

Cancer Registration

Why it matters and
what you need to
know

What is cancer registration?

If you are diagnosed with cancer or a condition that may lead to cancer, the NHS team looking after you will record information about you and the care you receive. This applies to children and adults of all ages.

This information is automatically shared with the National Disease Registration Service (NDRS), which is part of NHS England. You do not need to register.

The NDRS has the government's permission to collect and use information about people with cancer. This is because it is in the public interest to use this information to improve the way cancer is diagnosed and treated.

Why it matters

Cancer registration is the only way we can know how many people are getting cancer and the types of cancer they have.

This information helps us to:

- look at overall trends in cancer
- improve the diagnosis of cancer
- develop new treatments and drugs
- improve cancer services, and
- inform national cancer policy.

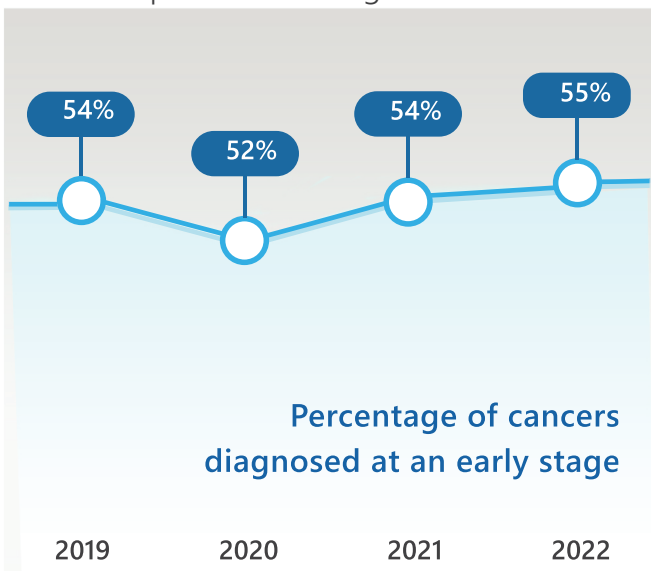

What information is collected?

The information we collect includes:

- your name and date of birth
- your sex and ethnic background
- your address and NHS number
- information about your diagnosis, and
- information about your treatment and how well your treatment is working.

This information may be linked to other health information that we may receive about you.

Early diagnosis of cancer can improve outcomes for patients. Cancer registration supports the work to improve earlier diagnosis.

This graph shows the percentage of cancers diagnosed at stages 1 and 2 when treatment is more likely to be successful

How will it benefit me?

We know that cancer registration is leading to improvements in preventing, diagnosing and treating cancer. This benefits everyone affected by cancer.

Healthcare staff may use information from NDRS to see if you might benefit from being part of a clinical trial.

Some cancers run in families. With your permission, doctors can use your information to see if other members of your family may be at risk, and find the best ways to treat them.

Is my information secure?

Yes, all your information is kept confidential.

Cancer registration helps drive research into cancer so we may sometimes need to share your information with researchers outside NHS England. There are very strict rules for this. It only happens if the researchers have a lawful reason to use the information. Researchers must prove that the information will be kept safe and secure to protect your privacy.

Can I see the information you hold about me?

Yes, we can give it to a doctor (GP) who knows who you are, so they can share all the information with you.

Can I ask for my information not to be used for the purpose of cancer registration?

Yes, you have the right to opt out of cancer registration. This will not affect the personal care you receive from your healthcare team.

If you do not want your information included for the purpose of cancer registration, you can contact us at NDRSoptout@nhs.net or write to:

NDRS Data Opt-Out
5th floor
The Government Hub
23 Stephenson Street
Birmingham

Where can I find out more?

To find out more about the work of NDRS and why cancer registration is important or if you have any questions you can:

- visit our website at digital.nhs.uk/ndrs
- talk to a member of the NHS cancer team treating you, or
- visit www.nhs.uk/your-data-matters to find out how the NHS uses information
