

NHS Data Model and Dictionary

Type:	Change Request
Reference:	1872
Version No:	2.0
Subject:	Mental Health Services Data Set (MHSDS) Version 6
Effective Date:	1 April 2024
Reason for Change:	Change to Information Standards
Publication Date:	4 December 2023

Background:

Original Change Request Version 1:

The Mental Health Services Data Set Version 5 was approved by the Data Coordination Board (DCB) as [DCB0011: Mental Health Services Data Set](#).

A number of changes have been identified since the last version, and the Mental Health Services Data Set Version 6 includes:

- Retirement of data items and tables that are no longer required, including:
 - Care Cluster
 - Clustering Tool Assessment
 - Coded Scored Assessment (Clustering Tool)
 - Delayed Discharge
 - Five Forensic Pathways
 - Medication Prescription
 - Mental Health Currency Model
 - Provisional Diagnosis
- Addition of new data tables to capture:
 - Clinically Ready for Discharge
 - EMED3 Fit Note
 - Presenting Complaints
 - Self-Directed Digital Intervention
 - Service or Team Details
 - Ward Details
- Review and update of tables following feedback and consultation
- National Codes updated to better reflect the delivery of care
- Minor amendments to ensure alignment with the NHS Data Model and Dictionary.

To support the Information Standard, this Change Request updates the NHS Data Model and Dictionary to introduce the Mental Health Services Data Set Version 6.

Corrigendum Change Request Version 2:

A number of amendments to the Mental Health Services Data Set Version 6.0 have been identified since the current release was published.

These changes have been identified and comprise of amendments to SNOMED CT items and the removal / addition of data items.

Version 2 of the Change Request includes the changes as described in the [Mental Health Services Data Set version 6 corrigendum](#).

A short demonstration is available which describes "How to Read an NHS Data Model and Dictionary Change Request", in an easy to understand screen capture including a voice over and readable captions. This demonstration can be viewed at: https://datadictionary.nhs.uk/elearning/change_request/index.html.

AUTISM

Change to Supporting Information: Changed Description

[Autism](#) is a ~~DISABILITY~~. [Autism](#) is a PATIENT DIAGNOSIS.

[Autism](#) is defined as a lifelong condition that affects how a [PERSON](#) communicates with, and relates to, other people. [Autism](#) also affects how a [PERSON](#) makes sense of the world around them.

A [PATIENT DIAGNOSIS](#) of [Autism](#) may result in the [PATIENT](#) having a [DISABILITY](#).

The three main areas of difficulty, which all people with [Autism](#) share, are known as the 'triad of impairments'. They are [They are:](#)

- difficulty with social communication (e.g. problems using and understanding verbal and non-verbal language, such as gestures, facial expressions and tone of voice)
- difficulty with social interaction (e.g. problems in recognising and understanding other people's feelings and managing their own feelings)
- difficulty with social imagination (e.g. problems in understanding and predicting other people's intentions and behaviour and imagining situations outside their own routine)

CONSULTANT EPISODE (HOSPITAL PROVIDER)

Change to Supporting Information: Changed Description

A [Consultant Episode \(Hospital Provider\)](#) is an [ACTIVITY GROUP](#).

A [Consultant Episode \(Hospital Provider\)](#) is the time a [PATIENT](#) spends in the continuous care of one [CONSULTANT](#) using [Hospital Site](#) or [Care Home](#) bed(s) of one [Health Care Provider](#) or, in the case of shared care, in the care of two or more [CONSULTANTS](#). Where care is provided by two or more [CONSULTANTS](#) within the same episode, one [CONSULTANT](#) will take overriding responsibility for the [PATIENT](#) and only one [Consultant Episode \(Hospital Provider\)](#) is recorded. Additional [CONSULTANTS](#) participating in the care of [PATIENTS](#) are defined as [Shared Care Consultants](#). A [Consultant Episode \(Hospital Provider\)](#) includes those episodes for which a [GENERAL MEDICAL PRACTITIONER](#) is acting as a [CONSULTANT](#).

A [PATIENT](#) going on [Home Leave](#), or [Mental Health Leave of Absence](#) for 28 days or less, or has a current period of [Mental Health Absence Without Leave](#) of 28 days or less, does not interrupt the [Consultant Episode \(Hospital Provider\)](#).

A [PATIENT](#) may not have concurrent [Consultant Episodes \(Hospital Provider\)](#) but can have [Consultant Out-Patient Episodes](#) overlapping with a [Consultant Episode \(Hospital Provider\)](#). A [Consultant Episode \(Hospital Provider\)](#) must not overlap with a [Nursing Episode](#) for the same [PATIENT](#).

Any time spent as a [LODGED PATIENT](#) before being admitted to a [WARD](#) is included in the first [Consultant Episode \(Hospital Provider\)](#).

A [CONSULTANT](#) transfer occurs when the responsibility for a [PATIENT](#) transfers from one [CONSULTANT](#) (or [GENERAL MEDICAL PRACTITIONER](#) acting as a [CONSULTANT](#)) to another within a [Hospital Provider Spell](#). In this case one [Consultant Episode \(Hospital Provider\)](#) will end and another one begin.

A transfer of responsibility may occur from a [CONSULTANT](#) to the [PATIENT](#)'s own [GENERAL MEDICAL PRACTITIONER](#) (not acting as [CONSULTANT](#)) with the [PATIENT](#) still in a [WARD](#) or [Care Home](#) to receive nursing care. In this case the [Consultant Episode \(Hospital Provider\)](#) will end and a [Nursing Episode](#) will begin.

A transfer of responsibility from the [PATIENT](#)'s own [GENERAL MEDICAL PRACTITIONER](#) to a [CONSULTANT](#) while the [PATIENT](#) is in a [WARD](#) or [Care Home](#) for nursing care will end the [Nursing Episode](#) and begin a [Consultant Episode \(Hospital Provider\)](#).

During the [Consultant Episode \(Hospital Provider\)](#) a number of [Patient Procedures](#) and [PATIENT DIAGNOSES](#) may be recorded.

If this is the first episode under a [CONSULTANT](#) in one of the psychiatric specialties within the [Hospital Provider Spell](#), the appropriate [PSYCHIATRIC PATIENT STATUS CODE](#) should be recorded.

~~There may be one or more [Mental Health Delayed Discharge Periods](#) recorded during a [Consultant Episode \(Hospital Provider\)](#) under a [CONSULTANT](#) in one of the psychiatric specialties (see [MAIN SPECIALTY CODE \(MENTAL HEALTH\)](#)). There may be one or more [Mental Health Clinically Ready for Discharge Periods](#) recorded during a [Care Professional Admitted Care Episode](#) in one of the psychiatric specialties (see [MAIN SPECIALTY CODE \(MENTAL HEALTH\)](#)).~~

HOSPITAL PROVIDER SPELL

Change to Supporting Information: Changed Description

A [Hospital Provider Spell](#) is an [ACTIVITY GROUP](#).

A [Hospital Provider Spell](#) is the total continuous stay of a [PATIENT](#) using a [Hospital Bed](#) on premises controlled by a [Health Care Provider](#) during which medical care is the responsibility of one or more [CONSULTANTS](#), or the [PATIENT](#) is receiving care under one or more [Nursing Episodes](#) or [Midwife Episodes](#) in a [WARD](#). During [Nursing Episodes](#) and [Midwife Episodes](#) general medical care is the responsibility of their own [GENERAL MEDICAL PRACTITIONER](#), who is not acting as a [CONSULTANT](#). The [Hospital Provider Spell](#) may be as a result of an [ELECTIVE ADMISSION LIST ENTRY](#).

During the [Hospital Provider Spell](#), the [PATIENT](#) may be subject to more than one [ADMINISTRATIVE CATEGORY PERIODS](#). The [PATIENT](#) may be subject to one or more [CRITICAL CARE PERIODS](#).

The [Hospital Provider Spell](#) starts when a [CONSULTANT](#), [NURSE](#) or [MIDWIFE](#) assumes responsibility for care following the [DECISION TO ADMIT](#) the [PATIENT](#). This may be before formal admission procedures have been completed and the [PATIENT](#) transferred to a [WARD](#). For example, if a [PATIENT](#) is brought into hospital as an emergency and dies in the [OPERATING THEATRE](#) before being transferred to a [WARD](#), the [PATIENT](#) would have started a [Hospital Provider Spell](#).

In some circumstances a [PATIENT](#) may take [Home Leave](#), or [Mental Health Leave of Absence](#) for a period of 28 days or less, or have a current period of [Mental Health Absence Without Leave](#) of 28 days or less, which does not interrupt the [Hospital Provider Spell](#), [Consultant Episode \(Hospital Provider\)](#), [Nursing Episode](#), [Midwife Episode](#) or [Hospital Stay](#). In some circumstances a [PATIENT](#) may take Home Leave, or Mental Health Leave of Absence for a period of 28 days or less, or have a current period of Mental Health Absence Without Leave of 28 days or less, which does not interrupt the [Hospital Provider Spell](#), [Consultant Episode \(Hospital Provider\)](#), [Care Professional Admitted Care Episode](#), [Nursing Episode](#), [Midwife Episode](#) or [Hospital Stay](#).

Each admission as part of a series of regular day/night admissions generates a separate [Hospital Provider Spell](#) and [Consultant Episode \(Hospital Provider\)](#). An admission is the start of the [PATIENT](#)'s [Hospital Provider Spell](#) and the first [Consultant Episodes \(Hospital Provider\)](#), [Midwife Episode](#) or [Nursing Episode](#) within the spell. If the [PATIENT](#) is on a [Hospital Site](#) the admission will also start the first [Hospital Stay](#) and, unless the [PATIENT](#) has to spend time as a [LODGED PATIENT](#), the admission will also start the first [Ward Stay](#) within that [Hospital Provider Spell](#). If the [PATIENT](#) is in a [Care Home](#) the admission will start the first [Care Home Stay \(Consultant Care\)](#) within the [Hospital Provider Spell](#). Any admission of a [PERSON](#) liable to be detained under the Mental Health Act 1983 cannot be in a [Care Home](#) and must be a [Hospital Provider Spell](#).

A discharge will be the end of the last [Consultant Episode \(Hospital Provider\)](#), [Midwife Episode](#) or [Nursing Episode](#), and the end of the last [Care Home Stay \(Consultant Care\)](#) or [Hospital Stay](#) and [Ward Stay](#) within that [Hospital Provider Spell](#). A discharge will be the end of the last [Consultant Episode \(Hospital Provider\)](#), [Care Professional Admitted Care Episode](#), [Midwife Episode](#) or [Nursing Episode](#), and the end of the last [Care Home Stay \(Consultant Care\)](#) or [Hospital Stay](#) and [Ward Stay](#) within that [Hospital Provider Spell](#).

If there is any time spent as a [LODGED PATIENT](#) before transfer to a [WARD](#) this is included in the [Hospital Provider Spell](#).

A [Hospital Provider Spell](#) starts with a [Hospital Provider](#) admission and ends with a [Hospital Provider](#) discharge.

There may be one or more [Mental Health Delayed Discharge Periods](#) recorded for any [Consultant Episode \(Hospital Provider\)](#) within the [Hospital Provider Spell](#). There may be one or more [Mental Health Clinically Ready for Discharge Periods](#) recorded for any [Care Professional Admitted Care Episode](#) within the [Hospital Provider Spell](#).

LEARNING DISABILITY

Change to Supporting Information: Changed Description

A [Learning Disability](#) (formerly known as a [Mental Handicap](#) and referred to as an [Intellectual Disability](#)) is a type of [DISABILITY](#). A [Learning Disability](#) (formerly known as a [Mental Handicap](#) and referred to as an [Intellectual Disability](#)) is a [PATIENT DIAGNOSIS](#).

A [Learning Disability](#) usually has a significant impact on a [PERSON](#)'s life. A [PERSON](#) with a [Learning Disability](#) finds it harder than others to learn, understand and communicate.

A [PATIENT DIAGNOSIS](#) of a [Learning Disability](#) may result in the [PATIENT](#) having a [DISABILITY](#).

People with Profound and Multiple [Learning Disabilities](#) need full-time help with every aspect of their lives, including eating, drinking, washing, dressing and toileting etc.

[Learning Disability](#) includes the presence of a significantly reduced ability to understand new or complex information, to learn new skills (impaired intelligence), with

- a reduced ability to cope independently (impaired social functioning)
- which started before adulthood, with a lasting effect on development.

Further information regarding people covered by definition can be found in the document '[Valuing People: A New Strategy for Learning Disability for the 21st Century](#)'.

Although, from a social care perspective, an Intelligence Quotient (IQ) of seventy or less is not sufficient reason for deciding if an individual should be provided with additional health and social care support, the following definition is applied within the [Mental Health Services Data Set](#) in the specific circumstance where data providers do not have an explicit data item to capture whether a [PATIENT](#) has a [Learning Disability](#).

Someone is considered to have a [Learning Disability](#) when they function at a level of intellectual ability which is significantly lower than their chronological age. This is usually considered to be equivalent to having an IQ of seventy or less:

- Mild [Learning Disability](#) (roughly equivalent to an IQ of fifty to seventy) is comparable to the educational term 'Moderate [Learning Difficulty](#)'. It is usually caused by a combination of restricted learning and social opportunities plus a high rate of low to average intellectual ability and [Learning Disability](#) in close relatives.
- Moderate-to-profound [Learning Disability](#) (roughly equivalent to an IQ below fifty) is comparable to the educational term 'Severe [Learning Difficulty](#)'. It usually has a specific biological cause.

Note: A [Learning Difficulty](#) is a type of [Special Education Need](#) which affects areas of learning, such as reading, writing, spelling, mathematics etc.

Further information on [Learning Disabilities](#), can be found on the internet, for example:

- [Mencap website](#)
- NHS website at: [Learning disabilities](#).

MENTAL HEALTH CARE CLUSTER SUPER CLASS

Change to Supporting Information: Changed Description

A [Mental Health Care Cluster Super Class](#) is identified during the process of assigning an [Adult Mental Health Care Cluster](#) or [Forensic Mental Health Care Cluster](#) to a [PATIENT](#).

A [Mental Health Care Cluster Super Class](#) enables the number of applicable [Adult Mental Health Care Clusters](#) or [Forensic Mental Health Care Clusters](#) to be narrowed down, by deciding if the origin of the presenting condition is primarily:

- Non-psychotic

- Psychotic or
- ~~Organic~~
- Organic.

If the **PATIENT** cannot be assigned to an [Adult Mental Health Care Cluster](#) or [Forensic Mental Health Care Cluster](#), **MENTAL HEALTH CARE CLUSTER SUPER CLASS CODE** is recorded as '~~Unable to assign PATIENT to Mental Health Care Cluster Super Class~~'. The **PATIENT** will automatically be assigned to the **ADULT MENTAL HEALTH CARE CLUSTER CODE** or **FORENSIC MENTAL HEALTH CARE CLUSTER CODE** '~~00 Care Cluster 0 - Variance~~'.

Further information relating to the [Adult Mental Health Clustering Tool](#) and [Adult Mental Health Care Clusters](#) is available from the [NHS England](#) website at: [NHS payment system](#).

MENTAL HEALTH CLINICALLY READY FOR DISCHARGE PERIOD

Change to Supporting Information: New Supporting Information

A [Mental Health Clinically Ready for Discharge Period](#) is an **ACTIVITY GROUP**.

A [Mental Health Clinically Ready for Discharge Period](#) is the period of time during a [Care Professional Admitted Care Episode](#) under a **TREATMENT FUNCTION CODE (MENTAL HEALTH)** that the **PATIENT** is clinically fit and ready for discharge, but discharge is delayed. This does not include transfers of care to other acute inpatient **SERVICES**.

A [Mental Health Clinically Ready for Discharge Period](#) is not recorded where a delay is caused or a delay occurs in the transfer of care to acute inpatient **SERVICES**.

A [Mental Health Clinically Ready for Discharge Period](#) starts when the [Multidisciplinary Team](#) conclude that the **PATIENT** does not require any further assessments or **CLINICAL INTERVENTIONS** which can only be provided in an admitted **PATIENT** care setting.

The point at which someone is Clinically Ready for Discharge is reached when the [Multidisciplinary Team](#) conclude that the **PATIENT** does not require any further assessments, interventions and/or treatments, which can only be provided in an inpatient setting.

There are three key criteria which need to be met before the [Multidisciplinary Team](#) can make this decision:

- There must be a clear plan for the ongoing care and support that the **PATIENT** requires after discharge, which covers their pharmacological, physical health, psychological, social, cultural, housing and finances, and any other individual needs or wishes
- The [Multidisciplinary Team](#) must have explicitly considered the **PATIENT** and their chosen [Carer's](#) views and needs about discharge and involved them in co-developing the Discharge Plan
- The [Multidisciplinary Team](#) must also have involved any services external to the [Health Care Provider](#) in their decision making where these **SERVICES** will play a key role in the **PATIENT's** ongoing care e.g. social care teams.

The criteria can be found at: [Adult Mental Health](#).

The [Mental Health Clinically Ready for Discharge Period](#) may be the same as the **DISCHARGE DATE (HOSPITAL PROVIDER SPELL)**, if the external factors are resolved while the **PATIENT** is still ready for discharge.

However if the **PATIENT's** condition deteriorates while awaiting discharge, the decision may be taken to end the [Mental Health Clinically Ready for Discharge Period](#), and the [Care Professional Admitted Care Episode](#) and [Hospital Provider Spell](#) continue.

MENTAL HEALTH DELAYED DISCHARGE PERIOD (RETIRED), renamed from MENTAL HEALTH DELAYED DISCHARGE PERIOD

Change to Supporting Information: Changed Name, status to Retired, Description

A [Mental Health Delayed Discharge Period](#) is an [ACTIVITY GROUP](#). This item has been retired from the NHS Data Model and Dictionary.

A [Mental Health Delayed Discharge Period](#) is the period of time during a [Consultant Episode \(Hospital Provider\)](#) under a [MAIN SPECIALTY CODE \(MENTAL HEALTH\)](#) that the [PATIENT](#) is fit and ready for discharge, but discharge is delayed due to external factors outside the control of the [Hospital Provider](#). These reasons are detailed in [MENTAL HEALTH DELAYED DISCHARGE REASON](#). The last live version of this item is available in the [??????](#) release of the NHS Data Model and Dictionary.

A [PATIENT](#) is ready for discharge when:

- A clinical decision has been made that the [PATIENT](#) is ready for discharge
- A [Multidisciplinary Team](#) decision has been made that the [PATIENT](#) is ready for discharge
- The [PATIENT](#) is safe to discharge.

The [Mental Health Delayed Discharge Period](#):

- Starts on the [START DATE \(MENTAL HEALTH DELAYED DISCHARGE PERIOD\)](#) and
- Ends on the [END DATE \(MENTAL HEALTH DELAYED DISCHARGE PERIOD\)](#).

The [END DATE \(MENTAL HEALTH DELAYED DISCHARGE PERIOD\)](#) may be the same as the [DISCHARGE DATE \(HOSPITAL PROVIDER SPELL\)](#), if the external factors are resolved while the [PATIENT](#) is still ready for discharge. MENTAL HEALTH SERVICES DATA SET OVERVIEW

Change to Supporting Information: Changed Description

Introduction

The [Mental Health Services Data Set \(MHSDS\)](#) is a [PATIENT](#) level, output based secondary uses data set which aims to deliver robust, comprehensive, nationally consistent and comparable person-based information for [PATIENTS](#) who are in contact with [Mental Health Services](#).

The [Mental Health Services Data Set](#) covers [Mental Health Services](#) located in England, or located outside England but treating [PATIENTS](#) commissioned by an English [Integrated Care Board](#), [NHS England](#) specialised commissioner or an [NHS-led Provider Collaborative](#).

As a secondary uses data set, the [Mental Health Services Data Set](#) re-uses clinical and operational data for purposes other than direct [PATIENT](#) care, and defines the data items, definitions and associated value sets to be extracted or derived from local information systems.

All [ACTIVITY](#) relating to [PATIENTS](#) who receive assessments and treatment from [Mental Health Services](#) is within the scope of the [Mental Health Services Data Set](#), where the [PATIENT](#) has, or are thought to have:

- A mental health condition and/or
- A need for support with their mental wellbeing and/or
- A [Learning Disability](#) and/or
- [Autism](#) or any other neurodevelopmental condition.

The scope of the [Mental Health Services Data Set](#) requires [PATIENT](#) record level data submission from [SERVICES](#) as follows:

- For each [PATIENT](#) attending a [SERVICE](#) located in England:
 - If the care is wholly funded by the NHS: the data submission for that [PATIENT](#) is mandatory
 - If the care is partially funded by the NHS: the data submission for that [PATIENT](#) is mandatory
 - If the care is wholly funded by any means that is not NHS: the data submission for that [PATIENT](#) is optional.
- For each [PATIENT](#) attending a [SERVICE](#) located outside England, but commissioned by an English [Integrated Care Board](#) or [NHS England](#) specialised commissioner, the data submission is optional.
- For each [PATIENT](#) attending a [SERVICE](#) located outside England, but commissioned by an English [Integrated Care Board](#) or [NHS England](#) specialised commissioner, the data submission is optional but may be a requirement of the commissioning arrangements.

The [Mental Health Services Data Set](#) is used across the range of [Health Care Providers](#) and [ORGANISATIONS](#) that provide [Mental Health Services](#) (irrespective of funding arrangements) including:

- ~~NHS Mental Health Trusts~~
- ~~NHS Learning Disabilities Trusts~~
- ~~NHS Acute Trusts~~
- ~~NHS Care Trusts~~
- [NHS Trust](#) or [NHS Foundation Trust](#) delivering Mental Health and acute [PATIENT](#) care
- [Independent Sector Healthcare Providers](#) offering a service model that includes NHS funded and non-NHS funded [PATIENTS](#)
- Voluntary sector [Health Care Providers](#)
- Any qualified provider offering [Mental Health Services](#)
- Community [SERVICES](#) offering secondary care to children.

Submission information

The [Mental Health Services Data Set](#) is submitted centrally via the [Strategic Data Collection Service in the Cloud \(SDCS Cloud\)](#) maintained by [NHS England](#).

The [Mental Health Services Data Set](#) has historically been submitted using two submission windows, primary and refresh. This has changed to a multiple submission window model which gives submitters the opportunity to resubmit throughout the submission year. Guidance on the new submission model can be found on the [NHS England](#) website at: [How to submit to the MHSDS](#). A multiple submission window model for the [Mental Health Services Data Set](#) has been available to submitters since 1 April 2020. This allows submitters to resubmit data for each full financial year, rather than by the previous primary and refresh methods of submissions.

Guidance on the submission model can be found on the [NHS England](#) website at:

- [Submitting Mental Health Services Data Set \(MHSDS\) data](#)
- [Multiple Submission Window Model for MHSDS](#)

Further guidance

Further information regarding the structure and submission of the [Mental Health Services Data Set](#) can be found on the [NHS England](#) website at: [Mental Health Services Data Set \(MHSDS\)](#).

Mandation

The Mandation column indicates the recommendation for the inclusion of data.

- M = Mandatory: this data element is mandatory and the technical process (e.g. submission of the data set, production of output etc) cannot be completed without this data element being present
- R = Required: NHS business processes cannot be delivered without this data element
- O = Optional: the inclusion of this data element is optional as required for local purposes
- P = Pilot: this data element is for piloting use only.

Note: items in the Mandation column which are shown with notation P have **not** been approved by the [Data Alliance Partnership Board](#) and are included to facilitate piloting and testing of future data requirements, prior to formal inclusion in later versions of the [Mental Health Services Data Set](#). These items have been included in the data set layout in order to provide advance notice to data providers and system suppliers of the intention to require these items at a later date. Unless [ORGANISATIONS](#) are engaged in piloting activities relating to these items, they should **NOT** submit any data item marked P.

Data Set Constraints

For guidance on the Data Set constraints, see the [Mental Health Services Data Set Constraints](#).

PATIENT SELF-DIRECTED DIGITAL INTERVENTION

Change to Supporting Information: New Supporting Information

A [Patient Self-Directed Digital Intervention](#) is the delivery of therapy or assessment through an internet or digital based programme, which is accessed by the [PATIENT](#) in their own time.
