

## Corrigendum

<b>Standard</b>	DCB1067 National Workforce Data Set
<b>Release</b>	Amd 69/2020 Version 3.2
<b>Date of ISCE publication</b>	7 January 2021
<b>Date of Corrigendum</b>	24 February 2021

## Background

The latest release of the National Workforce Data Set, to be implemented by 31 March 2021, was [published on 7 January 2021](#).

Since then the need for minor changes and clarification has been identified. A summary is provided below.

Note that an updated Data Set Specification, Change Specification and Implementation Guidance have been published alongside this corrigendum; there are no other changes to the published documents.

## Summary

### Source of Recruitment

The value of [19] GP Practice has been withdrawn due to it being a duplicate entry.

As a consequence, there is a change to the numbering of the following values:

- [19] ~~[20]~~ Primary Care Network
- [20] ~~[24]~~ Return to NHS - COVID-19
- [21] ~~[22]~~ Students - COVID-19

### Absence Type – related reason

To be consistent with NHS Data Model and Dictionary best practice, the following values have been given corresponding enumerated codes:

- [1] Menopause
- [2] Coronavirus (COVID-19)
- [3] Coronavirus (COVID-19) – Test and Trace Contact
- [4] Coronavirus (COVID-19) – Household Member Symptoms
- [5] Coronavirus (COVID-19) – Post Travel Quarantine

### Job Role - ‘Surgical Care Practitioner’

This Job Role has now been added to the Allied Health Professionals Staff Group, having been moved from the Additional Professional Scientific and Technical Staff

Group. The original publication had deleted the entry in the latter Group but failed to include in the former Group.
