# Change Log for the Data Item Catalogue

## Organisation Data Service

#	Product	Release Version	Release Date	Change Impact Level	Model screens / Schema types; elements; attributes impacted	Description of Change
41	Data Item Cat.	v1.4	27/07/2018	Low	3 new non primary roles added	New non primary roles of 'Extended Access Provider', 'Extended Access Hub' and 'Medicines Supplier' have been introduced into the XML. New role codes are available in Appendix 1 of the Data Item Catalogue.
LIVE RELEASE MAY 2018						
40	Data Item Cat.	v1.3	25/05/2018	Low	1 new primary role and 1 new non primary role added	A new primary role of 'Strategic Partnership' has been introduced into the XML data, alongside a new non primary role 'Sustainability Transformation Partnership'. New role codes available in Appendix 1 of the Data Item Catalogue.
LIVE RELEASE NOVEMBER 2017						
39	Data Item Cat.	v1.2	24/11/2017	Low	Example Named Relationships added	Examples of each named relationship within the XML added to the Data Item Catalogue Appendix.
LIVE RELEASE SEPTEMBER 2017						
38	Object Model	v1.2	25/09/2017	Low	3 primary role name changes reflected in CSV to XML map	Role name changes as requested by NHS England (see item 37). CSV to XML role mapping diagram updated.
LIVE RELEASE MAY 2017						
37	Data Item Cat. & Object Model	v1.1	19/05/2017	Low	Rename 3 primary roles (role codes remain unchanged)	As requested by NHS England, DIC and Object Model Glossary updated. NHS England Commissioning Region, Region (Geography) and Region (Geography) Site renamed.
LIVE RELEASE FEB 2017						
36	Data Item Cat. & Object Model	v1.0	15/02/2017	Low	Non primary roles added to Glossary	Additional in scope non primary role definitions added to the DIC and Object Model glossary.
35	Data Item Cat. & Object Model	v1.0	15/02/2017	Low	Schema annotation added	Further schema annotation against key types has been added.
34	Data Item Cat. & Object Model	v1.0	15/02/2017	Medium	Simple Type renamed	'oid' Simple Type renamed as 'oidStrLen50', as the attribute 'oid' exists under CodeSystemsType.
33	Data Item Cat. & Object Model	v1.0	15/02/2017	Low	Product Configuration	Version number, feedback email, copyright and release date updated following assurance activities.
BETA RELEASE / DEVELOPMENT FROM DEC 2015 to DEC 2016						
32	Data Item Cat.	V0.4	16/12/2016	Low	Add Max Lengths for all elements and attributes.	The maximum lengths for all elements and attributes have been added throughout the DIC.
31	Data Item Cat.	v0.4	16/12/2016	Low	Table header changed from 'nillable' to 'nullable'.	Elements and Attributes Tables - column header changed from 'nillable' to 'nullable' throughout.
30	Data Item Cat. & Object Model	v0.4	16/12/2016	Medium	Rename address lines and post code in LocationStringsType	StreetAddressLine1 rename as AddrLn1 StreetAddressLine2 rename as AddrLn2 StreetAddressLine3 rename as AddrLn3 PostalCode rename as PostCode
29	Data Item Cat. & Object Model	v0.4	16/12/2016	Medium	Complex Type renamed	ValStrMaxLen255 is now ValMaxStrLen255. This naming convention is now consistent with the other string length complex types within the schema.
28	Data Item Cat. & Object Model	v0.4	16/12/2016	Medium	Complex Type renamed	ValStrMaxLen100 is now ValMaxStrLen100. This naming convention is now consistent with the other string length complex types within the schema.
27	Data Item Cat. & Object Model	v0.4	16/12/2016	Medium	Complex Type renamed	TimestampValueType is now ValTimestampType
26	Data Item Cat. & Object Model	v0.4	16/12/2016	Medium	Complex Type renamed	DateValueType is now ValDateType
25	Data Item Cat. & Object Model	v0.4	16/12/2016	Low	Renamed element	Role within the Manifest is now PrimaryRole
24	Data Item Cat.	v0.3	10/06/2016	Low	10. OrgOrganisationType 13. OrgContactsType 17. OrgRelsType 21. OrgSuccsType 23. OrgAdditionalAttributesType	These sections of the Data Item Catalogue have been updated as per Items 20 and 21 of the Change Log re excluding empty containers. #10 has container cardinality changed to 0..1, the remainder have the cardinality of the contained elements (e.g. OrgContactType) changed to 1..*.
23	Data Item Cat.	v0.3	10/06/2016	Low	OrgRefData (top level element)	Schema annotation added "This is the root element of the XML document".
22	Object Model	v0.3	10/06/2016	Low	Organisations Data Container	The cardinality of this Container has been changed from 0..1 to 1..1.
21	Object Model	v0.3	10/06/2016	Low	22. OrgSuccType - attribute uniqueSuccId	Attribute use changed to required.
20	Object Model	v0.3	10/06/2016	High	Data Containers Rel, Contact, Succ and AdditionalAttribute	The cardinality between the Container and the Record for these types has been changed from 0..* to 1..*, meaning that where a Data Container is present, it will include at least one record.
19	Object Model	v0.3	10/06/2016	High	Data Containers Rels, Contacts, Succs and AdditionalAttributes	The cardinality of these Containers within the OrgOrganisationType have changed from 1..1 to 0..1 meaning that Empty Containers will now be excluded from the files.

# Change Log for the Data Item Catalogue

## Organisation Data Service

#	Product	Release Version	Release Date	Change Impact Level	Model screens / Schema types; elements; attributes impacted	Description of Change
18	Data Item Cat.	v0.2	18/12/2015	Low	22. OrgSuccType - attributes	'Use' defined for uniqueSuccId and forwardSuccession attributes where previously missing.
17	Data Item Cat.	v0.2	18/12/2015	Low	11. GeoLocType - Location ID.	"Not currently in scope." added to the Data Item Catalogue definition of the LocationID element.
16	Data Item Cat.	v0.2	18/12/2015	Medium	28. II - root	'root' was previously described as a data container when it should have been shown as an attribute of II. This has been corrected.
15	Data Item Cat.	v0.2	18/12/2015	Low	Throughout	Specific paragraph references to the Technical Specification removed, as these may change over time.
14	Data Item Cat.	v0.2	18/12/2015	Low	Throughout	Further Data Item Definitions added where previously blank. Various minor refinements to Data Item definitions made throughout.
13	Data Item Cat.	v0.2	18/12/2015	Low	<Document Structure>	Types/elements re-ordered to follow the structure of the schema.
12	Data Item Cat.	v0.2	18/12/2015	Low	<Document Structure>	Sub sections added to identify "Structural Elements" and "Data Types".
11	Object Model	v0.2	18/12/2015	Medium	Succession Screen	Notes amended from "The Successions container is optional; if no succession information exists for a record, the element will be excluded completely from the file", to "The inclusion of Succession elements is optional; if no succession information exists for a record, <u>an empty container element will be included.</u> "
10	Object Model	v0.2	18/12/2015	Low	Roles screen - XML Example	XML example amended, second role (non primary) shown should have had a different Role ID to the first role: <Role id = "RO62", now shown as <Role id = "RO87".
9	Data Item Cat.	v0.2	18/12/2015	Medium	Appendix 1 - Glossary	Relationship Identifier - RE1 description changed from "IS OPERATED BY" to "LEGACY". RE6 changed from "LEGACY" to "IS OPERATED BY".
8	Object Model	v0.2	18/12/2015	Medium	Named Relationships Meta Data screen / Model Glossary	Relationship Identifier - RE1 changed from "IS OPERATED BY" to "LEGACY". RE6 changed from "LEGACY" to "IS OPERATED BY".
7	Object Model	v0.2	18/12/2015	Low	Relationships screen	Notes amended from "Relationship allocations published in meta-data...", to "Relationship <u>definitions</u> are published...".
6	Object Model	v0.2	18/12/2015	Low	Overview screen / Additional Attributes screen	Notes amended from "The content of this container is to be used with caution as it is explicitly & intentionally not approved by SCCI", to "...as <u>the content</u> is explicitly & intentionally not approved by SCCI."
5	Object Model	v0.2	18/12/2015	Low	Overview screen / Relationships screen	Notes amended from "...an empty element will be included", to "...an empty <u>container</u> element will be included."
4	Data Item Cat.	v0.2	18/12/2015	Low	Status / OrgSuccType - Type	Titlecase used for attribute values - 'Active', 'Inactive', 'Successor', 'Predecessor' - definitions updated if previously shown in uppercase.
3	Object Model	v0.2	18/12/2015	Low	Status / OrgSuccType - Type	Titlecase used for attribute values - 'Active', 'Inactive', 'Successor', 'Predecessor' - notes updated if previously shown in uppercase.
2	Data Item Cat.	v0.2	18/12/2015	Low	22. OrgSuccType - forwardSuccession	Boolean values only published when value is 'true' (all lowercase), therefore reference to value of "false" removed.
1	Object Model	v0.2	18/12/2015	Low	Succession Screen (forwardSuccession)	Boolean values only published when value is 'true' (all lowercase), therefore reference to value of "false" removed.
