

Statement of Administrative Sources

Annex B: Supporting metadata

Organisation	The Information Centre for Health and Social Care (The NHS Information Centre for health and Social Care) http://www.ic.nhs.uk/	
Enquiries	Please contact the NHS IC Contact centre Telephone: 0845 300 6016 and email: enquiries@ic.nhs.uk	
Responsible Statistician	Name: Andy Sutherland Section: Mental Health and Community Care Team	
Section 1: Statistical End Product	Routine Quarterly Mental Health Minimum Dataset Reports	
Section 2: Original Administrative/Management Source/System	Name	Mental Health Minimum Dataset quarterly returns
	Name of the organisation responsible	Providers of specialist mental health services
	Purpose of the administrative source	Manage patient care
	Unit of Inquiry	Adults using specialist mental health services

Information provided is believed to be correct as of March 2011 and may be subject to change.

	Intended Coverage	All specialist NHS mental health service providers
	Actual Coverage	All specialist NHS mental health service providers
	Geographical Coverage	England
	Lowest level of Geographical Coverage	Source data includes postcode of patient's usual residence
	Extent to which statistical end-producers can influence system?	Mental Health Minimum Dataset (MHMDS) is a mandated NHS dataset approved by Review of Central Returns (ROCR). The dataset is maintained by the NHS Information Centre and any changes made via a change control process.
	Data definitions used	See NHS Data Dictionary for MHMDS definitions: http://www.datadictionary.nhs.uk/data_dictionary/messages/clinical_data_sets/data_sets/mental_health_minimum_data_set_fr.asp?shownav=1
	Classification systems used	ICD10 diagnosis classification, Read codes for treatments
	Data Collection Process	<p>1)Periodicity/Timing 2)Validation process</p> <p>MHMDS is submitted 5 times a year with 4 quarterly submissions and one annual submission. The quarterly submissions cover a discrete 3 month period and are not cumulative and it is these quarterly submissions that are the source data for these Routine Quarterly Reports.</p> <p>Provider organisation's own data quality processes. Data items with a code set are validated against a schema on submission.</p>

Information provided is believed to be correct as of March 2011 and may be subject to change.

	Access Arrangements	<p>Access to source systems will be subject to individual organisation's information security arrangements.</p> <p>Access to processed, record level, anonymised MHMDS data is subject to the NHS Information Centre's Data Access and Information Sharing Policy available from http://www.ic.nhs.uk/data-protection/freedom-of-information-foi/guide-to-information/our-policies-and-procedures (then click on "Data access information sharing policy").</p> <p>In addition, any access to full, record level MHMDS which includes some sensitive data items, is controlled by The Database Monitoring Sub Group of the NHS Information Governance Board.</p>
	Dissemination Procedures	Organisations that submit MHMDS may use the data for internal reporting.
	Publication procedure	n/a
	Timing/Periodicity of public release	As above
	Nature of changes to system that could impact on statistics	Changes to the MHMDS mandated via a Dataset Change Notice (DSCN)
Section 3: Change Process	DSCN process	
Section 4: The subsequent statistical production process	Validation procedures	Data items with a code set are validated against a schema on submission. Further validation and assurance is undertaken at various stages during the flow of the data, from the point that trusts submit the data, during processing and on receipt of the data for loading into the NHS Information Centre database for analysis.

Information provided is believed to be correct as of March 2011 and may be subject to change.

	Quality assessment	Information on data quality is available in the publication.
	Periodicity of release	Quarterly
	Potential impact of changes to the source on the statistics produced	Substantive changes to source data will result in breaks in time series data. For example, new diagnosis or treatments codes and changes in geographical boundaries.
	Procedures for mitigating such discontinuities	Explanatory notes will be added for any discontinuities.

Information provided is believed to be correct as of March 2011 and may be subject to change.
