

## Appendix 2: Prescription status mappings at prescription level

Group Level prescription status in NHS App	Description of scenario
No status (Digital prescription visible)	Prescriber signs EPS prescription and uploaded it to spine (digital prescription)
Prescription is removed (Digital prescription not visible)	Prescriber cancels whole EPS prescription from Spine
<b>This pharmacy does not provide tracking</b>	Pharmacy that does not support tracking (not onboarded to EPS) has downloaded the prescription
<b>Pharmacy preparing prescription</b>	Pharmacy that does support tracking has downloaded the prescription or is dispensing the remainder of a prescription or owing after the first part has been collected/dispatched
<b>Cancelled by pharmacy</b>	Pharmacy is marking all item(s) on the prescription as 'not dispensed'
<b>Part ready to collect</b>	Some items are ready to collect, while others are still being dispensed or have an owing
<b>Ready to collect</b>	All item(s) are ready to collect (list can include items that are cancelled and/or marked as 'not dispensed')
Collected	All dispensed item(s) have been collected
<b>Part ready for delivery</b>	Some items are ready to deliver, while others are still being dispensed or have an owing
<b>Ready for delivery</b>	All dispensed item(s) are ready to be collected by a delivery service (list can include items that are cancelled and/or marked as 'not dispensed')
Dispatched by pharmacy	All dispensed item(s) have left the pharmacy for delivery
