

Version 1

## **Announcement of Changes to the “Community Care Statistics: Social Services Activity, England - 2011-12”**

Following on from a National Statistics consultation, a small proportion of the tables and charts that appeared in this report in previous years will not be available.

They are:

- Figure 2.5 ‘Length of time from first contact to completion of assessment for new clients by primary client group and time band, England’.
- Figure 2.9 ‘Percentage distribution of new clients with completed assessments by primary client group, England’.
- Figure 2.10 ‘Percentage of new clients with completed assessments by primary client group and age group, England’.
- Figure 2.18 ‘Percentage distribution of existing service users with completed reviews by primary client group, England’.
- Figure 2.19 - Percentage distribution for assessments and reviews provided at the expense of the council by age group for all service users, England
- Figure 2.20 - Percentage distribution of funding source for assessments and reviews by primary client group, England
- Table 3.1 – Length of time from completed assessment to receipt of all services for new service users, by age, England.
- Chart 3.2 - Length of time from completed assessment to receipt of all services for new service users aged 65 and over.
- Figure 5.10 - Percentage of Supported Residents admitted and transferred between different levels of care in England
- Annex table 7.2 ‘Length of time from first contact to completed assessment for new clients whose assessments were completed during the period by primary client type and age group’

These are being dropped following a National Statistics consultation which found that the majority of stakeholders did not find these tables and charts useful.

More detail is given in chapters 4 and 5 in the report on the consultation responses which is available at:
