

Corrigendum

Standard	SCCI1538 Chlamydia Testing Activity Dataset (CTAD)
Release	Amd 13/2014 2014 Changes
Date of ISCE publication	17 December 2014
Date of Corrigendum	17 June 2015

Background

The Chlamydia Testing Activity Dataset (CTAD) information standard was published on 17 December 2014. Since then an error has been identified in the following published document:

- Dataset Specification and Technical Guidance.

Summary

The following data element, with values, is listed on page 19 of the document:

Gender PERSON STATED GENDER CODE

Format: an1 e.g.1

1 Male

2 Female

9 Intermediate (unable to be classified as either male or female)

The label for value 9 is incorrect. It should read:

9 Indeterminate (unable to be classified as either male or female)

The associated NHS Data Model and Dictionary Change Request (CR 1473) is correct.

Note that the documents were previously published on the ISB website but have now been transferred to the HSCIC SCCI publication site –
