

Mental Health Services Data Set v6.0

Requirements Specification

Document filename:	Mental Health Services Data Set v6.0 – Requirements Specification		
Project / Programme	Data Standards and New Data Collections	Project	Mental Health Services Data Set
Document Reference			
Project Manager	Shamim Rahman	Status	Final
Owner	Amy Wilson	Version	1.0
Author	Julia Webb	Version issue date	06/07/2023

Data Alliance Partnership Board (DAPB)

This information standard (DAPB0011) has been approved for publication by NHS England under [section 250 of the Health and Social Care Act 2012](#).

Assurance that this information standard meets the requirements of the Act and is appropriate for the use specified in the specification document has been provided by the Data Standards Assurance Service (DSAS) and approved by the Data Alliance Partnership Board (DAPB).

This information standard comprises the following documents:

- Requirements Specification
- Change Specification
- Technical Output Specification
- Implementation Guidance

An Information Standards Notice (DAPB0011 Amd 37/2022) has been issued as a notification of use and implementation timescales. Please read this alongside the documents for the standard.

The controlled copies of these documents can be found on the [NHS England website](#). Any copies held outside of that area, in whatever format (e.g. paper, email attachment), are considered to have passed out of control and should be checked for currency and validity.

This information is licensed under the Open Government Licence v3.0. To view this licence, visit <http://www.nationalarchives.gov.uk/doc/open-government-licence/> or write to the Information Policy Team, The National Archives, Kew, Richmond, Surrey, TW9 4DU.

Revision History

Version	Date	Summary of Changes
0.1	01/08/2022	Document created
0.2	04/05/2023	First draft for DSAS comments
1.0	05/07/2023	Final publication and formatting checks

Reviewers

This document must be reviewed by the following people:

Reviewer name	Title / Responsibility	Date	Version
Amy Wilson	Data Set Development Lead	01/08/2022	0.1
Sarah Furnell	Publications and Knowledge Management (DSAS)	05/07/2023	1.0

Approved by

This document must be approved by the following people:

Name	Title	Date	Version
Cher Cartwright	Information Lead Manager for Mental Health and Surveys		0.1
Tom Latham	Data Set Development Service Technical Manager	11/05/2023	0.1

Document Control:

The controlled copy of this document is maintained in the corporate network. Any copies of this document held outside of that area, in whatever format (e.g. paper, email attachment), are considered to have passed out of control and should be checked for currency and validity.

Glossary of Terms

Term / Abbreviation	Definition
AT	Assuring Transformation
C&P	Currencies and Payment
CAMHS	Child and Adolescent Mental Health Services
CCG	Clinical Commissioning Group
CDS	Commissioning Data Sets
Clinical Governance	Clinical governance is defined by the Department of Health and Social Care as describing “the structures, processes and culture needed to ensure that healthcare organisations - and all individuals within them - can assure the quality of the care they provide and are continuously seeking to improve it”
CPA	Care Programme Approach
CQC	The Care Quality Commission monitor, inspect and regulate health and social care services.
CYP	Children and Young People
CYP IAPT	Children and Young People’s Improving Access to Psychological Therapies
CYPMHS	Children and Young People’s Mental Health Service
DARS	The NHS England (formerly NHS Digital) Data Access Request Service can offer clinicians, researchers and commissioners the data required to help improve NHS services.
DAPB	Empowered by the Health and Social Care Act 2012, the Data Alliance Partnership Board (DAPB) has delegated responsibility for approving information standards for the health and social care system in England. The DAPB membership is drawn from a range of organisations operating within health and social care.
Data Group	A collection of data items that describe a distinct event or episode. This can also be referred to as a table of data.
Data Item	A single component of a data set that holds one type of information and relates to a specific record.
Data Landing Platform	The secure data collection system chosen to facilitate the submission of data to NHS England (formerly NHS Digital), as specified within the Technical Guidance.
Data Set	The full collection of data groups. See ‘Technical Output Specification’
Data Set Specification	<p>The Data Set Specification fully defines each data item within the data set. This document splits the data set into a number of groups (tables), each containing data items and values.</p> <p>The ‘Summary of Changes’ tab within this document defines the individual changes made to tables and data items as part of the Change Request.</p> <p>The Data Set Specification is further enhanced with technical information in the form of the <i>Technical Output Specification</i> (please see below).</p>
DfE	Department for Education
DHSC	Department of Health and Social Care
DMS	Data Management Service

Term / Abbreviation	Definition
DSAS	Data Standards Assurance Service ensures that the Information Standard meets the requirement of the Health and Social Care Act and is appropriate for the use specified in the specification document.
DPIA	Data Protection Impact Assessment
DToC	Delayed Transfer of Care
EIP	Early Intervention in Psychosis services work with patients that experience their first episode of psychosis.
EPMA	Electronic Prescribing and Medicines Administration
EPR	Electronic Patient Records
ERG	The NHS England (formerly NHS Digital) data set development MHSDS Development Expert Reference Group comprises care provider, system supplier and NHS England representatives. It is currently chaired by NHS England. Its main focus is to contribute to the understanding of requirements, provide feedback on suggestions and input into the development of viable solutions.
FPN	Fair Processing Notice
GDPR	General Data Protection Regulation
HSCA	The Health and Social Care Act 2012
HSCIC	<p>The HSCIC was formed in April 2013 and established as an Executive Non-Departmental Public Body (ENDPB) under the Health and Social Care Act 2012. Through the Act, the HSCIC had a significant statutory duty to support the health and care system with regard to:</p> <ul style="list-style-type: none"> collecting, storing, analysing and disseminating England's health and care data providing a trusted safe haven for some of an individual's most sensitive information building and delivering the technical systems that enable data both to be used to support an individual's care and to deliver better, more effective care for the community as a whole. <p>The HSCIC is now part of NHS England and was previously known as NHS Digital.</p>
IAPT	Improving Access to Psychological Therapies
ICB	Integrated Care Board
ICD 10	International Classification of Diseases (Revision 10)
IDB	Intermediate Database (a Microsoft Access Database) used to submit data to the data landing platform.
IGARD	Independent Group Advising on the Release of Data
IG	Information Governance
Information Standard	An information standard is a formal document approved and issued by the DAPB. It defines technical criteria, content, methods, processes and practices for implementation across health and social care in England.
ISN	An Information Standards Notice is a notice of an Information Standard approved by the DAPB. When a health and social care organisation in England receives an ISN, they will ensure that they and their contractors comply with the standard in a reasonable time (such time defined within

Term / Abbreviation	Definition
	the ISN). ISNs were previously published by the Standardisation Committee for Care Information (SCCI).
MDT	Multi-Disciplinary Team
Mental Health	The term 'mental health' includes patients of all ages (i.e. adults, adolescents and children) and is used generically to include patients with a Learning Disability or autism as well as other mental health needs.
MHSDS	The Mental Health Services Data Set (MHSDS) contains record-level data about the care of children, young people and adults who are in contact with mental health, learning disabilities or autism services.
MHA	Mental Health Act
MHCC	Mental Health Care Cluster
MHCT	Mental Health Clustering Tool
MHDIPB	Mental Health Data and Information Programme Board
MHFYFV	The Five Year Forward View for Mental Health
MHLDDS	Mental Health and Learning Disabilities Data Set (superseded by MHSDS)
MSWM (Multiple submission window model)	Implemented from MHSDS v4.1, this describes the way data is submitted for the MHSDS and enables the resubmission of data throughout the financial year.
NHS England	NHS England provides national leadership for the NHS in England. With effect from 1 February 2023 NHS Digital and NHS England have merged into a single organisation. NHS England has therefore assumed responsibility for all activities previously undertaken by NHS Digital.
NICE	National Institute for Health and Care Excellence
Null	A data item with no value (i.e. blank) and therefore, has no meaning. This is different from a value of 0 (zero), since 0 is an actual value.
ODS	Organisation Data Service
OHID	Office for Health Improvement and Disparities
ONS	Office for National Statistics
OVCC	Overseas Visitor Charging Category
PAS	Patient Administration System used by trusts to record patient data.
Patient Proxy	A Patient Proxy is a representative of the patient. This is most likely to be the case where the patient is unable to communicate effectively, for example, for an infant or a person who is mentally ill or who has learning disabilities.
PbR	Payment by Results
RCPsych	Royal College of Psychiatrists
Read V2	Read Clinical Terms Version 2 - Clinical coding Language used for diagnosis and treatment
Reporting Period	The period (usually a calendar month) for which a particular data upload refers.
RTT	Referral to Treatment
SNOMED CT	SNOMED CT is a structured clinical vocabulary for use in an electronic health record. It is the most comprehensive and precise clinical health

Term / Abbreviation	Definition
	terminology product in the world. SNOMED CT has been selected and approved as the terminology to be adopted by the NHS in England.
SOM	Sexual Orientation Monitoring information standard provides a framework for the monitoring of the sexual orientation of service users, relating to adults and young people over the age of 16 years, in the health and social care system in England.
SRO	Senior Responsible Owner
SCCI	<p>The Standardisation Committee for Care Information (SCCI) was a committee with membership drawn from a range of health and social care organisations with responsibility for overseeing the development, assurance and approval of information standards, data collections and data extractions used within the health and social care system.</p> <p>New national governance arrangements for information standards, data collections and data extractions came into effect on 1 April 2017.</p> <p>On 1 April 2017, the Data Coordination Board (DCB) took over responsibility for the approval of standards from SCCI. The DCB is now referred to as the Data Alliance Partnership Board (DAPB).</p>
TOS	<p>The Technical Output Specification (TOS) is the specification for the output data set required of providers which is part of the ISN and published on the DAPB website. This information will remain static as part of this Information Standard release.</p> <p>The Enhanced Technical Output Specification (ETOS) includes additional information relating to the validations carried out at the data landing platform and the derived data items that are included in the provider and commissioner extracts. The validations and derivations are not controlled through the DAPB process and can therefore be subject to change.</p>
UKHSA	UK Health Security Agency

1. Overview

This product precisely defines the patient level Mental Health Services Data Set (MHSDS) standard. The Summary section below describes the standard; the Requirements and Conformance Criteria sections explain what is required of care providers and systems to conform to the standard, and how the conformance is tested.

This document is the formal definition of the standard.

The key words MUST, SHOULD and MAY are defined in [RFC-2119](#).

1.1. Summary

Standard	
Standard Number	DAPB0011
Standard Title	Mental Health Services Data Set (MHSDS)
Description	<p>The MHSDS is a patient level, output based, secondary uses data set which aims to deliver robust, comprehensive, nationally consistent and comparable person-based information for all patients who are in contact with Mental Health Services.</p> <p>The Mental Health Services Data Set covers services located in England or located outside England but treating patients commissioned by an English Integrated Care Board (ICB), NHS England specialised commissioner or an NHS-led Provider Collaborative.</p> <p>As a secondary uses data set, the MHSDS re-uses clinical and operational data for purposes other than direct patient care. It defines the data items, definitions and associated value sets extracted or derived from local information systems.</p> <p>In Scope</p> <p>All activity relating to patients of any age who receive care for a suspected or diagnosed mental health and wellbeing need, Learning Disability, autism or other neurodevelopmental conditions is within scope of the MHSDS.</p> <p>It may be that the person has:</p> <ul style="list-style-type: none"> • A mental health need or is being supported for their mental wellbeing including; <ul style="list-style-type: none"> ○ Gambling addiction and substance misuse ○ Children and young people’s mental health services ○ Mental health support teams working in schools and colleges • Any combination of mental health, Learning Disability or autism needs

	<p>Out of Scope</p> <ul style="list-style-type: none"> Adult Improving Access to Psychological Therapies (IAPT) services, now known as NHS Talking Therapies for anxiety and depression, are currently out of scope of the MHSDS as this activity is covered by the IAPT data set.
Dataset submission requirements by location and funding source	<p>Record level data submission requirements for each patient accessing services, based on location and funding source, are as follows;</p> <p>Services in England:</p> <ul style="list-style-type: none"> If the care for the patient is wholly funded by the NHS – data submission for that patient is mandatory. If the care for the patient is partially funded by the NHS – data submission for that patient is mandatory. If the care for the patient is wholly funded by any means that is not NHS – data submission is optional. <p>Services outside England:</p> <ul style="list-style-type: none"> If the patient is attending a service located outside England, but commissioned by an English ICB, NHS England specialised commissioner or an NHS-led Provider Collaborative, data submission is optional but may be a requirement of the commissioning arrangements. For example, this would include providers that are near English borders that routinely provide services to English patients and are claiming funding from English commissioners.
Examples of activity in scope	<p>The data set scope includes, but is not limited to, the examples below.</p> <p>Service users</p> <p>Any patients who receive care for a suspected or diagnosed mental health and wellbeing need, Learning Disability or autism.</p> <p>Family Members, Carers or Partners</p> <p>Any family member, carer or partner (of the patient described above) who receives family, carer or partner interventions.</p> <p>Organisation Types</p> <p>Any service providers that provide assessments or care for people with a suspected or diagnosed mental health and wellbeing need, Learning Disability or autism including:</p> <ul style="list-style-type: none"> NHS Mental Health Trusts NHS Learning Disabilities Trusts NHS Care Trusts NHS Acute Trusts* NHS Community Health Trusts*

	<ul style="list-style-type: none"> • Independent and voluntary sector healthcare providers and any other qualified providers offering a service model that includes NHS funded and non-NHS funded patients • Any qualified provider offering Mental Health Services • Community Services offering secondary care to children <p>* Where there is a direct provision of specialist secondary mental health, learning disabilities or autism services</p> <p>Service Types</p> <p>The ‘Service or Team Type (Mental Health)’ and ‘Mental Health Admitted Patient Classification Type’ data items within tables MHS902 and MHS502 respectively, and as defined in the MHSDS Technical Output Specification (TOS), attempt to define a national list of in-scope community and inpatient service types respectively for the MHSDS and in doing so provides examples of the services included in the scope. However, these lists may not be comprehensive considering evolving models of care delivery.</p> <p>Services covered by the data set scope but not appearing in these data item lists must identify themselves against the most appropriate code available.</p> <p>The following service types are also included within the scope;</p> <ul style="list-style-type: none"> • NHS commissioned mental health services delivered within or to support primary care (excluding adult IAPT) • New models of community mental health services integrated with primary care <p>Departments</p> <p>The standard must be read and used by all heads of mental health, Learning Disabilities and autism services, and other clinical and support services, including community services, that have an active involvement in delivering secondary mental health care.</p> <p>Professionals</p> <p>The standard applies to all professions working in or supporting mental health, Learning Disabilities and autism services and other services offering secondary mental health care including community services. The MHSDS Technical Output Specification (TOS) provides information about the types of care professionals that are within the scope of this information standard (see MHS901 Staff Details table within the TOS).</p> <p>IT Systems</p> <p>The standard predominantly, but not exclusively, relates to clinical systems designed to support mental health, learning disabilities and autism services, Patient Administration Systems (PAS) and Electronic Patient Records (EPR).</p>
--	---

IG, Linkage and Data Use	<p>The data held in the MHSDS will be made available within NHS England for analysis, and also for other arm’s-length bodies, NHS-funded mental health service providers and commissioners and the wider mental health community. This is to support research and innovation, and understand the impact of mental health care on patient outcomes and experiences.</p> <p>Requests for data from the MHSDS will be managed through NHS England’s Clear Data Access Tools and Data Access Request Service (DARS).</p> <p>Information will be published in line with NHS England’s duty to publish under section 260(1) of the Health and Social Care Act 2012, unless it falls within section 260(2) of the Act. Further information can be found on the NHS England data security webpages.</p> <p>Mental health data may also be linked to data held by NHS England from various other data sets, collections and population health surveys to provide richer information to enhance existing and develop new publications and insights, to reduce burden on submitters and to respond to requests for data and information. More information about the data sets and collections that NHS England hold and that may be used for linkage can be found on the NHS England Data Collections and Data Sets webpage.</p> <p>Mental health data may also be linked to other data sets held by external bodies including Office for Health Improvement and Disparities (OHID), Office for National Statistics (ONS), NHS England the Department of Health and Social Care, UK Health Security Agency (UKHSA) and other researchers.</p>
Release	
Release Number	Amd 37/2022
Release Title	Version 6.0
Description	<ul style="list-style-type: none"> • Removal of data items and tables that are no longer required within the data set including the Pilot Currency table and Pilot Medication Prescription table*, and the Care Cluster tables. • Addition of new data tables to capture ward details, staff activity details and service details so that this information is only flowed as one record per service, rather than being connected to a patient. • Addition of a new Patient Self-Directed Digital Intervention table to identify where services are supporting patients to use these interventions as part of their care. • Addition of a new Clinically Ready for Discharge table which has replaced the former Mental Health Delayed Discharge table. This is to record mental health delayed discharges under the new term and definition ‘clinically ready for discharge’.

	<ul style="list-style-type: none"> • Addition of the new Presenting Complaint table which has replaced the 'MHS603 Provisional Diagnosis' table to carry details of primary and any secondary presenting complaint recorded for a patient by the service that the patient was referred or admitted to. • Addition of a new eMED3 Fit Note table to enable recording of the issuing of digital eMED3 fit notes by mental health services. • Addition of new individual data items and relocation of data items based on feedback and consultation. • Change to mandation status for the MHS104 Referral to Treatment (RTT) table, the MHS701 and MHS702 Care Programme Approach (CPA) tables and the MHS515 Restrictive Intervention Type table. • Updates to names and definitions to align with other data sets and wider NHS Data Model & Dictionary developments, including minor changes to national code lists. <p>* The Pilot MHS107 Medication Prescription table has been removed, and linkage of Electronic Prescribing and Medicines Administration (EPMA) data from the MHSDS will be provided via the NHS Number.</p>
Implementation Completion Date	<p>System Conformance</p> <p>From April 2024 mental health systems MUST be fully conformant with this standard.</p> <p>Health and Care Organisations</p> <p>From 1 April 2024 providers of mental health, learning disabilities and autism services as defined in this Information Standard MUST be able to collect the information as defined in the Technical Output Specification for local use.</p> <p>From 1 May 2024 providers of NHS funded mental health, learning disabilities and autism services MUST begin submitting MHSDS submissions in accordance with this standard.</p>
Full Conformance Date	31 May 2024

1.2. Supporting documents

This document should be read in conjunction with the following:

Ref #	Title
1	MHSDS Change Specification
2	MHSDS Technical Output Specification

3	MHSDS Implementation Guidance
4	NHS Data Model and Dictionary Change Request

Please see section 2.4 of the Implementation Guidance for a full list and descriptions of each related document. These documents may be found on the [DAPB0011 MHSDS Information Standard webpage](#).

1.3. Related standards

Reference	Title
DAPB1069	Community Services Data Set (CSDS)
DCB1513	Maternity Services Data Set (MSDS)
DCB2007	Assuring Transformation
DCB1605	Accessible Information
ISB0149	NHS Number
SCCI0034	SNOMED CT
SCCI0021	International Statistical Classification of Diseases and Health Related Problems (ICD10) 5th Edition
DAPB0092	Commissioning Data Sets (CDS)
DAPB0090	Health and Social Care Organisation Reference Data
DCB2094	Sexual Orientation Monitoring
DAPB0092-2062	Commissioning Data Sets (CDS) Version 6.2.3: Emergency Care Data Set (ECDS)
DCB3017	Overseas Visitor Charging Category (OVCC)
DAPB1520	Improving Access to Psychological Therapies Data Set
DAPB1069	Community Services Data Set (CSDS)
DAPB4011	eMED3 (fit notes) in Secondary Care

Further details regarding the above standards can be found on the [DAPB Standards and Collections webpage](#). This webpage also contains a list of all current DAPB (Data Alliance Partnership Board), previously known as both DCB (Data Coordination Board), SCCI (Standardisation Committee for Care Information) and Information Standards Board (ISB), standards and collections.

2. Requirements

2.1. Health and care organisations

2.1.1. Timeframe

From 1 April 2024 providers of mental health, learning disabilities and autism services ('mental health services') in scope of this Information Standard **MUST** be able to collect the information locally that they intend to use to produce the monthly MHSDS v6.0 extract, as defined in the TOS.

From 1 May 2024 providers of mental health services in scope of this Information Standard **MUST** begin ongoing monthly MHSDS submissions as per the instructions in the MHSDS Implementation Guidance.

2.1.2. Scoping

Providers new to submitting MHSDS **MUST** review the 'In scope' and 'Out of scope' sections of this Requirements Specification to establish whether the standard applies to the services they offer.

All providers **SHOULD** review all related documents to ensure they fully understand the background, objectives and scope of this information standard.

2.1.3. Feasibility assessment

Providers of mental health services **MUST** review the MHSDS TOS and MHSDS User Guidance to understand the scope and definition of each data item.

Providers of mental health services **MUST** familiarise themselves with the MHSDS intermediate database (IDB) to understand how data items are grouped for the data submission file. Further information on the submissions process including the IDB can be found on the MHSDS [webpages](#).

Providers of mental health services **SHOULD** carry out a 'data mapping exercise' to understand how well their existing electronic systems align to the MHSDS TOS and take appropriate action to ensure that the standard is fully met. The self-assessment [System Conformance Checklist](#) tool is available on the NHS England website to support this mapping exercise.

The MHSDS standard defines the extract from provider systems which will flow to NHS England. It is not a specification for a clinical system. Providers of mental health services **SHOULD NOT** solely use this data set to define their clinical and operational data capture.

2.1.4. Information governance

Data Controllers responsible for mental health services **MUST** ensure they are fully conversant with pertinent information governance legislation and guidance, including [patient opt-outs](#) and [GDPR](#).

Providers of mental health services (including the Caldicott Guardian) **SHOULD** review the NHS England [Keeping data safe webpages](#) to ensure they are fully conversant with pertinent information governance legislation and guidance, including:

- Consent and opportunity to object to sharing
- Compliance against statutory requirements
- Potential safety/confidentiality/risk considerations

Further information can be found in the MHSDS v6.0 Implementation Guidance.

Providers of mental health services **MUST** make available information and guidance to patients stating that their clinical care data may be re-used, including through linkage with other data sources, for the purpose of data analysis and reporting.

Providers of mental health services **MUST** ensure that local data systems and warehouses comply with appropriate data security controls by ensuring they achieve [Data Security and Protection Toolkit standards](#).

Any staff responsible for controlling the dissemination of data **MUST** read the Implementation Guidance to understand this information governance approach and act accordingly. This will help inform the handling of sensitive data and ensuring identifiable data is not included in fields marked for inclusion in external extracts, as identified in the enhanced Technical Output Specification. Understanding, behaviours and accountability **SHOULD** be appropriate to the level and nature of responsibility.

Any immediate information governance concerns relating to the MHSDS **SHOULD** be addressed to the standard's developers at NHS England, or the [Independent Group Advising on the Release of Data \(IGARD\)](#) if the concerns relate to data dissemination.

Although [IGARD](#) ceased on the 31 January 2023 when NHS Digital merged with NHS England, NHS England has established [interim arrangements](#) to seek and receive independent advice.

2.1.5. Clinical governance

The data set **MAY** be used for clinical governance purposes such as:

- Monitoring of year on year service improvement by governing and audit bodies.
- Benchmarking performance to drive service improvements.

2.1.6. Clinical risks

When procuring new systems or modifying agreements with existing system suppliers, providers of mental health services **SHOULD** ensure that supplier organisations are compliant with the clinical safety standards [DCB0129 Clinical Risk Management: its Application in the Manufacture of Health IT Systems](#) and [DCB0160 Clinical Risk Management: its Application in the Deployment and Use of Health IT Systems](#).

2.1.7. Demonstrating readiness

Several months after publication of this information standard a state of readiness questionnaire will be circulated to assess conformance with this standard. This **MUST** be completed by providers of mental health services and returned to NHS England within the specified deadline.

2.1.8. Data collection and submission

Clinical staff **MUST** capture the information locally that they intend to use to produce the monthly MHSDS v6.0 extract in an accurate and timely manner.

Providers of mental health services **SHOULD** review the MHSDS ETOS to understand the data validation rules that will be applied to each data group on arrival at the data landing platform to all incoming data submission files. Validation rules not adhered to may result in appropriate groups or the entire submission being rejected.

Providers of mental health services **MUST** develop a submission extract as defined by the TOS and supporting Technical and User Guidance documents.

Providers of mental health services **MUST** submit the MHSDS v6.0 extract as defined in the TOS.

Providers of mental health services **SHOULD** submit the MHSDS v6.0 extract as defined by the TOS on at least a monthly basis.

Providers of mental health services **SHOULD** check pre-deadline validation and data quality reports provided by NHS England after each submission, correct errors and make re-submissions at the earliest opportunity, preferably before the current submission window closes. Further details on error correction and re-submissions are explained within the Technical Guidance.

Providers of mental health services **MUST NOT** attempt to submit data items not defined in the TOS.

The requirements defined in this section are likely to be fulfilled by mental health service informatics staff.

2.1.9. Resources

Heads of mental health services **MUST** ensure their service is appropriately resourced to conform to the requirements stated in this Requirements Specification.

2.1.10. Communication

Chief executives **MUST** be held accountable to comply with the dates instructed by the mandate. Chief executives **SHOULD** therefore ensure awareness by all clinicians and operational staff involved in care delivery by cascading the mandated MHSDS v6.0 standard and an appropriate project brief to all mental health leads and other relevant staff.

Instructions **MUST** also be communicated to the organisation's information leads to initiate collaborative work with informatics services and mental health services as soon as possible.

2.1.11. Issues and maintenance

To support the implementation of this information standard, providers of mental health services **SHOULD** highlight any persistent issues and feed these back to the standard's developers. Feedback will be used by the developers to improve the implementation and data collection processes for future consideration towards a data set change or, indeed, further implementation phases.

2.2. Systems

2.2.1. Timeframe

From April 2024 providers of mental health services **MUST** ensure their IT systems are able to capture the information locally that is intended for use to produce the monthly MHSDS v6.0 extract, as defined in the TOS. This includes information required to derive data items as defined within the standard.

From April 2024 providers of mental health services **MUST** ensure their IT systems are able to derive the data items defined within this standard, where they are not collected directly. This includes mapping of local codes to national codes, and the ability to extract this information as envisaged within this standard, e.g. without interim workarounds.

2.2.2. Scoping

IT systems suppliers **SHOULD** review all related documents to fully understand the background, objectives and scope of this information standard.

2.2.3. Feasibility assessment

Providers of mental health services **SHOULD** ensure that their IT system suppliers review the TOS and User Guidance to understand the scope and definition of each data item.

Providers of mental health services **SHOULD** ensure that their IT system suppliers familiarise themselves with the IDB to understand how data items are grouped for the data submission file.

Providers of mental health services **SHOULD** ensure that their IT system suppliers provide tools to enable a 'data mapping exercise' to be carried out and where possible complete the mappings to the national codes on behalf of the MHSDS providers. A self-assessment [System Conformance Checklist tool](#) is available on the NHS England website to support this mapping exercise.

The MHSDS v6.0 TOS is a specification for a secondary uses data set. It does not define patient systems. Whilst providers of mental health services **SHOULD** ensure that their IT system suppliers use this data set to support their system development, they **SHOULD NOT** use the data set exclusively and **SHOULD** also consider the full requirements of the care setting where it is used.

Increase in burden for providers in capturing and extracting the information defined in the TOS as a result of system changes in support of the mandated standard **SHOULD** be proportionate.

When considering potential developments, supporting good data quality **SHOULD** be prioritised, in conjunction with minimising the burden on providers.

2.2.4. Information governance

The MHSDS Implementation Guidance explains the information governance issues surrounding the data set.

Providers of mental health services **MUST** ensure that their IT system suppliers include a mechanism to allow providers to identify records where there is a legal requirement to restrict the flow of identifiable information for a patient.

2.2.5. Clinical risks

Providers of mental health services **SHOULD** remind their IT system suppliers to ensure that any changes resulting from the implementation of v6.0 are compliant with the safety standards DCB0129 and DCB0160.

2.2.6. Data submission

The [SDCS Cloud web page](#) provides guidance relating to data submission. Providers of mental health services **SHOULD** review this web page and the requirements for health and care organisations above.

2.2.7. Data quality feedback

Providers of mental health services **SHOULD** ensure that their IT system suppliers review the TOS and related guidance on the NHS England website to understand the data validation rules that will be applied at the data landing platform to all incoming data submission files. Validation rules that are not adhered to may result in appropriate groups or the entire data submission file being rejected, depending on the particular validation rule.

From April 2024, providers of MHSDS services **MUST** ensure that their IT systems have the ability to produce data quality reports to support production of their submission files in line with the TOS.

Please refer to section 2.1.6 above for further details.

2.2.8. Demonstrating readiness

Several months after publication, a State of Readiness Questionnaire will be provided to assess conformance with this standard. Providers of mental health services **SHOULD** ensure that this is completed by their IT system suppliers and returned to NHS England within the specified deadline.

3. Conformance criteria

NHS England is in receipt of the completed state of readiness questionnaire circulated to care providers and system suppliers several months after publication of this information standard, by the specified deadline. The questionnaire will be made available online and used to assess conformance with the stated requirements.

NHS England continues to receive extract data via the SDCS Cloud on a monthly basis throughout the period that the MHSDS v6.0 mandated standard remains current.

NHS England continues to receive submissions that show improvement in data quality, via the SDCS Cloud, on a monthly basis, throughout the period that the MHSDS v6.0 mandated standard remains current via additional submissions within each submission window.

NHS England is in receipt of comprehensive, good quality submissions, reflective of the type of service submitting. Submissions conform to the information governance principles identified in the requirements above, measured by routine data quality reporting and absence of incidents impacting on NHS England.

Conformance of the standard may also be monitored by other stakeholders at a national or local level. Monitoring may review conformance in line with the above conformance criteria or the detailed individual requirements listed in section 2.
