of data items had been entered erroneously in v6.0.0 of the Enhanced Technical Output Specification. These codes are used only in the change control of the TOS for the purpose of identifying changes to national codes. Some examples are as follows:

Correct data item UID	Example Incorrect data item UID in national code ID	Updated national code UID
M101030	M101190_A1	M101030_A1
M101050	M101180_A01	M101050_A01
M101070	M101180_1	M101070_1
M101080	M101180_01	M101080_01
M101140	M101180_10	M101140_10

3. A minor editorial correction has been made to the Implementation Guidance (see section 2.4 Related documents) to ensure the descriptions of Technical Output Specification (TOS) and Enhanced Technical Output Specification (ETOS) are clear.

More information

The controlled version of this Corrigendum is published alongside the current publication documents on the NHS England website:

<http://digital.nhs.uk/isce/publication/dapb0011>

Any questions about these changes should be sent to the developers of the Mental Health Services Data Set (MHSDS) at NHS England enquiries@nhsdigital.nhs.uk (quote 'MHSDS' in subject line).
